How To Embed TikTok In WordPress With EmbedPress

Embed Sources · https://embedpress.com/docs/embed-tiktok-in-wordpress/

TikTok, known in China as Douyin, is a video-sharing social networking service. This social media platform is used for creating multiple short-form videos, including dance, comedy, and education, that last from three seconds to one minute.

EmbedPress allows you to embed TikTok content immediately on your WordPress site, no matter whether it was created with Elementor or Gutenberg. Follow this step by step guideline below to find out how to embed TikTok in WordPress with EmbedPress:

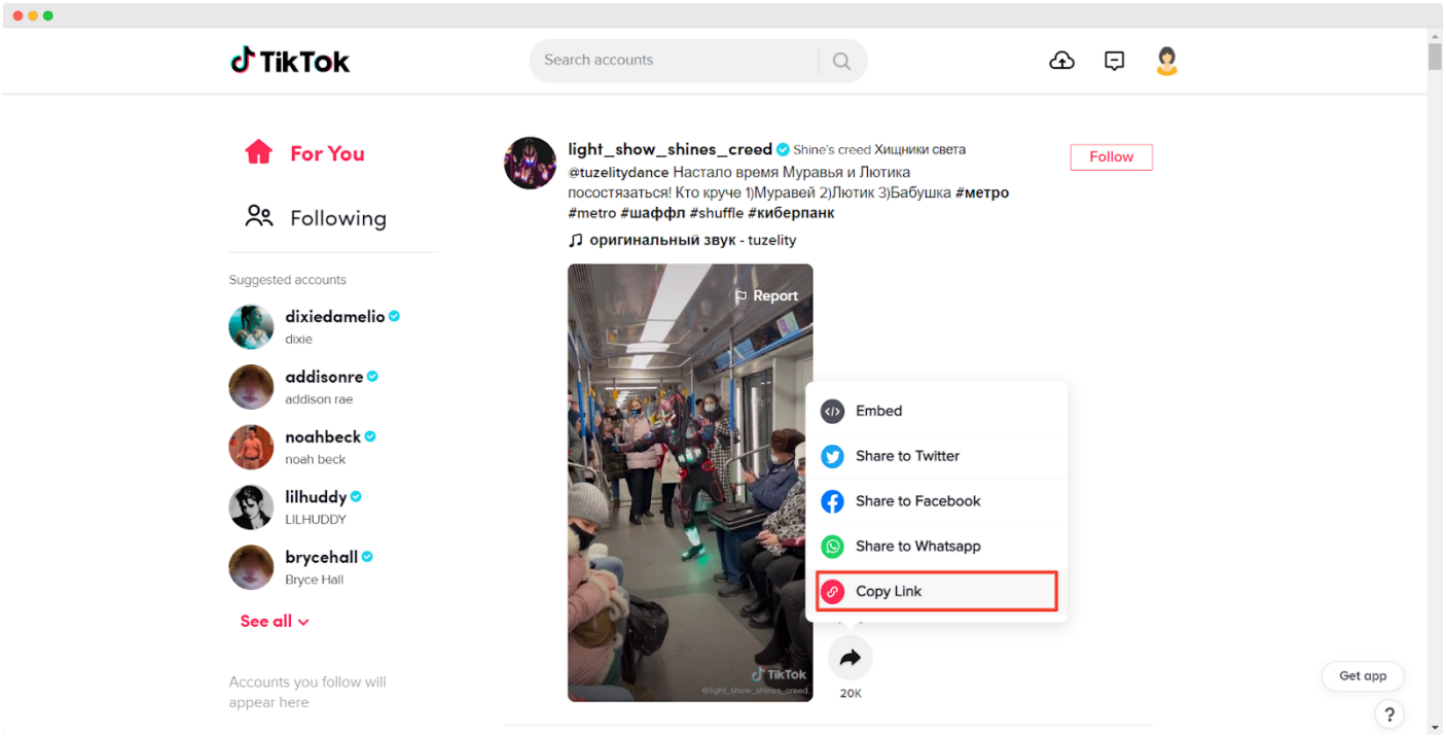
How To Collect TikTok URL

You can either embed your own created TikTok content or others created TikTok content with EmbedPress. To collect the Tiktok URL of the content, select the **‘Share’** icon, click on the **‘Copy Link’**. TikTok URL will be copied instantly. Now you can embed that URL into your WordPress website.



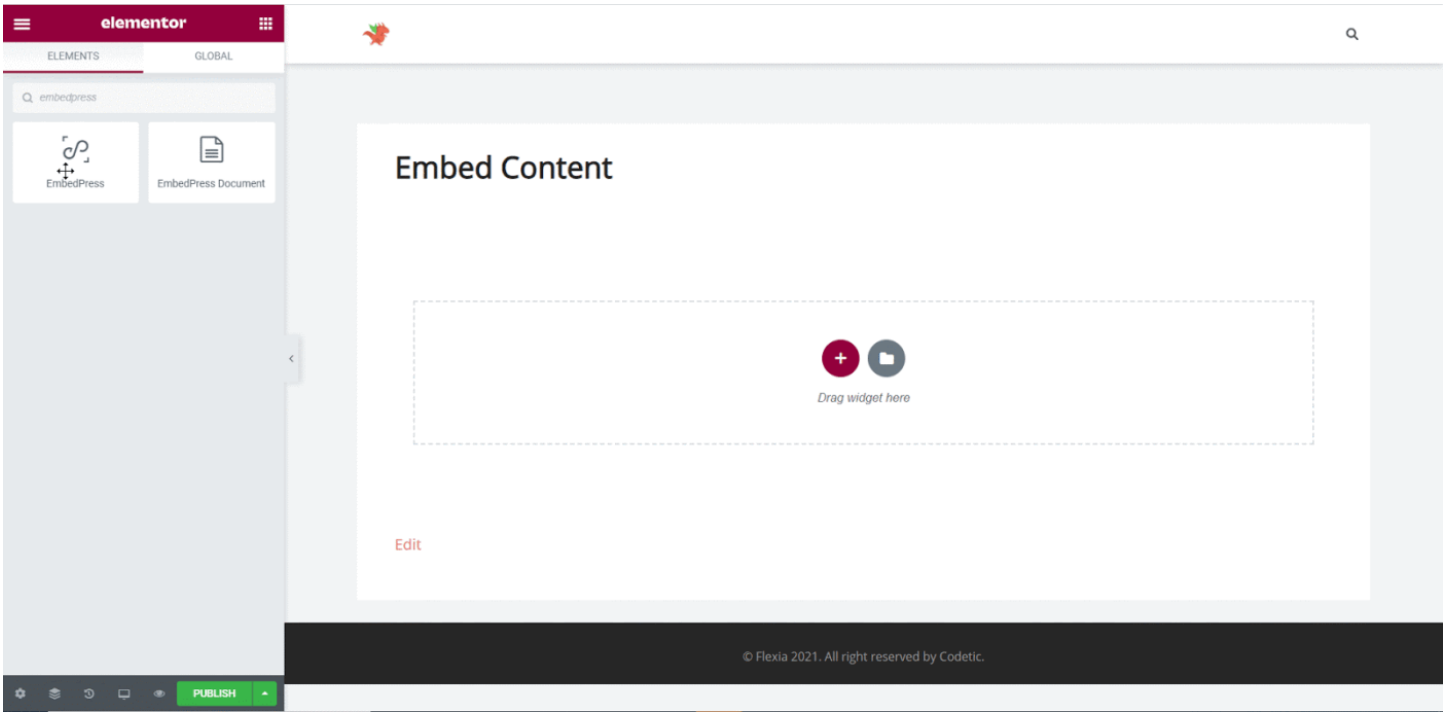
How To Embed TikTok Using Elementor

After you collect the TikTok URL, open your WordPress dashboard and select the page where you'd like TikTok links to be embedded. Then follow the instructions given below.

Note: *To embed TikTok posts using Elementor, make sure you have installed and activated* ***Elementor****.*

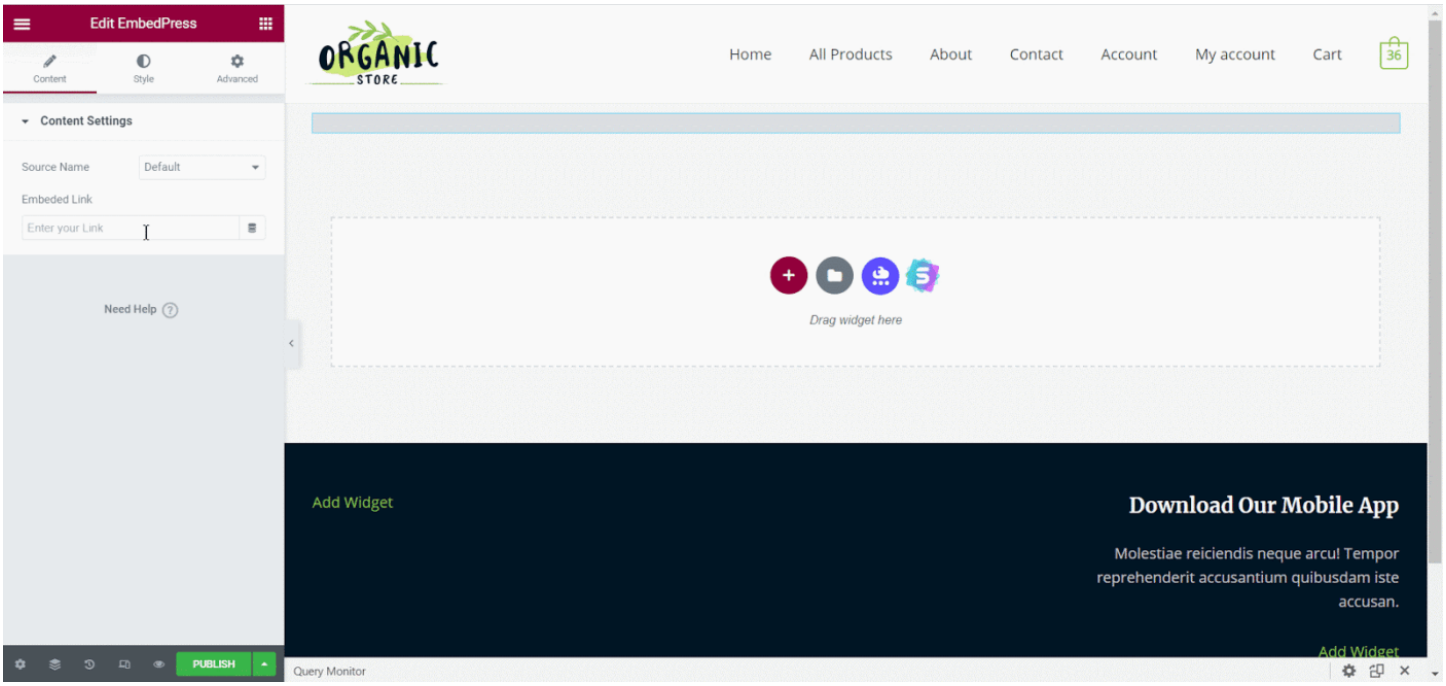
Step 1: Search The EmbedPress Element

First, click on **'Edit with Elementor'** on the top of your page. It will take you to the Elementor editing panel. Search for **EmbedPress element** on the widget panel and then drag and drop the element on your page.



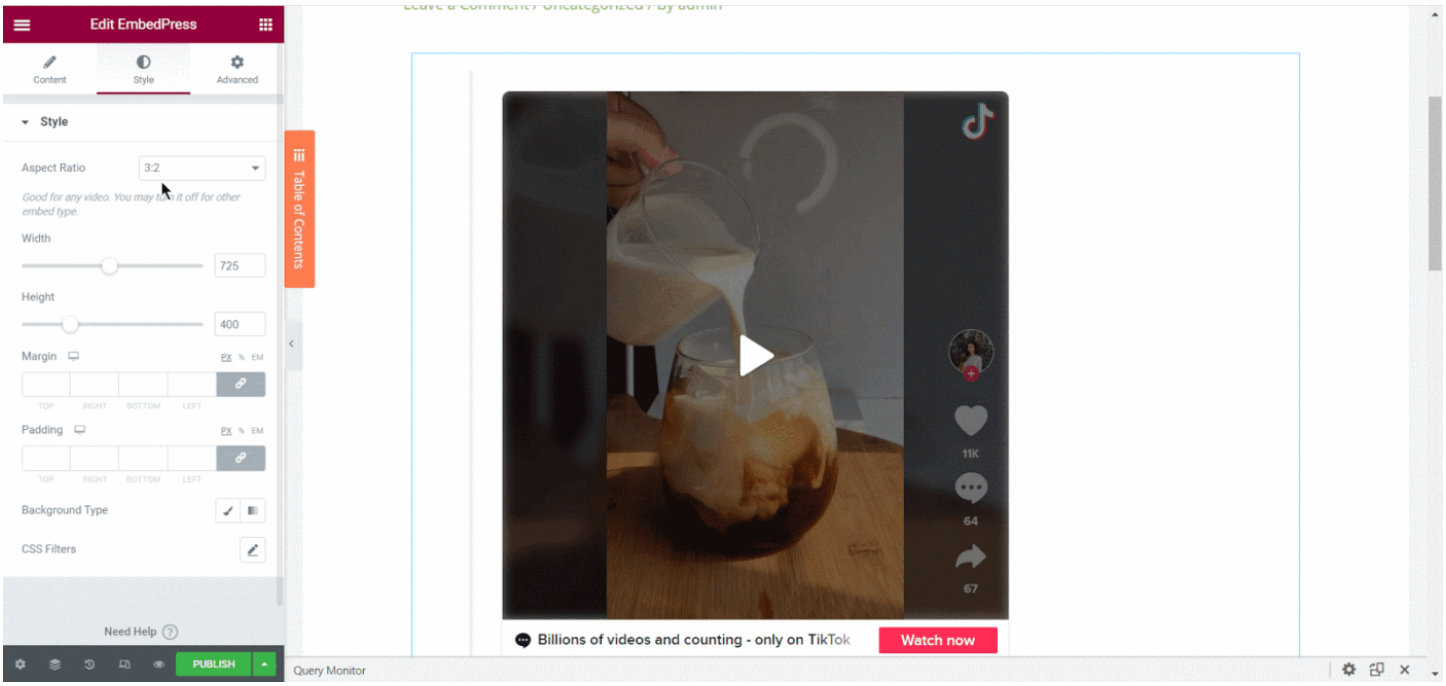
Step 2: Paste The TikTok Post's URL In 'Content Settings'

Next, paste the TikTok post URL you copied into the **'Content Settings'** input field. You will be able to see your TikTok post now.



Step 3: Style Your Embedded Content

EmbedPress can be edited to display your content in a more visually appealing manner based on your site's design. Simply click on the **‘Style’** tab. You can adjust the **‘Aspect Ratio’** of your embedded content. Explore all the options available in **‘CSS Filters’** to make it fit more neatly into your website.



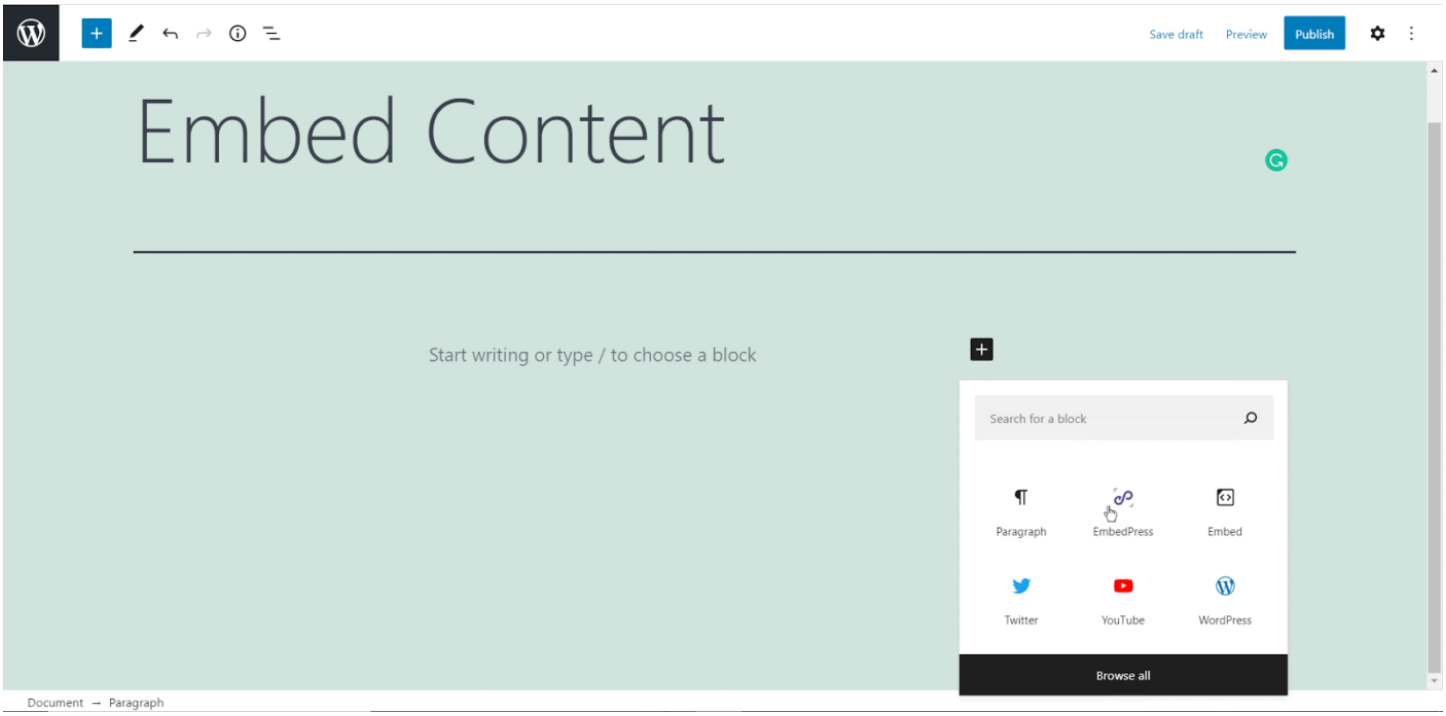
After making all changes hit the **‘Publish’** button and your content will be successfully embedded.

How To Embed TikTok Posts Using Gutenberg

EmbedPress comes with its own block for embedding any type of content using Gutenberg. To embed TikTok using Gutenberg, follow the steps below.

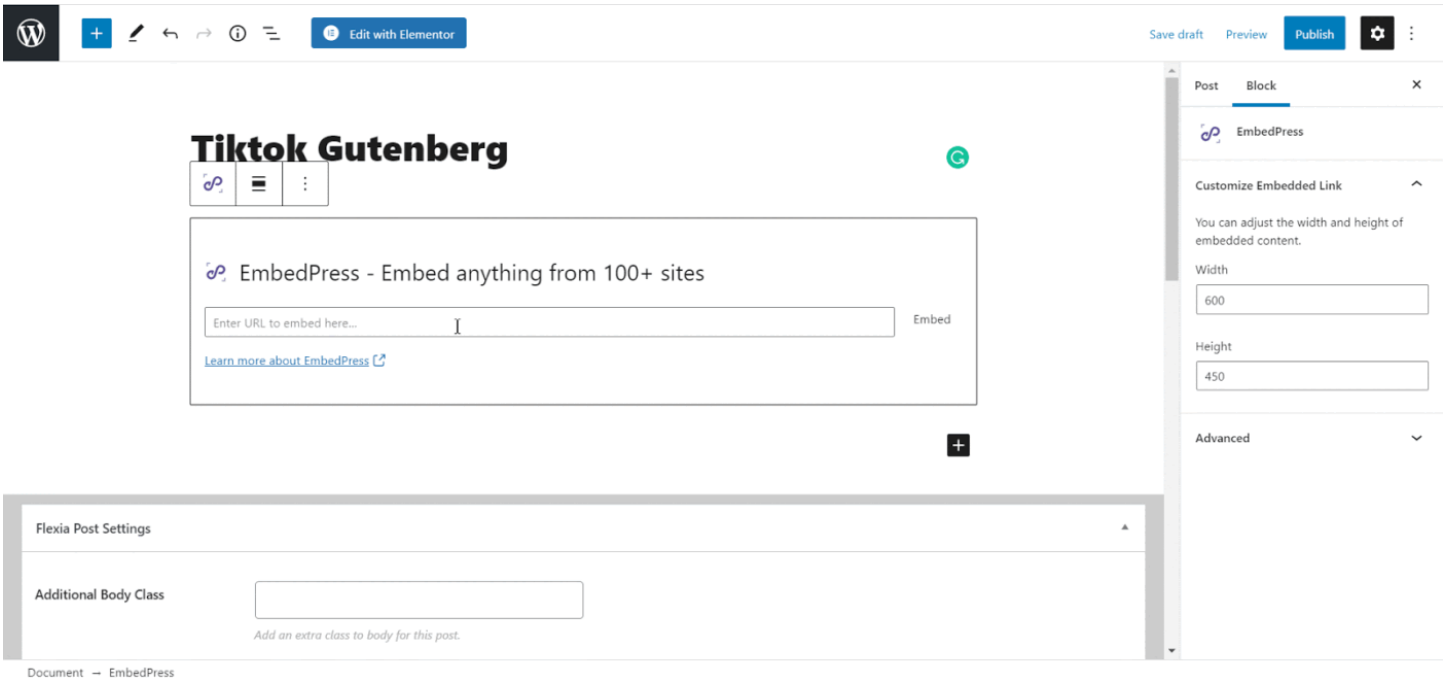
Step 1: Search For The EmbedPress Block

Open the page where you wish to embed a TikTok post from your dashboard. Now Click on the **‘+’** icon to add blocks and search for EmbedPress. Then insert the **EmbedPress block** in the page.

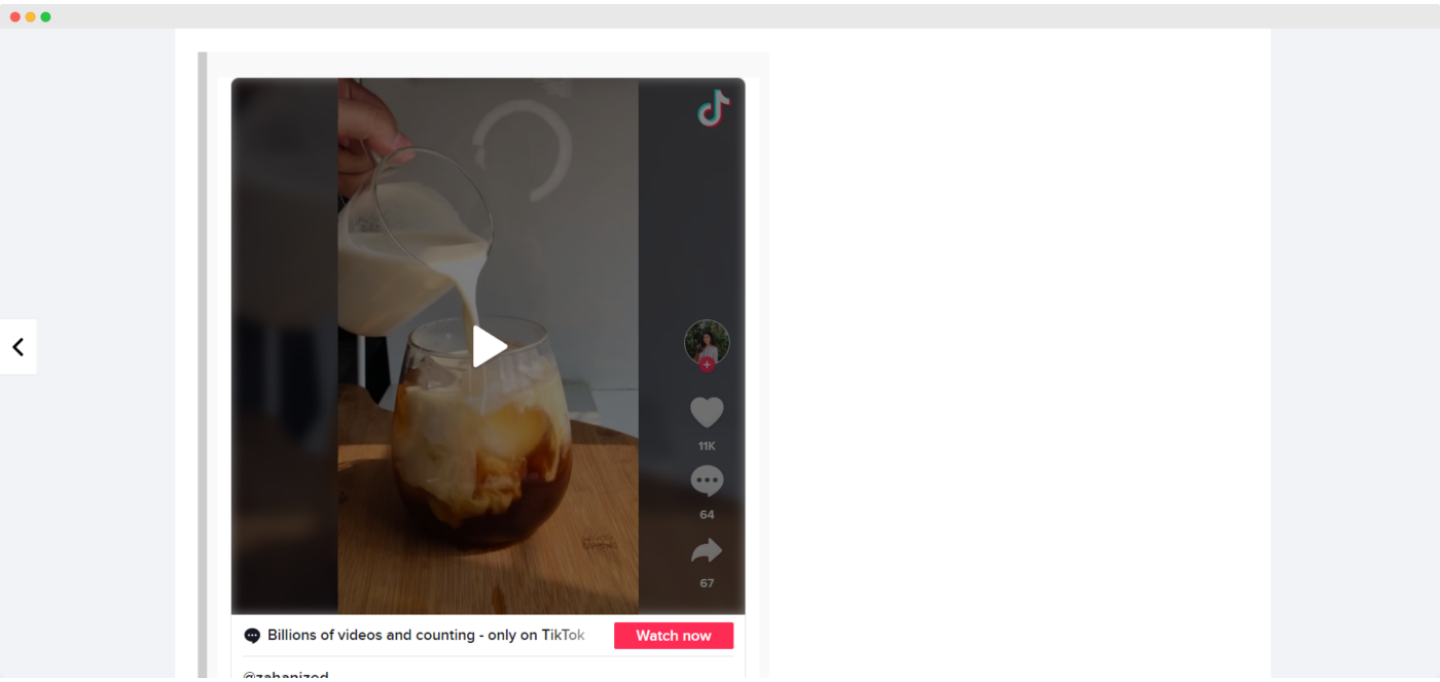


Step 2: Paste The TikTok Post's URL In EmbedPress Block

Now paste the collected TikTok URL on the input field and click on the **'Embed'** button beside the URL field. Your Content will be successfully embedded using Gutenberg.

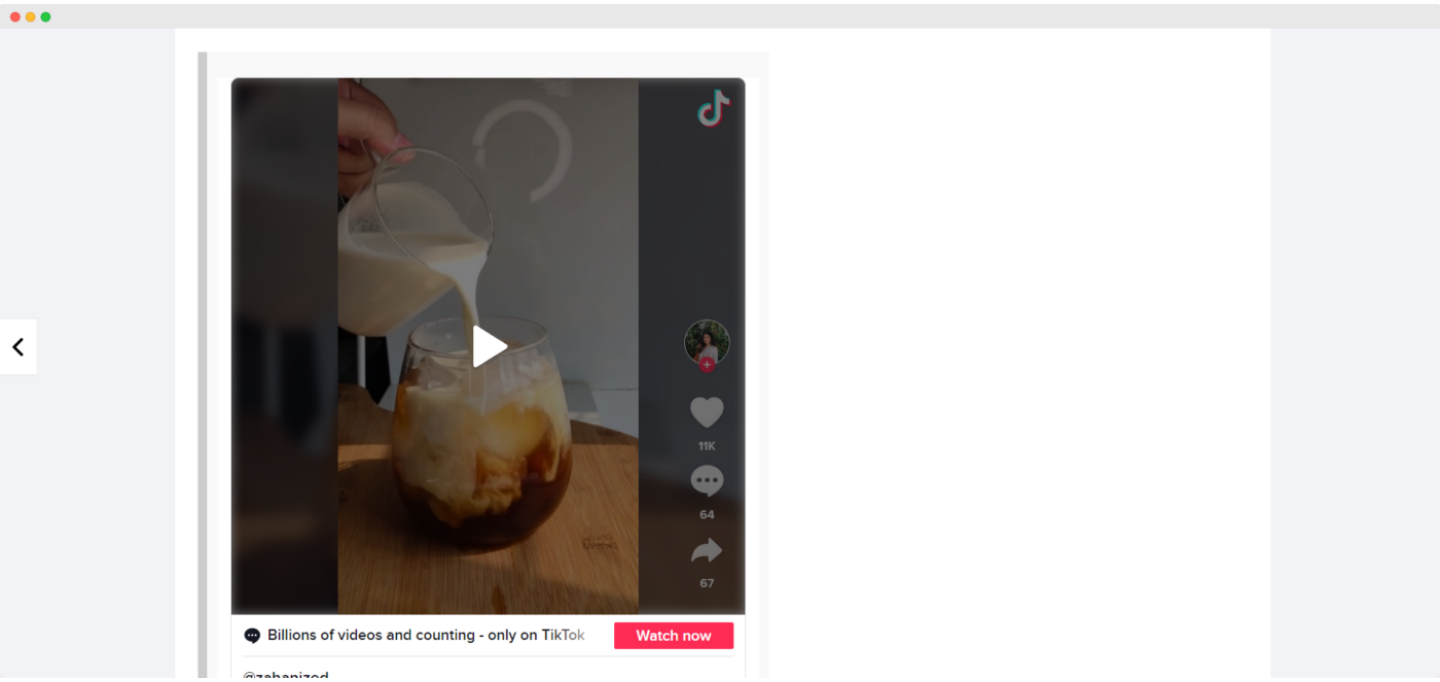


Check out the final outcome of how your embedded TikTok Content will look like in the live WordPress website.



How To Embed TikTok Posts Using Classic Editor

If you are a **Classic Editor** user, you can easily embed TikTok posts with just one click. To do this, open a new page with Classic Editor and **paste the content URL**. you can preview the embedded content instantly on the page. This is how your embedded Tiktok posts will look on the live WordPress website.



With these simple steps, you can embed TikTok posts links instantly into your WordPress website with **EmbedPress** using any of Gutenberg Editor, Classic Editor, or Elementor Editor.
