HOW TO EMBED VIDYARD VIDEOS IN WORDPRESS WITH EMBEDPRESS

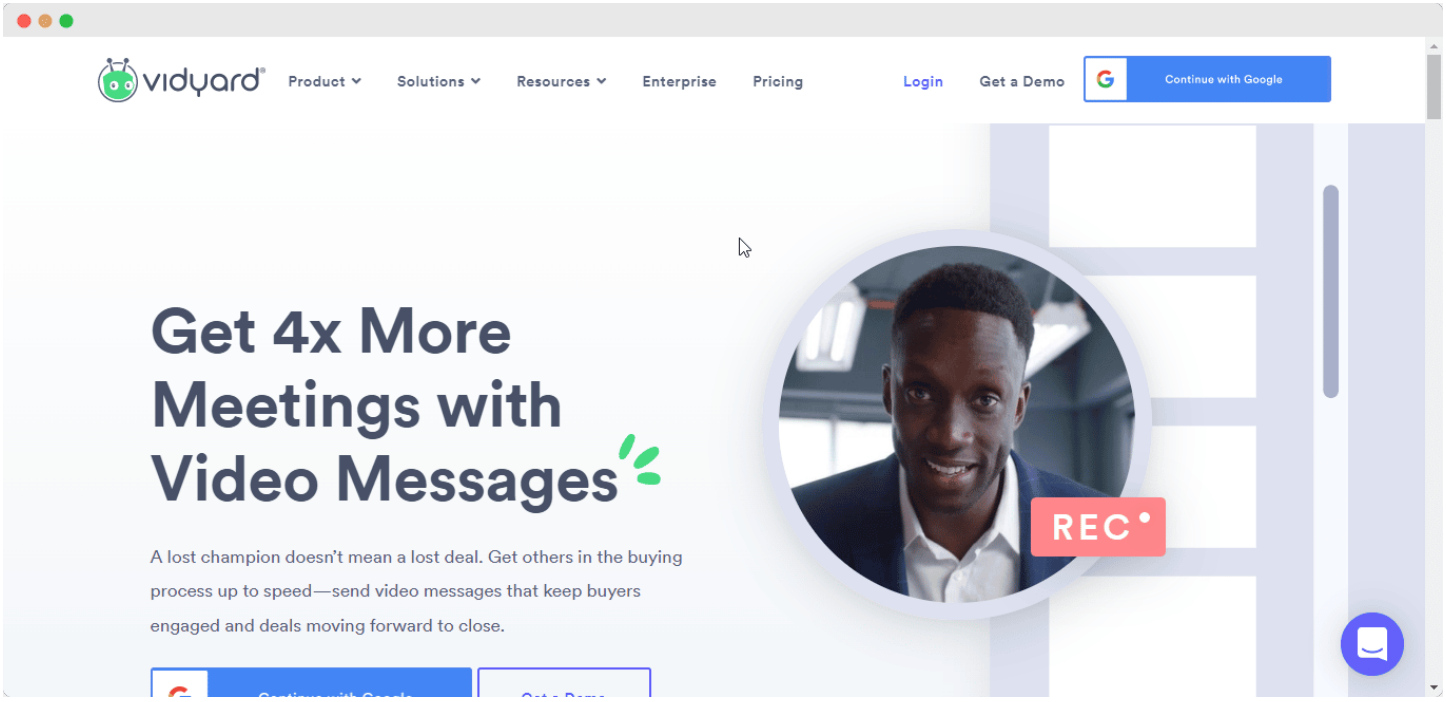
Video Embeds · https://embedpress.com/docs/embed-vidyard-in-wordpress/

Vidyard is a video tool designed specifically for virtual selling. It makes it simple to record and share personalized videos at all levels of the sales cycle, from prospecting to proposals.

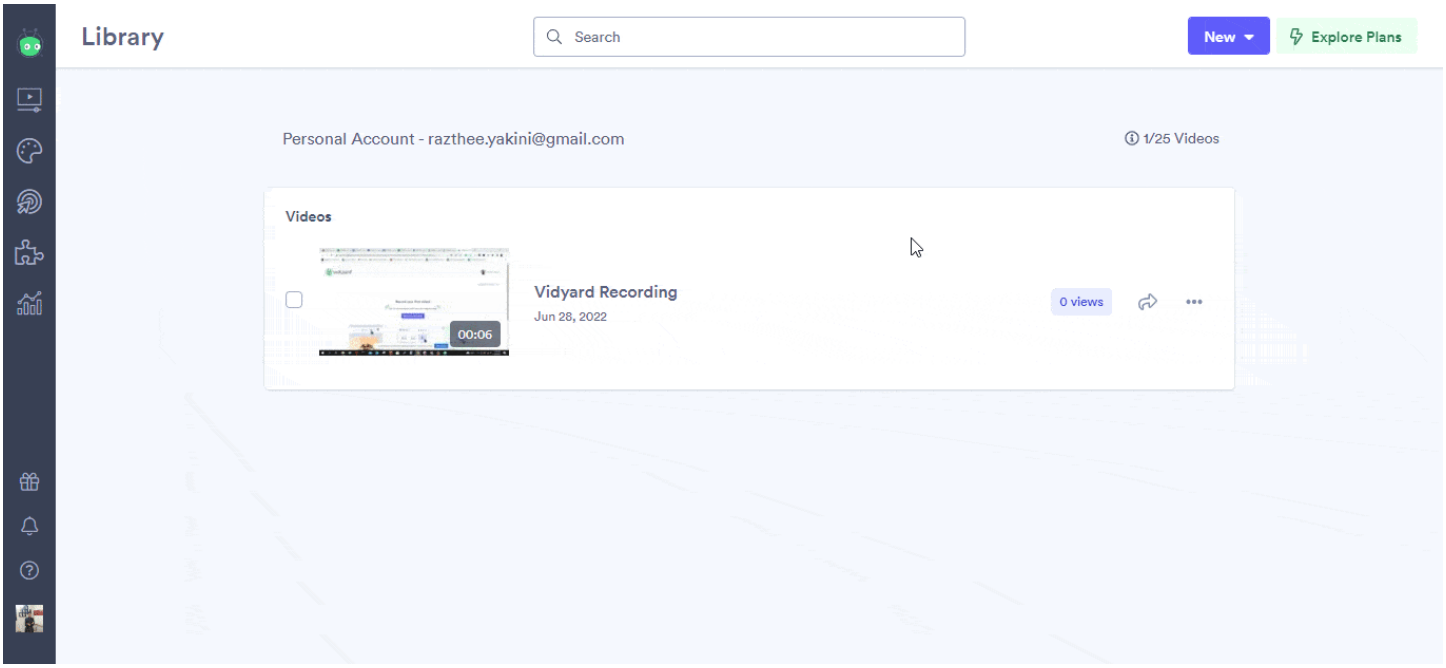
EmbedPress allows you to embed Vidyard videos on your WordPress website instantly, whether built with **Elementor**, **Gutenberg**, or **Classic Editor**. Follow this step-by-step guide below to find out how to embed Vidyard video links in WordPress with **EmbedPress**.

How To Collect Vidyard URL?

To embed the Vidyard URL on your WordPress site, first head over to the **Vidyard website** and log in with your Google account. Or you can also create a new account for free.



After logging in you can upload any new video or you can pick any demo videos from the gallery. Then press the '**Share**' button and you will get the link. Copy and save the link for future embedding.

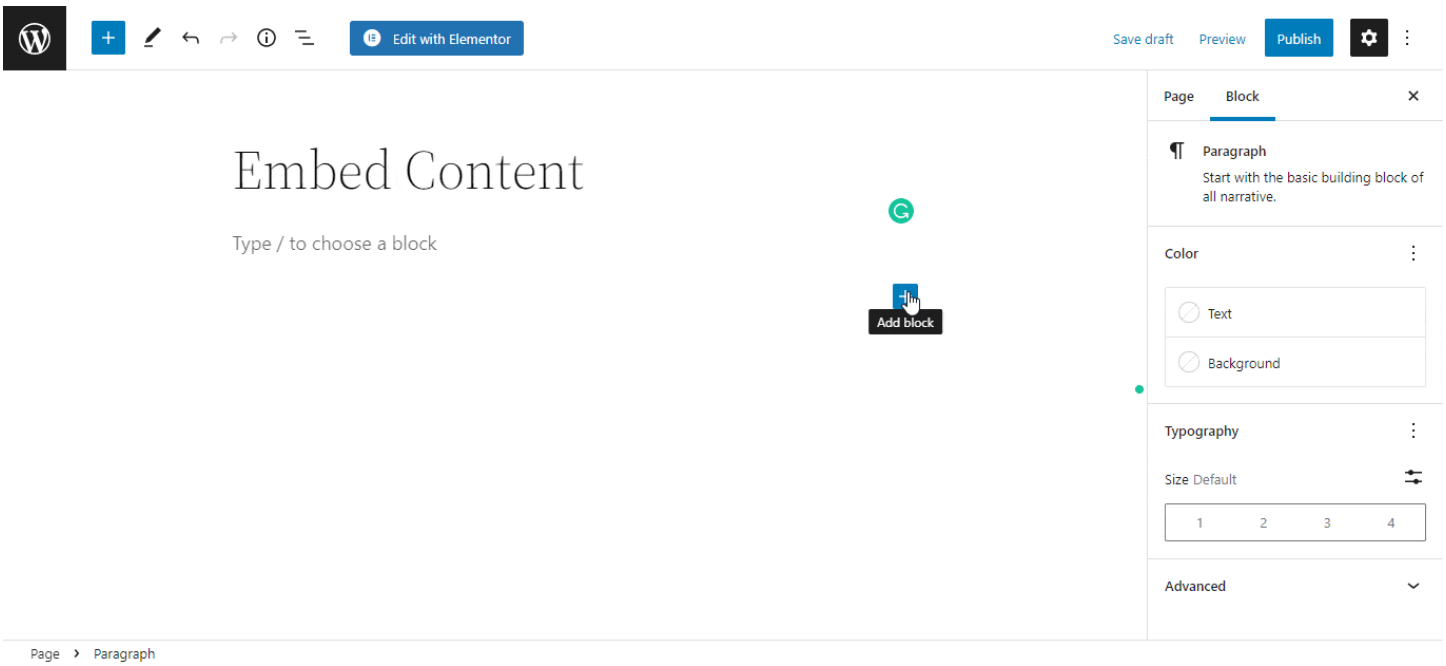


How To Embed Vidyard In Gutenberg?

EmbedPress has its own blocks to embed any type of content using the **Gutenberg block editor**. To embed Vidyard videos using Gutenberg, follow the steps below.

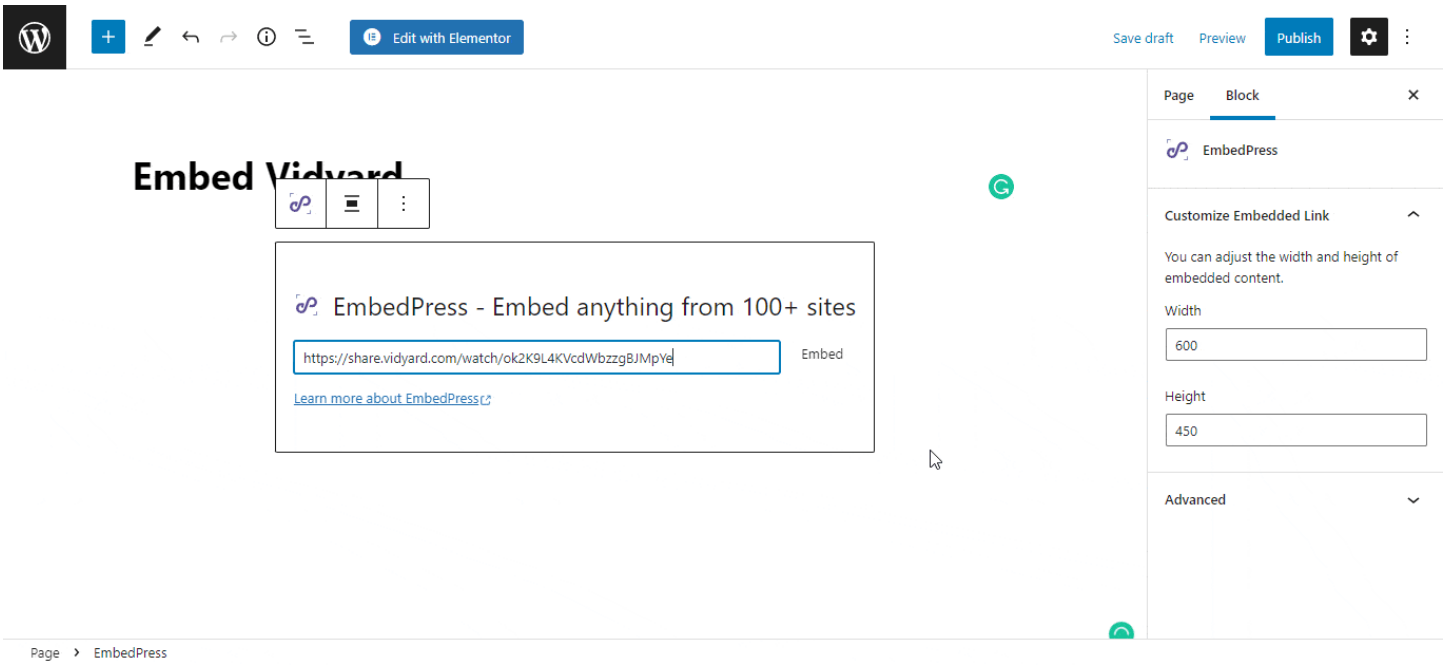
Step 1: Search For The EmbedPress Block

From your website dashboard, open the page where you want to embed Vidyard videos. Click on the '+' icon to add blocks and search for **'EmbedPress'**. Simply click on the block that appears in the search and insert it onto the page.



Step 2: Paste The Vidyard URL In EmbedPress Block

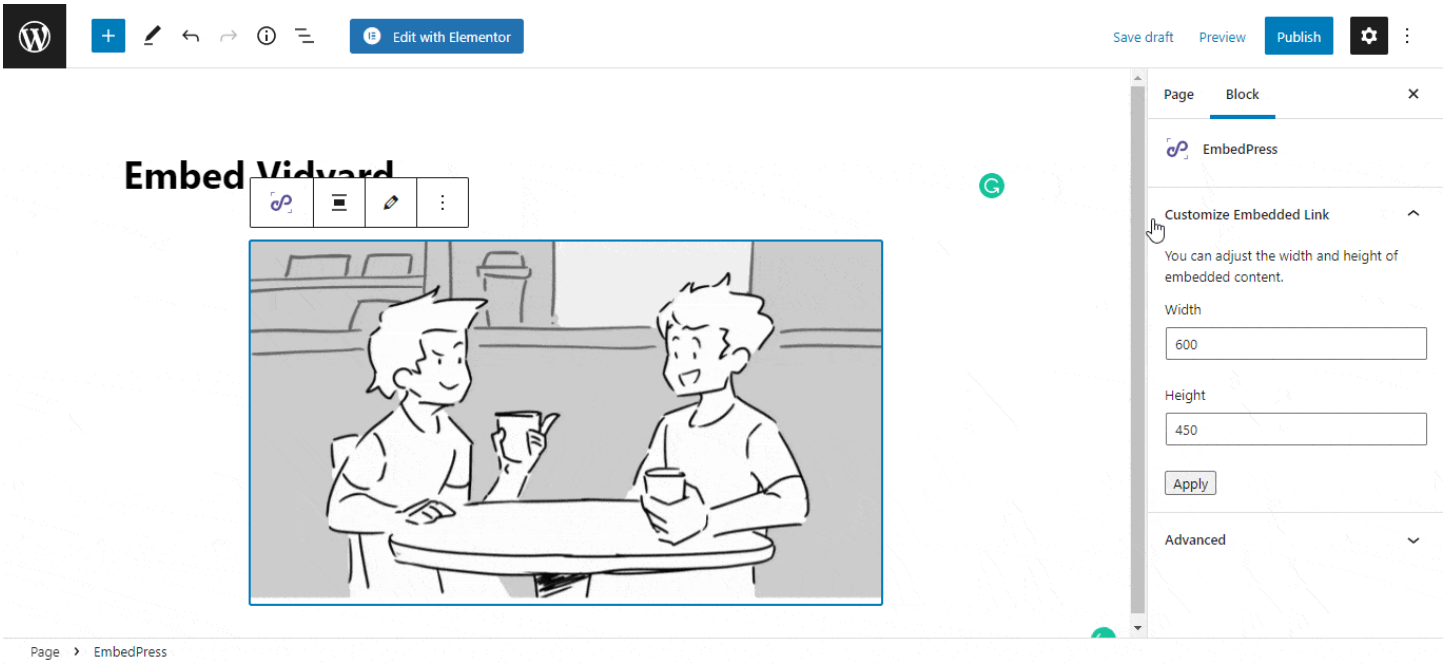
Afterward, paste the collected Vidyard URL into the input field and click on the '**Embed**' button beside the URL field. The Content will be successfully embedded using the Gutenberg block editor.



Step 3: Edit & Publish Your Vidyard Embed

You can add some customization and choose how you want to showcase your embedded Vidyard videos. You can adjust the width and height of your file from the options under the Block tab on your

right-hand side.



To find out how your embedded Vidyard is looking, click on the '**Preview**' button of your website and have a look.

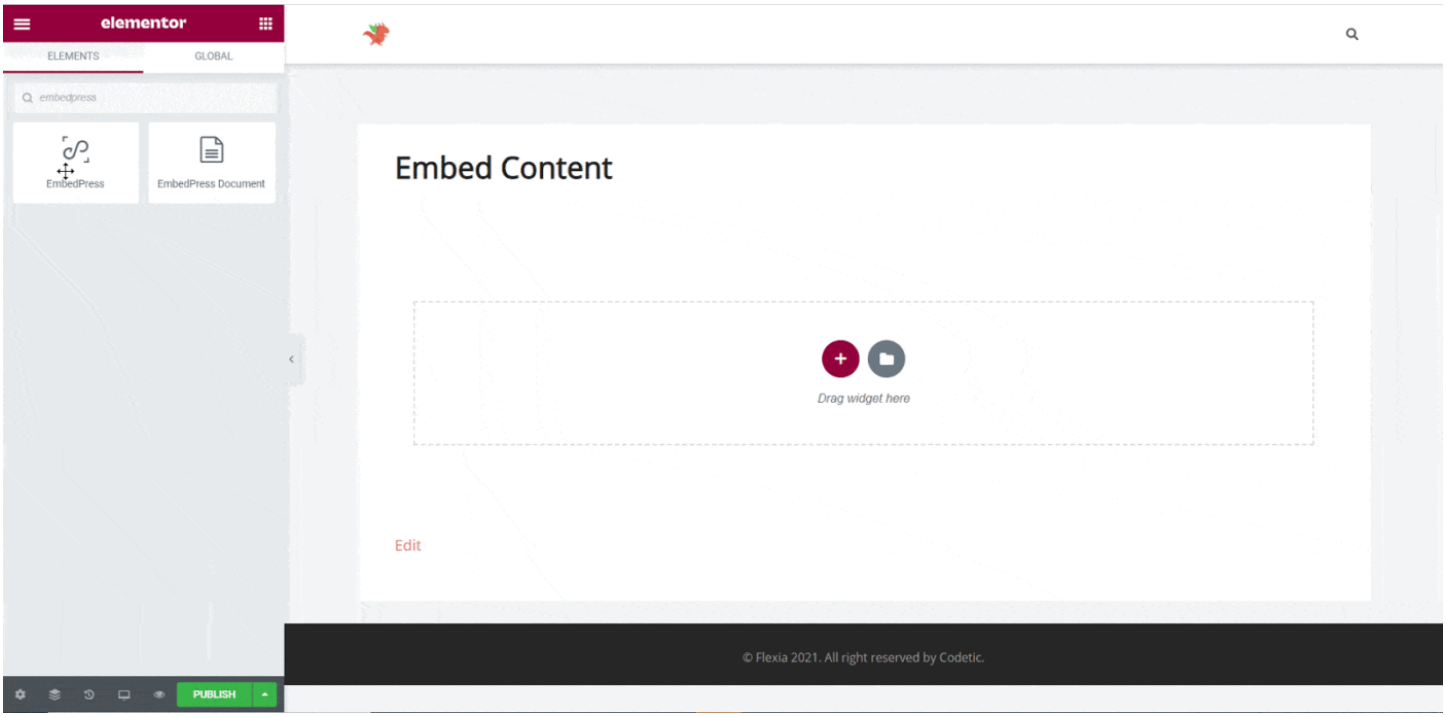
How To Embed Vidyard In Elementor?

After collecting the Vidyard URL, head over to your WordPress dashboard and open the page where you want to embed Vidyard links, then follow the instructions given below.

Note: *To embed Vidyard links in WordPress using* ***Elementor****, make sure you have installed and activated the plugin.*

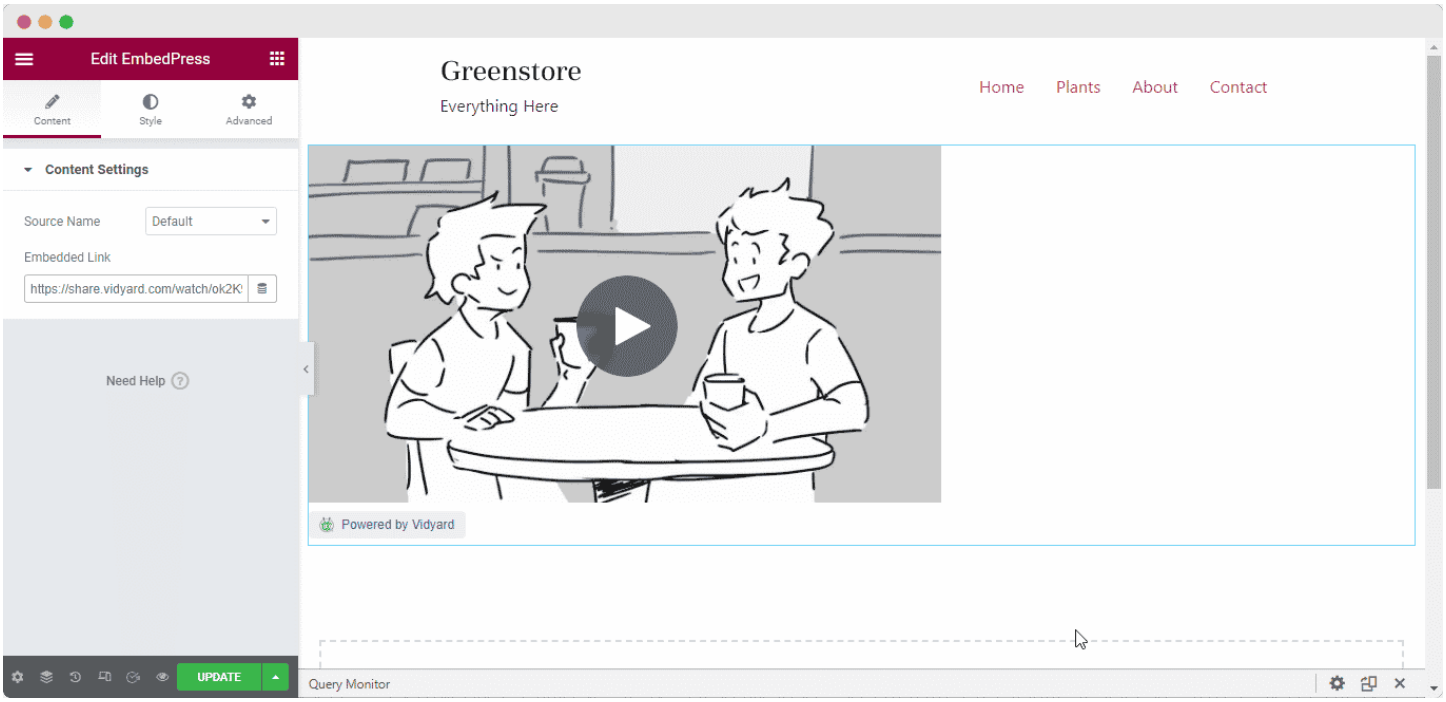
Step 1: Search The EmbedPress Element

First, select this '**Edit with Elementor**' button on the top of your page. It will take you to the Elementor editing panel. Search for the '**EmbedPress**' element on the widget panel and then drag and drop the element on your page.



Step 2: Paste The Post's URL In 'Content Settings'

Next, paste the Vidyard URL you just collected into the input field of the '**Content Settings**'. It will automatically then fetch and embed your videos into the Elementor editor.

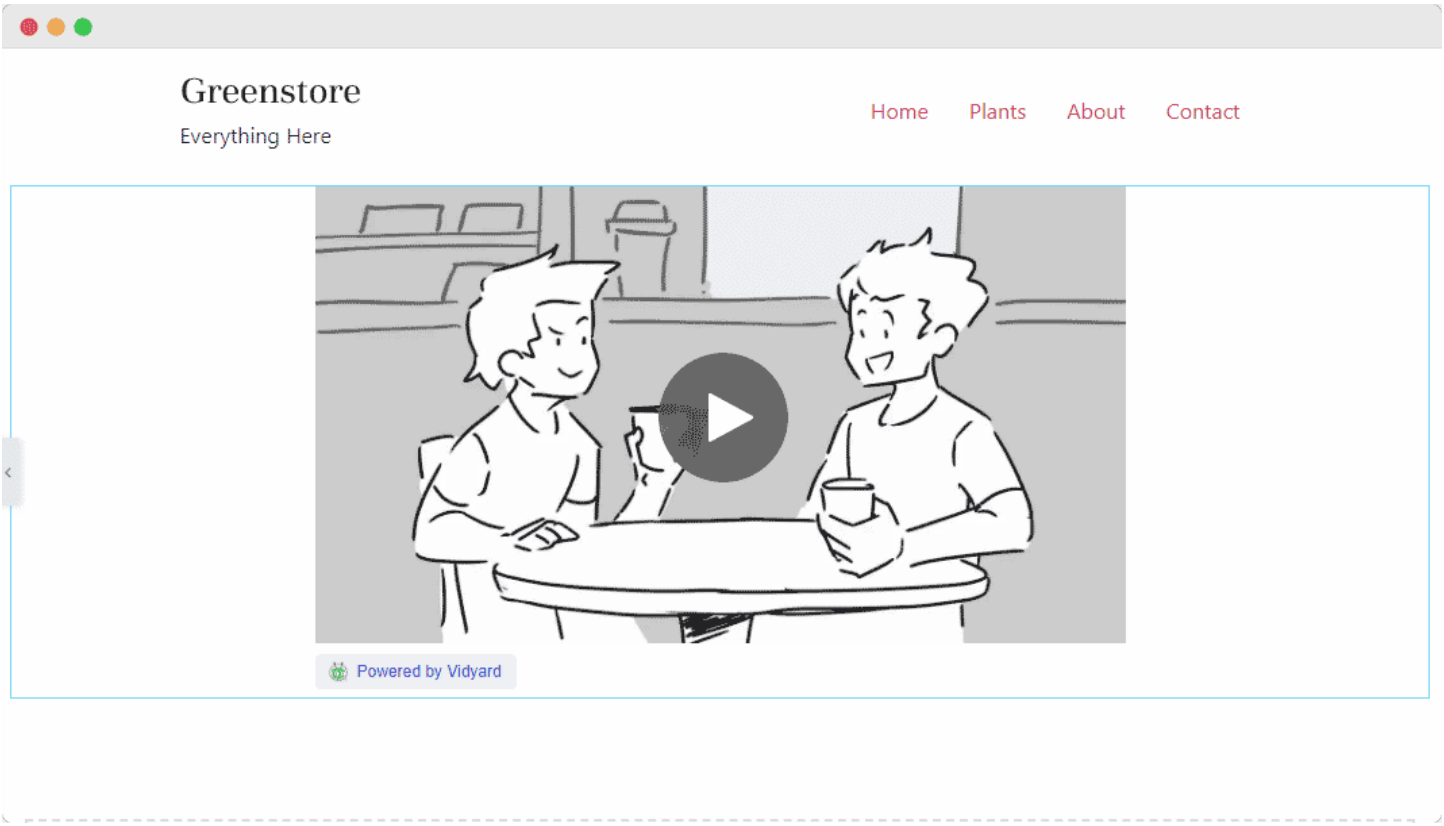


Step 3: Style Your Embedded Content

You can edit EmbedPress to present your content in a more visually appealing way based on the design of your website.

Simply click on the '**Style**' tab. You can change the '**Width**' and '**Height**' of your embedded content. Tweak and turn '**Margin** 'and '**Padding**' to fit it more neatly into your website.

After making all changes hit the '**Publish**' button and your content will be successfully embedded.

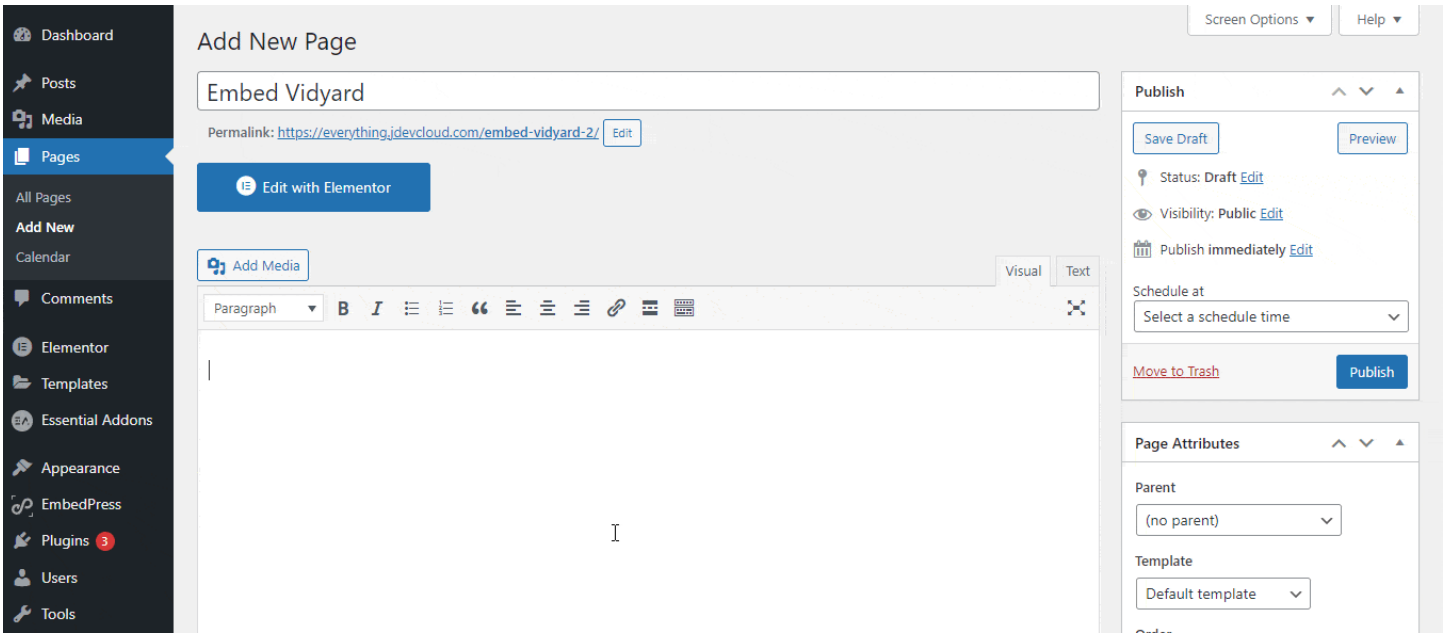


How To Embed Vidyard In Classic Editor?

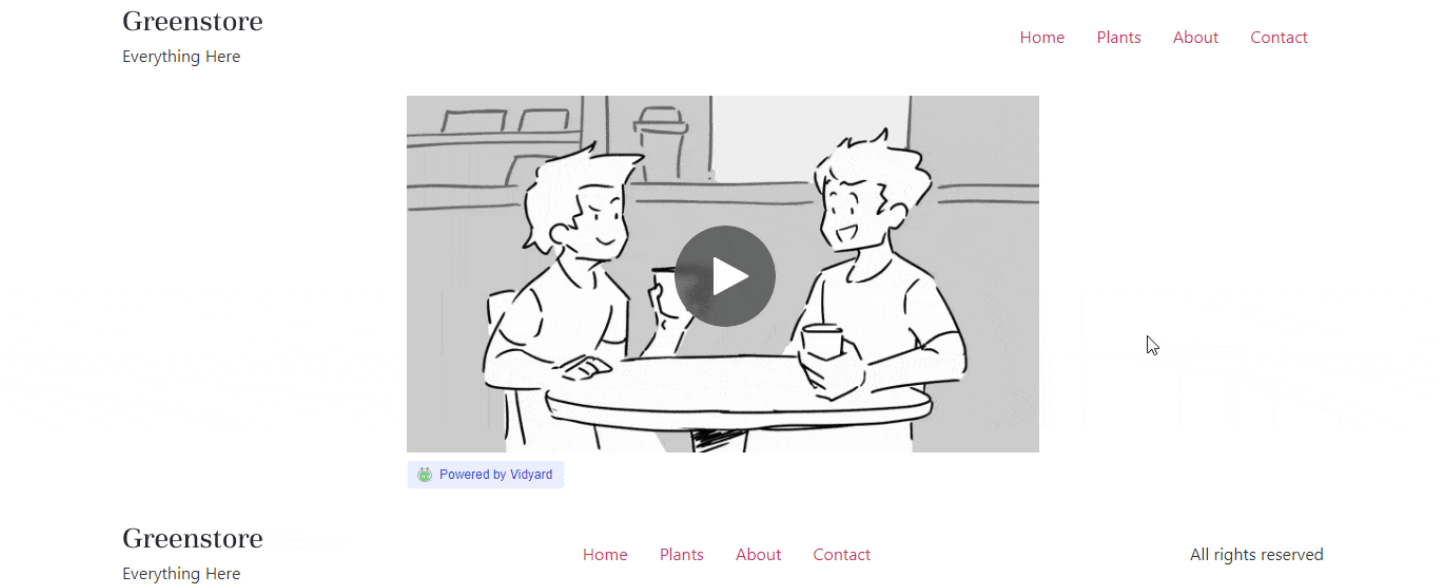
If you are a **Classic Editor** user, you can easily embed Vidyard videos with just one click.

Step 1: Paste The Link On Classic Editor

To do this, open a new page with Classic Editor and **paste the content URL**. You can preview the embedded by clicking the '**Preview**' button.



Click on the '**Pencil**' icon to change the '**Width**' and '**Height**' of your embedded content. You can also change the URL of your Vidyard videos. After making all changes hit the '**Publish**' button and your content will be successfully embedded.



With these simple steps, you can embed the Vidyard videos instantly into your WordPress website with **EmbedPress** using any of Gutenberg Editor, Classic Editor, or Elementor Editor.
