How to Embed a PDF Gallery in WordPress with EmbedPress?

Embed Document · https://embedpress.com/docs/embed-a-pdf-gallery-in-wordpress/

With **EmbedPress**, you can easily embed a PDF gallery in WordPress to showcase multiple PDFs at once and create an effective document gallery on your website. This brings you a fully responsive **EmbedPress PDF Gallery block** for the Gutenberg editor and an **EmbedPress PDF Gallery widget** to help you embed multiple PDFs using the Elementor website builder.

How to Embed a PDF Gallery in Gutenberg Editor Using the PDF Gallery Block

Follow the steps below to learn how to embed a PDF gallery in Gutenberg sites without coding.

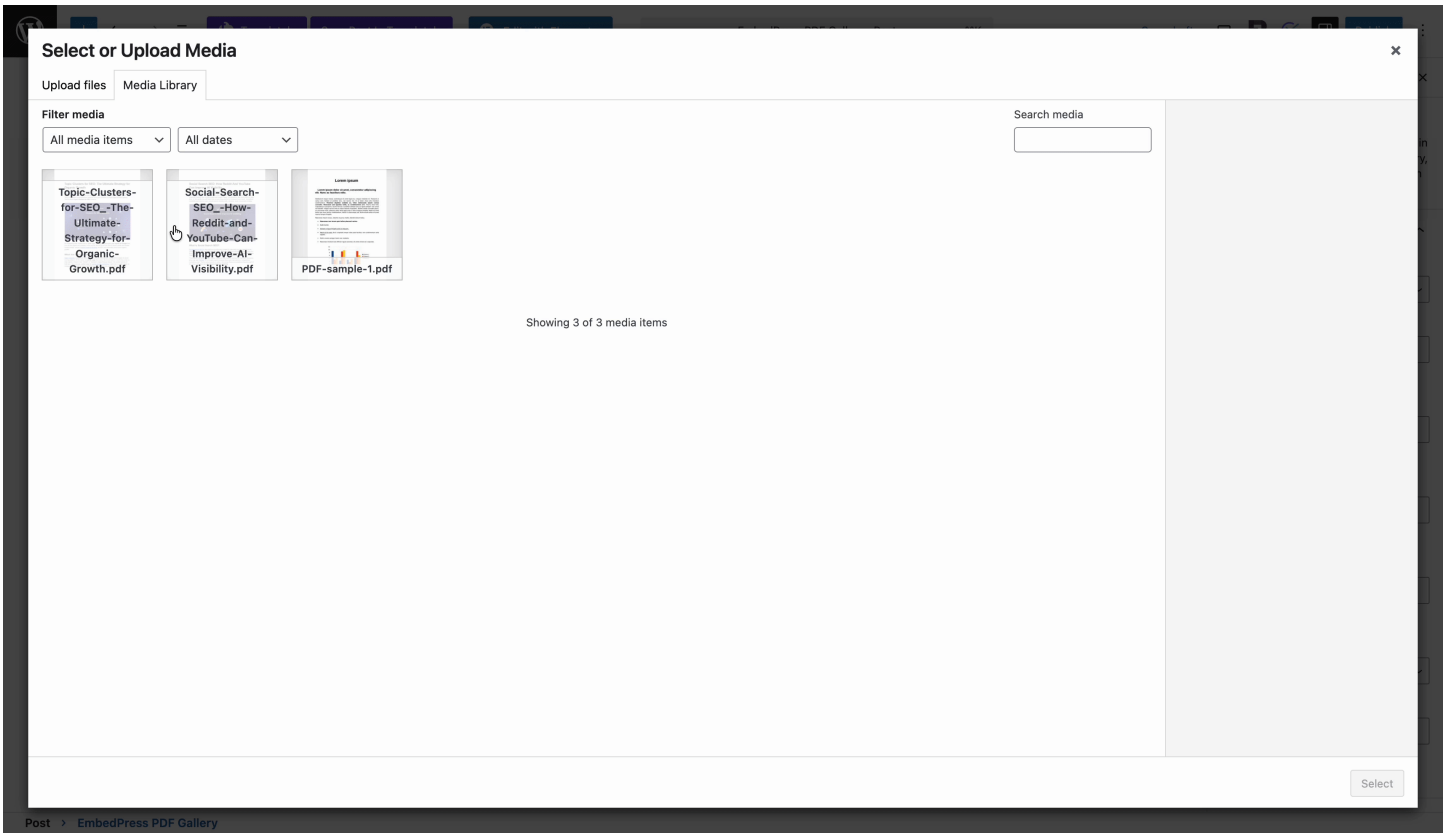

Step 1: Insert the EmbedPress PDF Gallery Block

Create a new post or page from your WordPress dashboard, or open the one where you want to showcase the gallery. Next, click on the **‘+’ icon** on top of the web page or anywhere in your content area of the Gutenberg editor. Search for ‘PDF Gallery’ or **EmbedPress PDF Gallery** block and add it.

Step 2: Upload Or Select Multiple PDFs

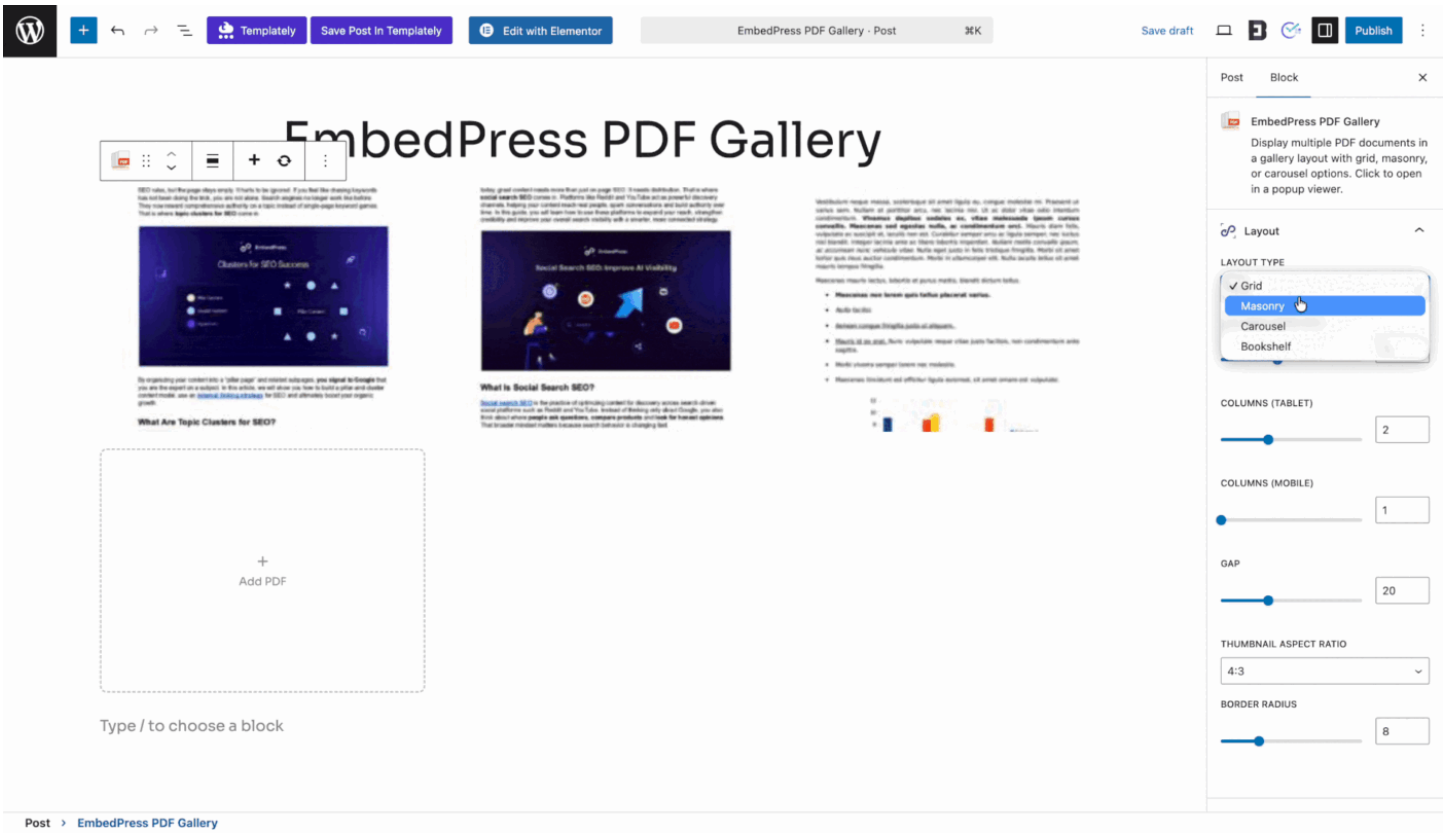

To create your gallery, simply click the '**Add PDF**' button and select the **'Media Library'** or **'Upload'** button. Choose multiple PDFs that you want to showcase. EmbedPress will automatically fetch the selected files and arrange them into a gallery on your post or page.

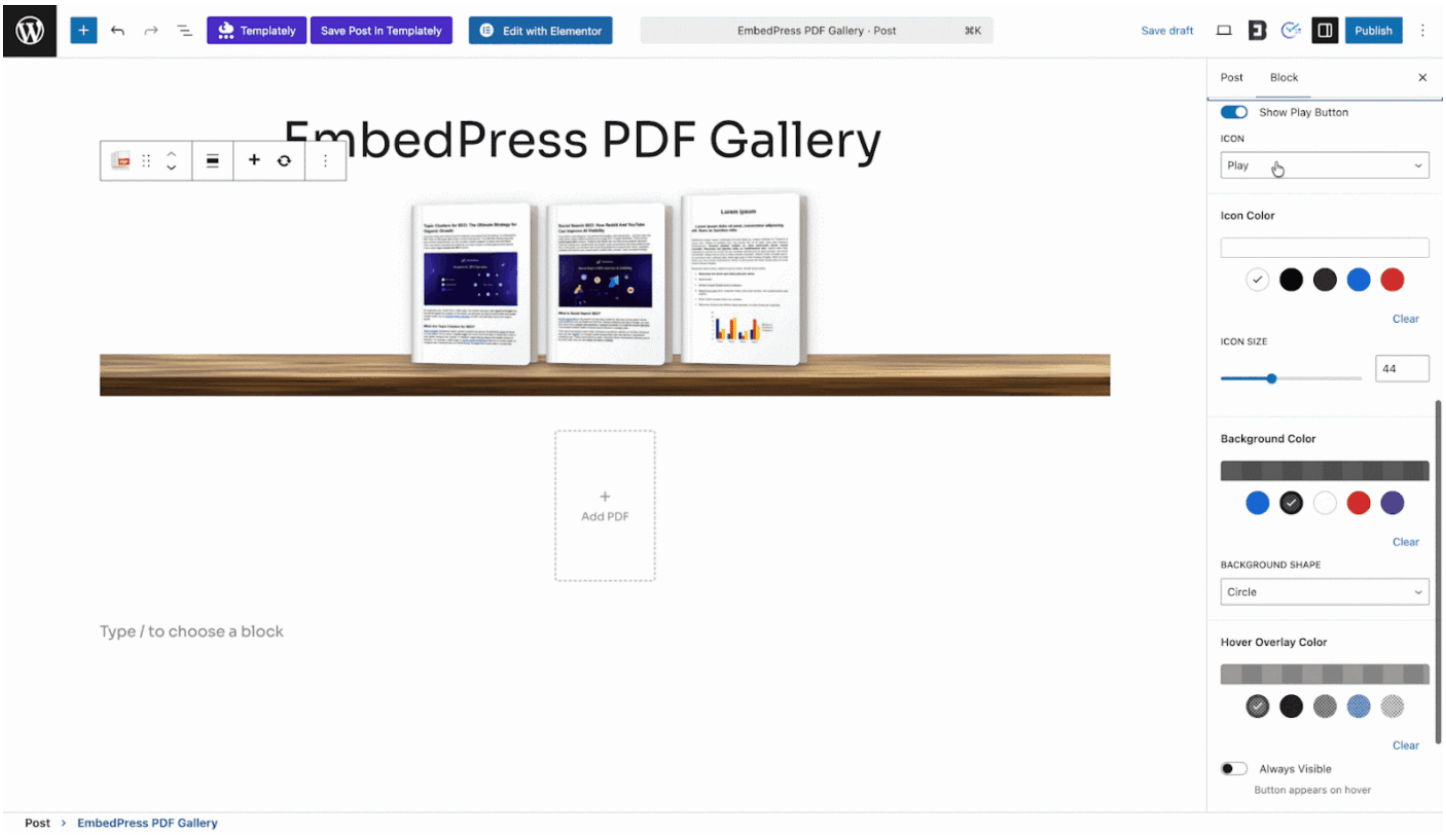

Step 3: Edit & Publish Your PDF Gallery

You can add extensive customization and choose exactly how you want to showcase your PDF gallery from the options under the **Block** tab on your right-hand side.

- **Layout Types:** Choose between 4 stunning layouts: **Grid**, **Masonry**, **Carousel (PRO)** and **BookShelf (PRO)**.
- **Columns & Gap:** Easily adjust the number of columns and the gap between items for both Desktop and Mobile devices to ensure perfect responsiveness.

- **BookShelf Styles:** If you select the BookShelf layout, you can choose from three beautiful shelf styles: **Dark Wood**, **Light Wood** and **Glass**.
- **Additional Controls:** Customize the look and feel by configuring the **Custom Thumbnail (PRO)**, toggling the **Play Button (FREE)**, adding a **Watermark (PRO)** and setting your preferred **Display Mode (FREE)** (such as a Modern popup or Flip Book viewer).

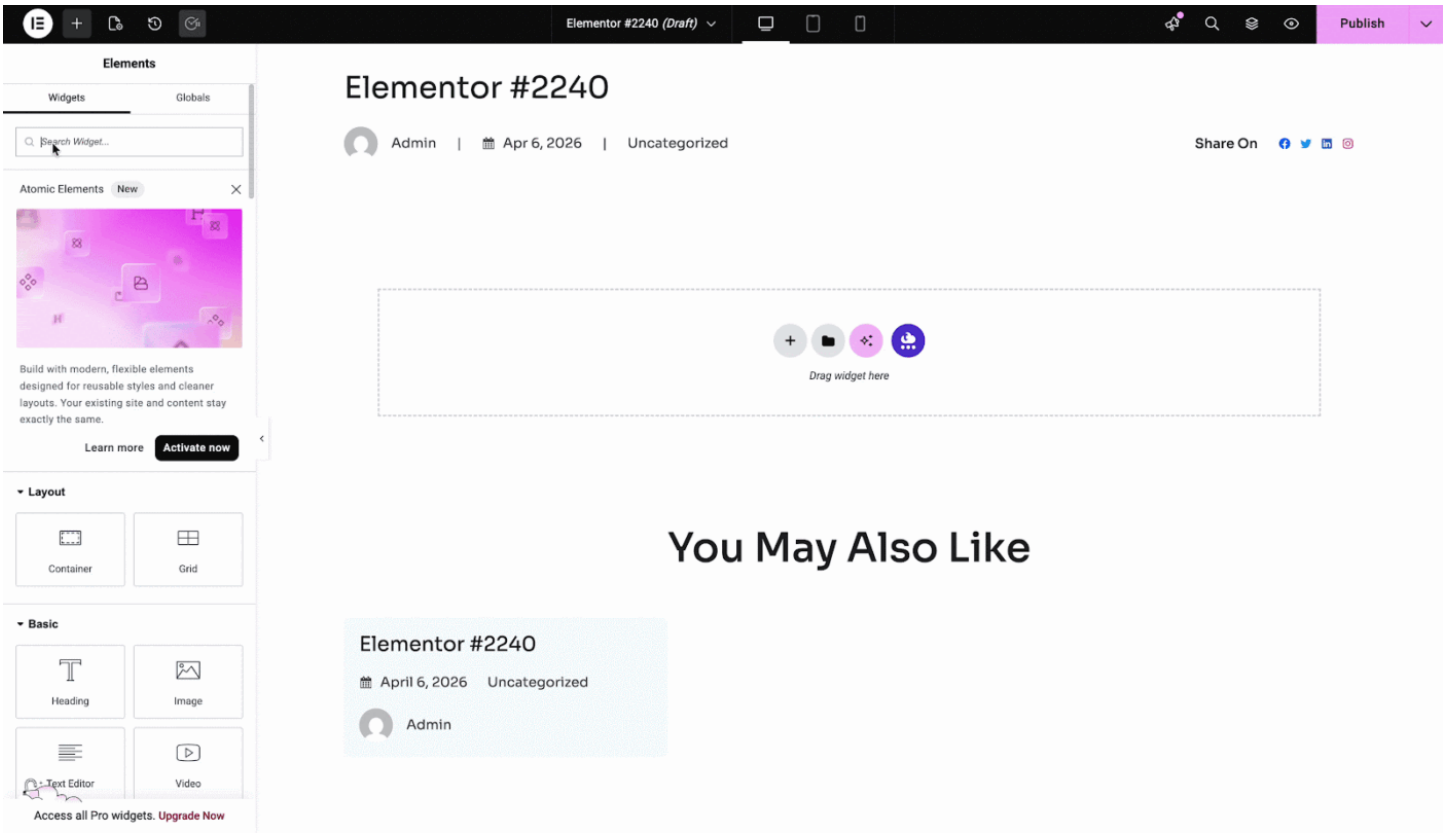

When you are done customizing, publish and preview your post or page. A fully responsive PDF gallery will now be available for your website visitors to view and interact with.

How to Embed a PDF Gallery in Elementor Using the PDF Gallery Widget

You can use EmbedPress to embed a PDF gallery in **Elementor** websites by following these detailed steps.

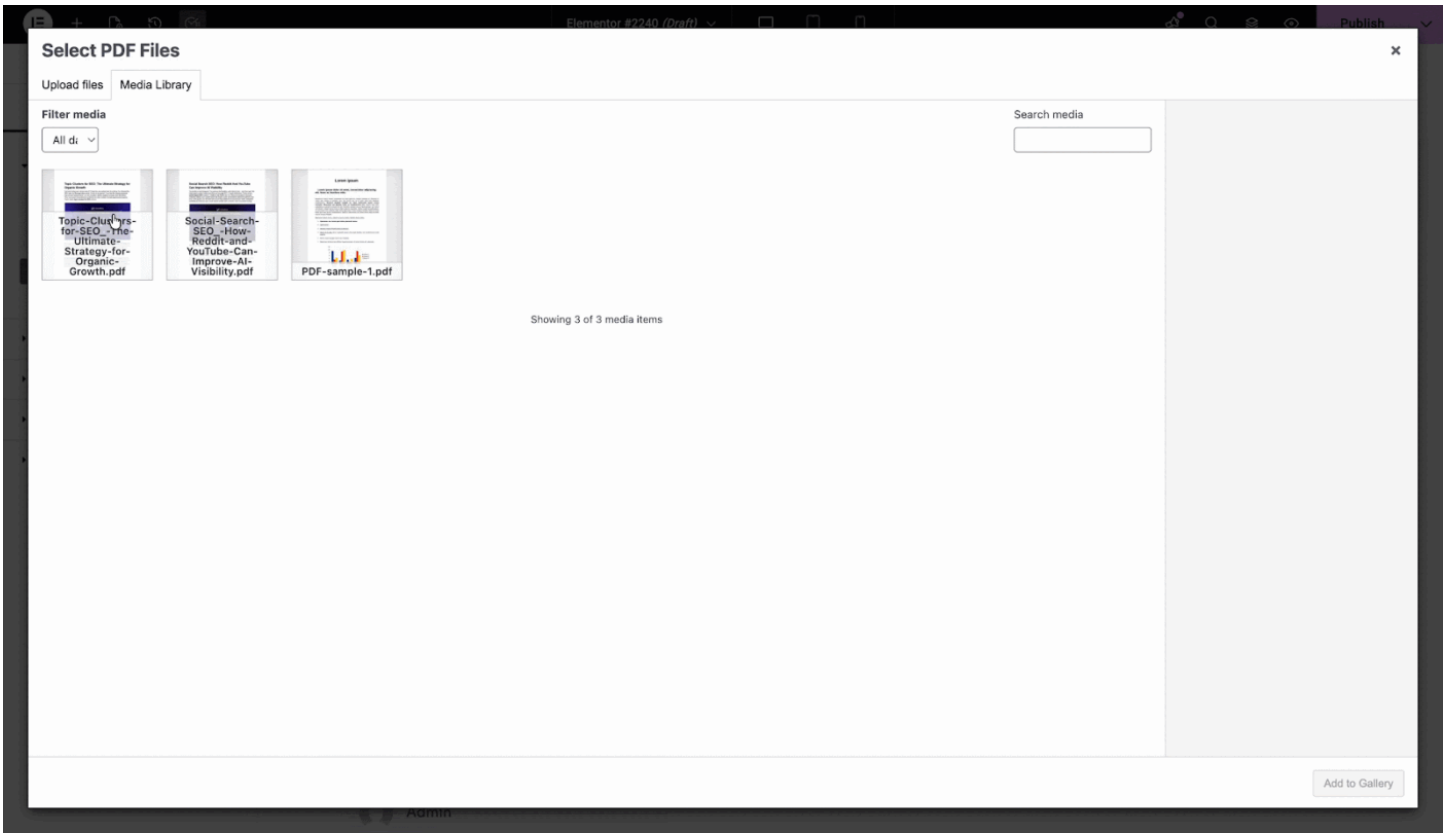

Step 1: Insert the EmbedPress PDF Gallery Widget

First, open the page or post in the Elementor editor where you want to add the PDF Gallery. Search for the **‘EmbedPress PDF Gallery’** widget under the **‘Elements’** tab in the editor’s side panel. Drag and drop this to the preferred location on your page.

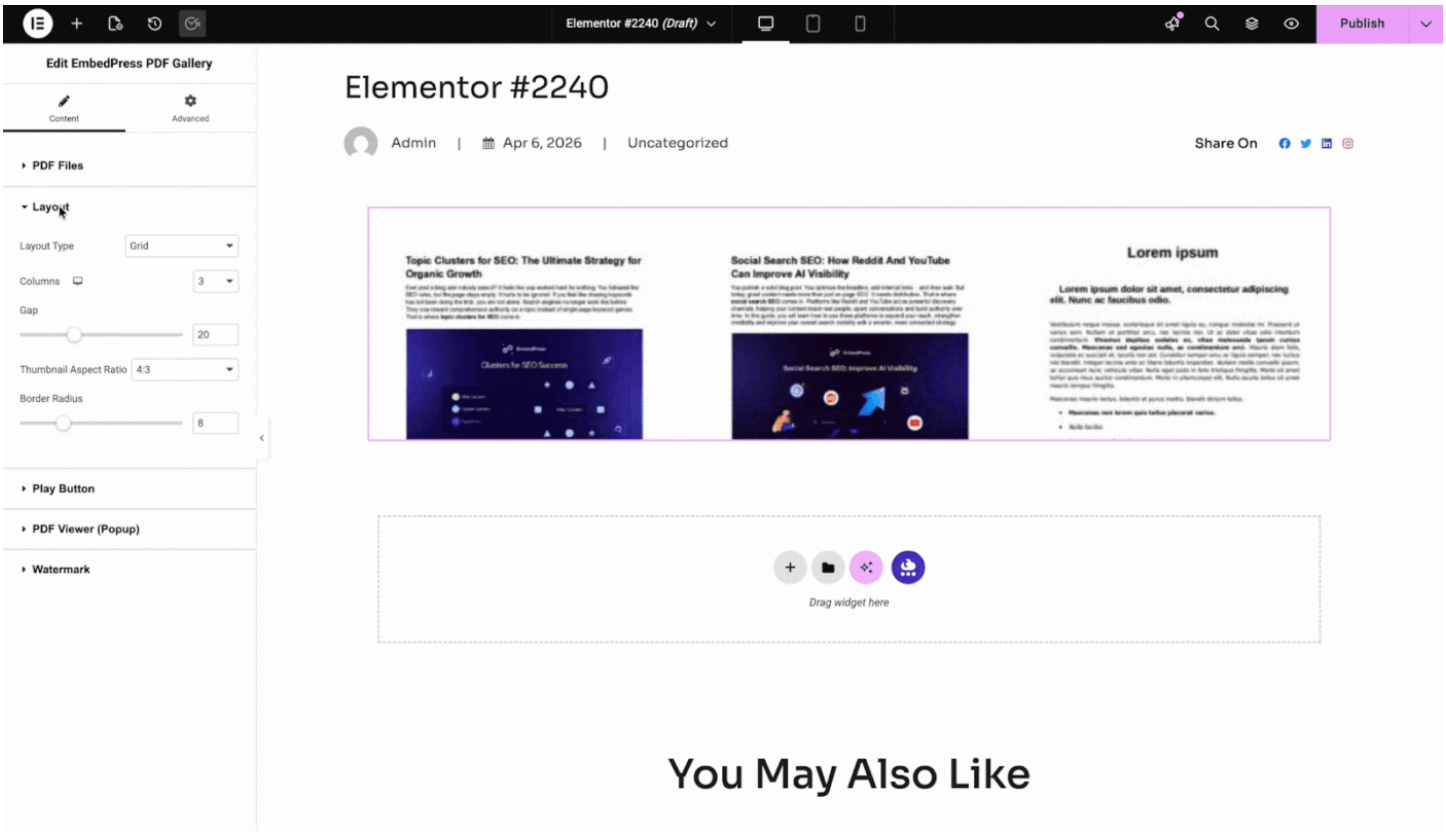

Step 2: Upload Multiple PDFs to the Elementor Editor

From the **‘Content’** tab on the side panel, click on ‘**Add PDF Files**’ to select or upload multiple PDFs from your Media Library. EmbedPress will automatically generate the PDF gallery into your Elementor layout.

Step 3: Edit & Publish Your PDF Gallery

Customize your **Elementor PDF gallery** using the side panel: Select your layout (Grid, Masonry, Carousel, or BookShelf) and adjust the columns, gaps and aspect ratios directly from the Elementor Editor. For the **BookShelf layout**, select your preferred shelf design (Dark Wood, Light Wood, or Glass).

- **Play Button:** You can add a play button on each of the PDFs on hover. It has 3 different icon presets (play, document, eye) with the option to change colors, make it always visible, etc.
- **PDF Viewer (Popup) & Watermark:** Here, you can add some buttons and controls for your PDF gallery viewer, such as draw, copy text, download, zoom in/out, etc. You can also utilize **Custom Thumbnails (PRO)** and protect your documents with a **Watermark (PRO)**.

When you are done, click on **‘Publish’** and preview your fully responsive and functional PDF gallery.

How to Embed a PDF Gallery in Classic Editor, Divi, Beaver Builder & Others

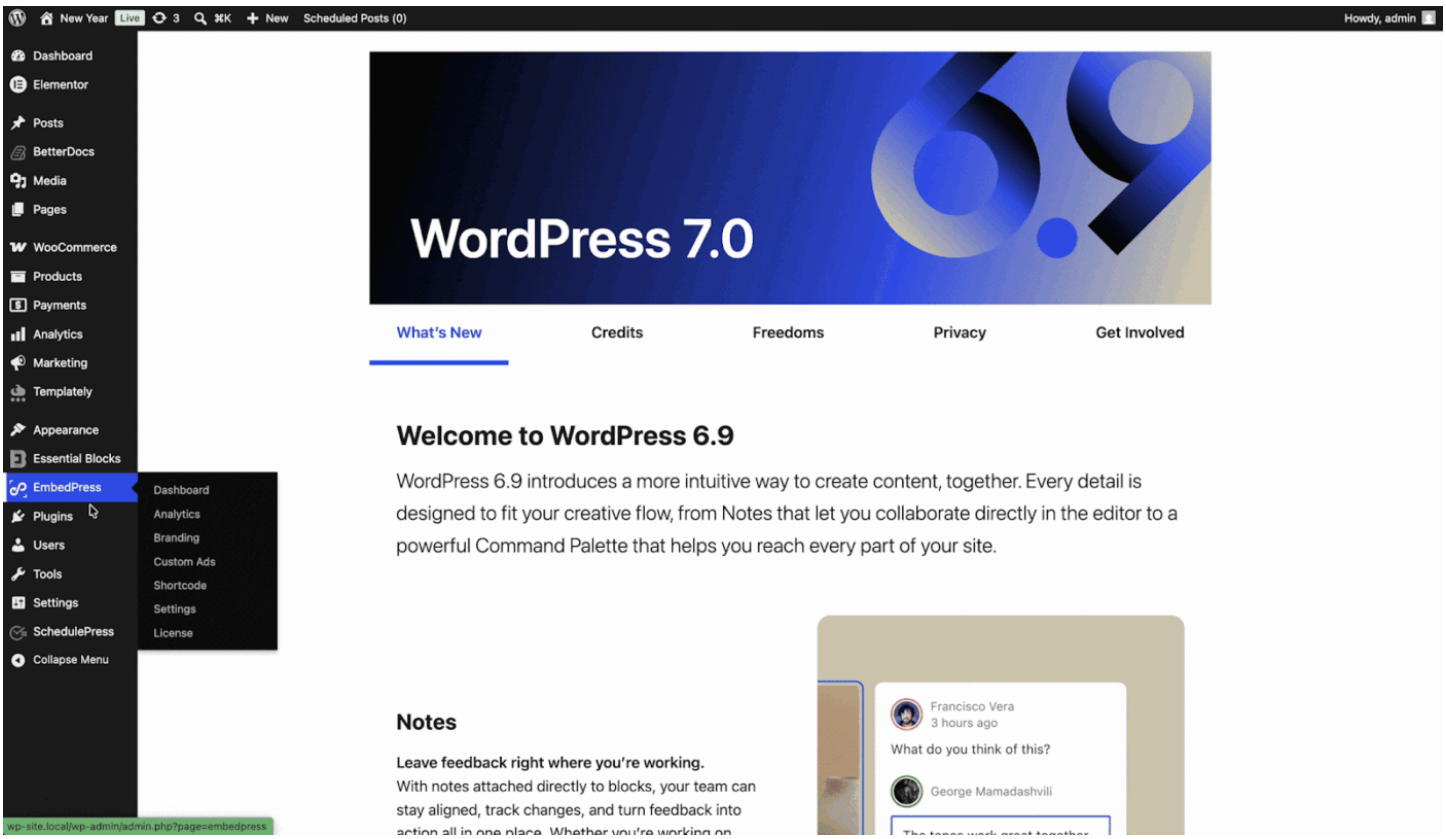

Using the EmbedPress plugin’s exclusive **Shortcode** feature, you can easily embed your PDF galleries in the Classic Editor, Beaver Builder, Divi, Oxygen builder and all other popular page builders. Follow the steps below to learn how.

Step 1: Upload Your PDFs to the Website

From your WordPress dashboard, go to **Media → Add New**. Upload the PDFs you want to include in your gallery or select existing ones and copy their URLs.

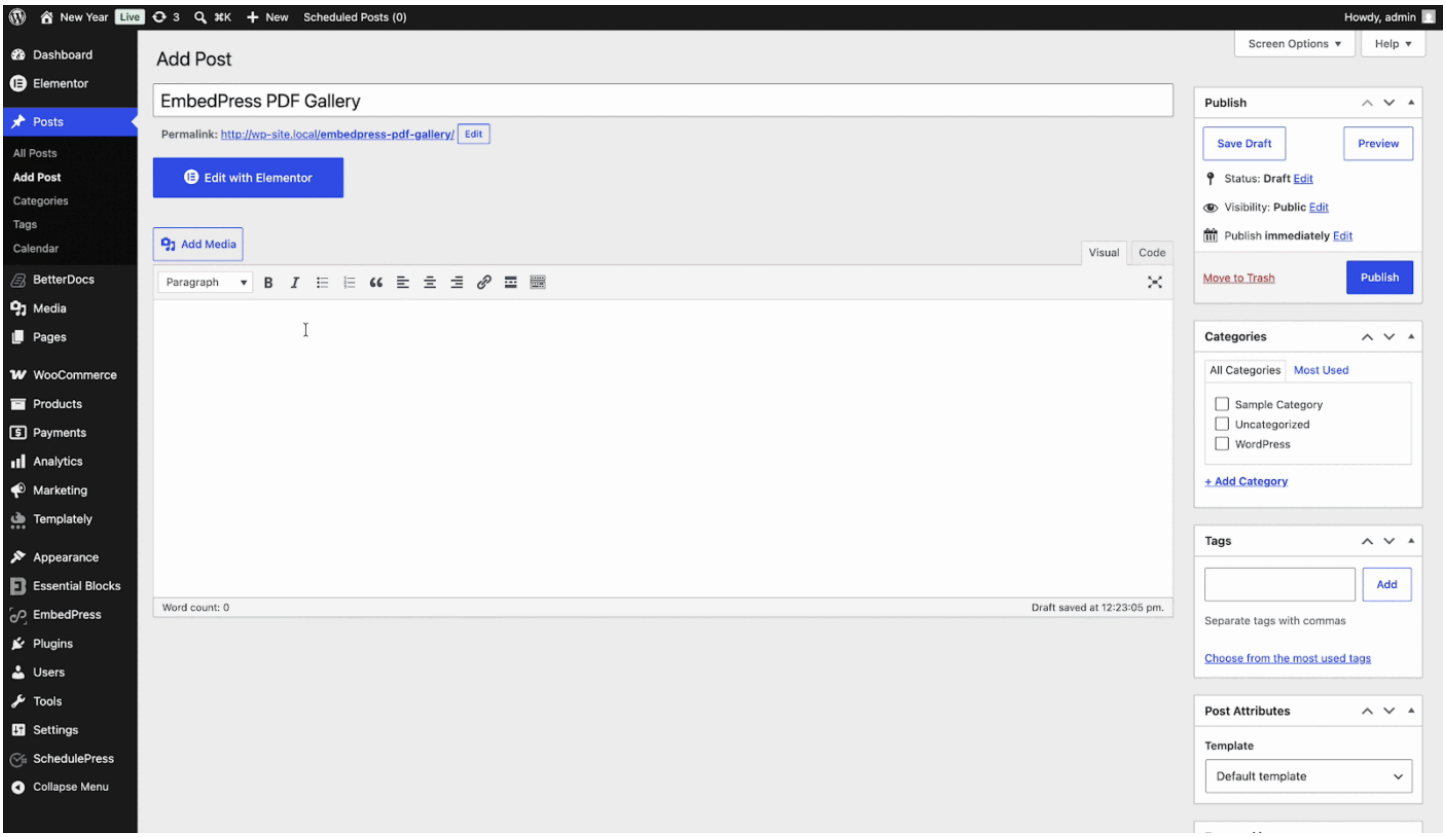

Step 2: Generate the PDF Gallery Shortcode

Navigate to the **EmbedPress** tab in your dashboard. Go to **General → Shortcode**. Select your uploaded PDF URLs to generate a combined gallery shortcode, configure your desired layout (Grid, Masonry, Carousel or Bookshelf) and click on the **‘Generate’** button. Click the **Copy** icon to copy your newly created shortcode.

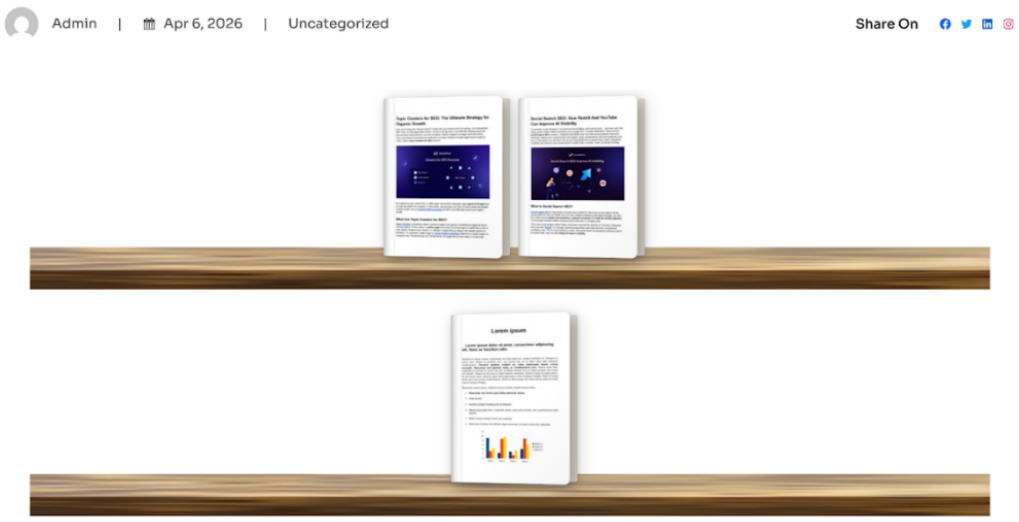

Step 3: Embed PDF Gallery Shortcode

Open a new page or post in the **Classic Editor** (or your preferred page builder), paste the PDF gallery shortcode and **publish** the page. The gallery will be instantly embedded.

Final Outcome

Once you publish a PDF gallery for your documents, here is what it will look like to your visitors.
