Follow the steps below to embed Audiocom audios on your WordPress website.

How to Collect Audiocom Embed URL?

Go to the **Audiocom website** and open the audio item you want to embed. Copy the page URL from your browser’s address bar.

You can also get the URL by tapping the **‘Share’** button available with the audio file. This will open a sharing pop-up, from where you can **copy the direct link** to that Audiocom file.

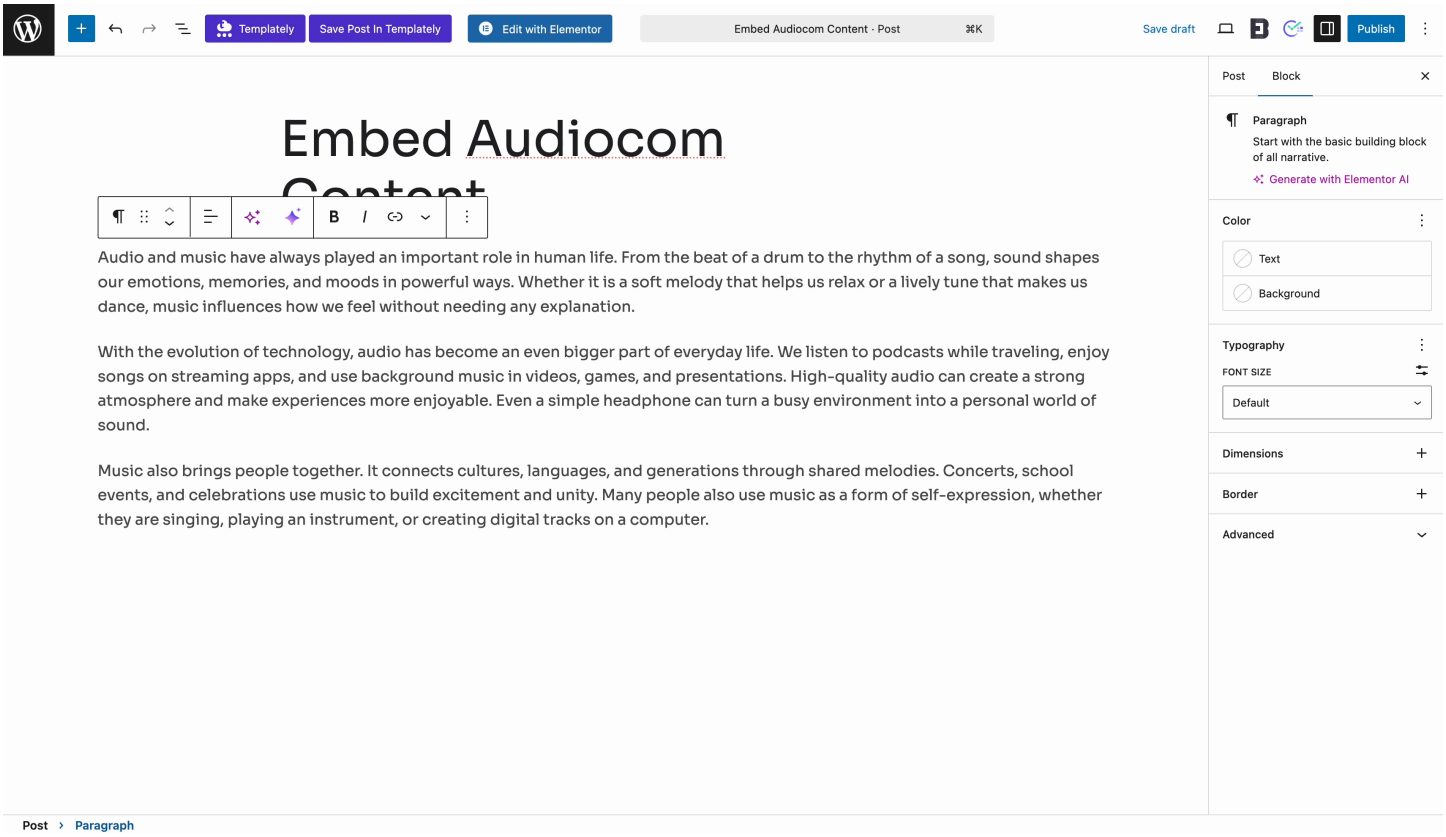

Embed Audiocom Audios Using Gutenberg

Embedding Audiocom files in Gutenberg is simple and takes only a few moments. Just follow the steps below.

Step 1: Insert the EmbedPress Block in Gutenberg

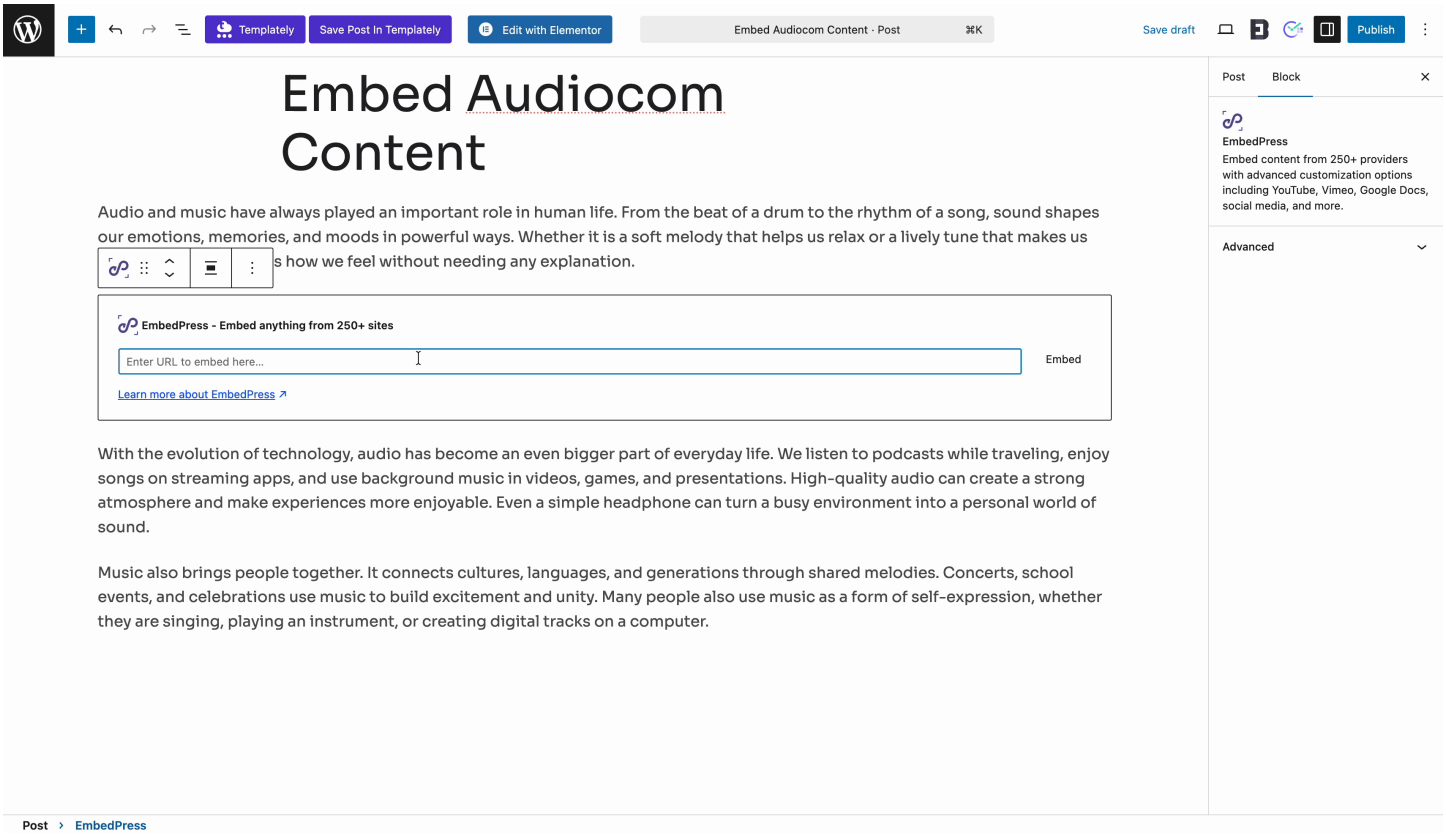

Navigate to your WordPress dashboard and open the post or page where you want to embed the Audiocom audio. Click the **‘+’** icon to add a new block, and search for **EmbedPress**.

Select the **EmbedPress** block to insert it.

Step 2: Paste the Audiocom Link

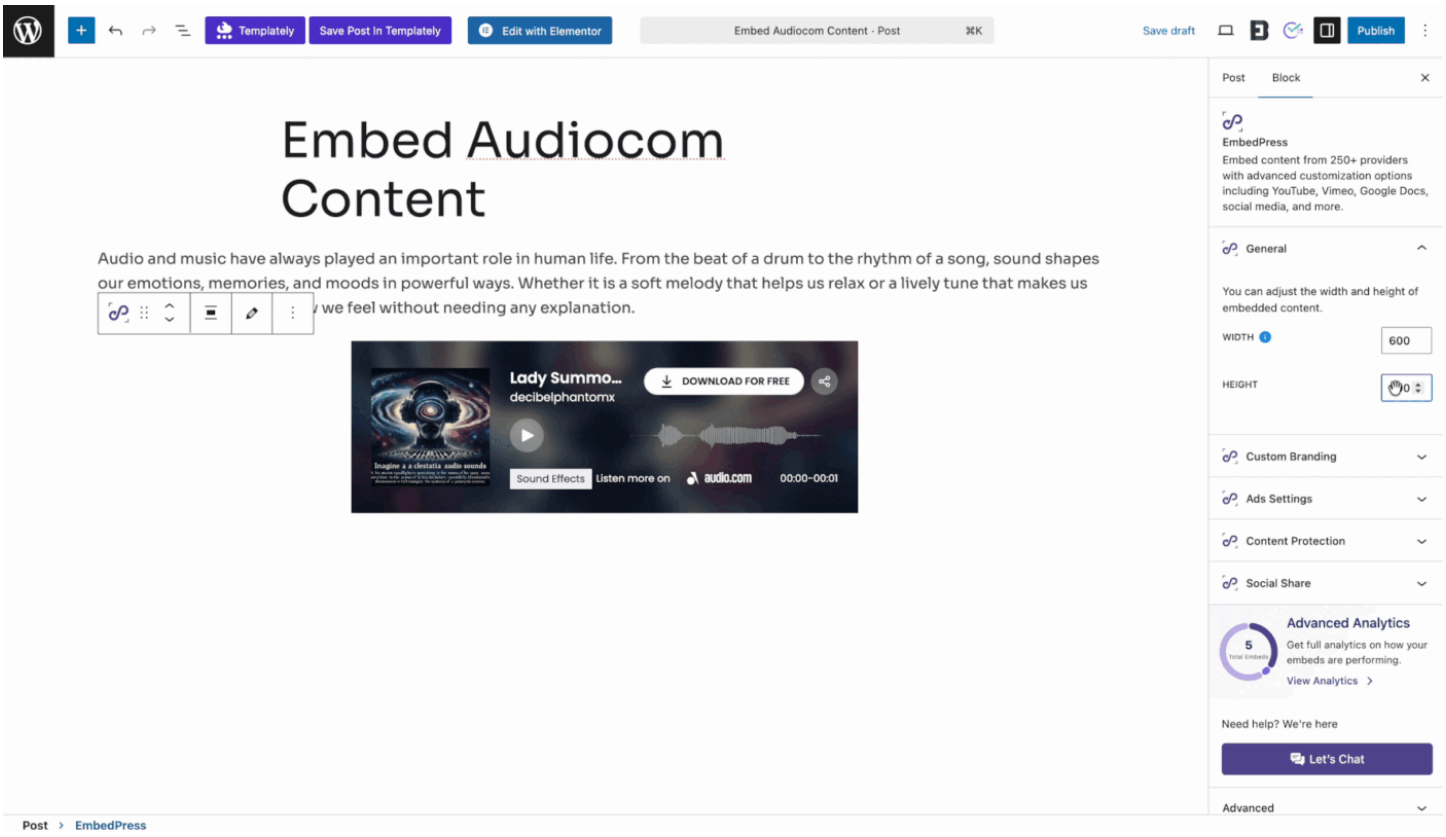

Once the EmbedPress block is added, you will see an input field. Paste your Audiocom file URL there.

The audio player will automatically load and preview inside the Gutenberg editor.

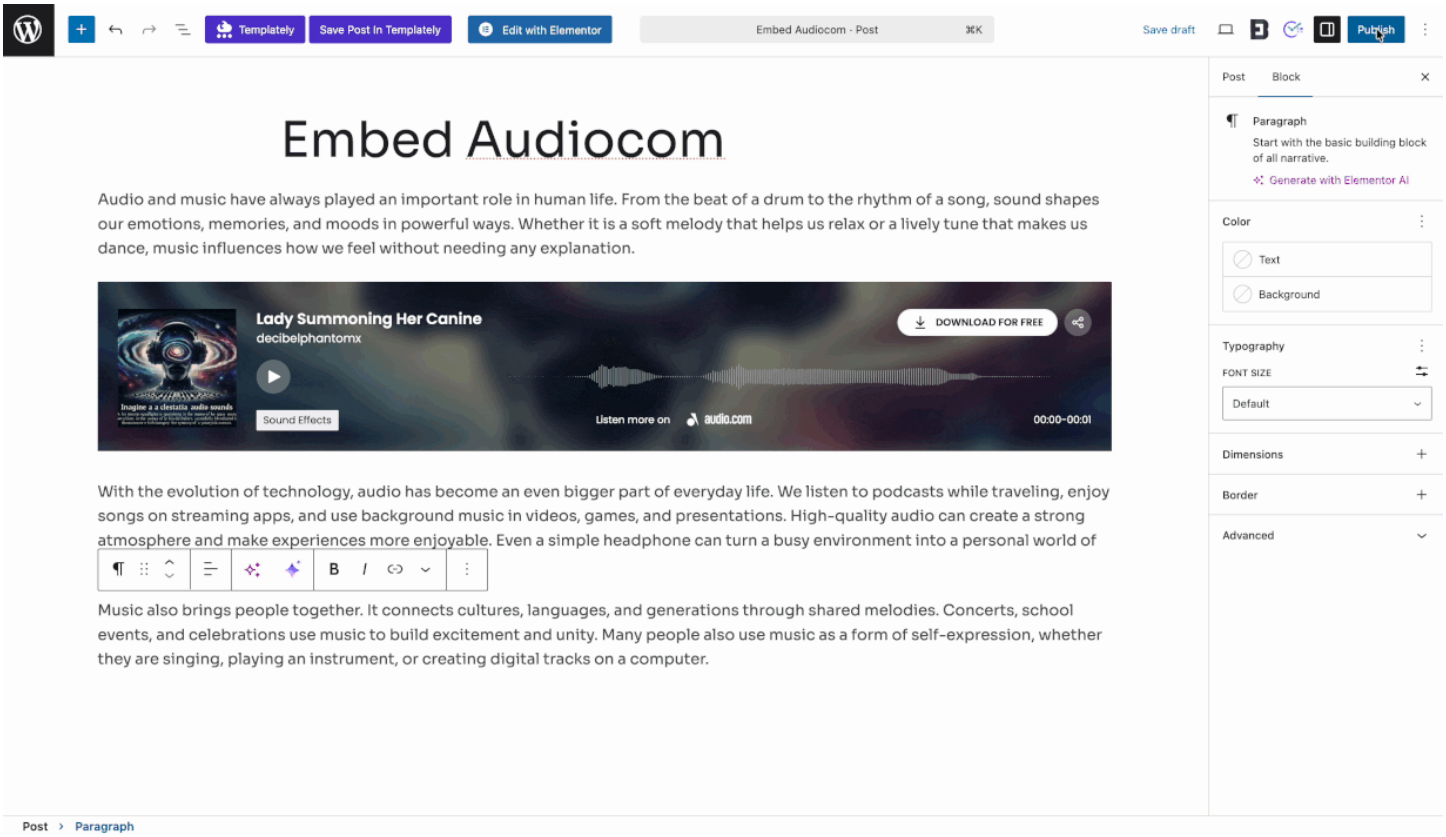

Step 3: Customize Your Embed

Once the embedding is done, you can adjust its height and width to match your page layout. You can also use **custom branding**, **content protection**, **custom ads** and more advanced EmbedPress features on your embedded item.

Step 4: Publish or Update Your Page

If the preview looks good, hit **Publish** or **Update** to make the embedded Audiocom audio live on your website.

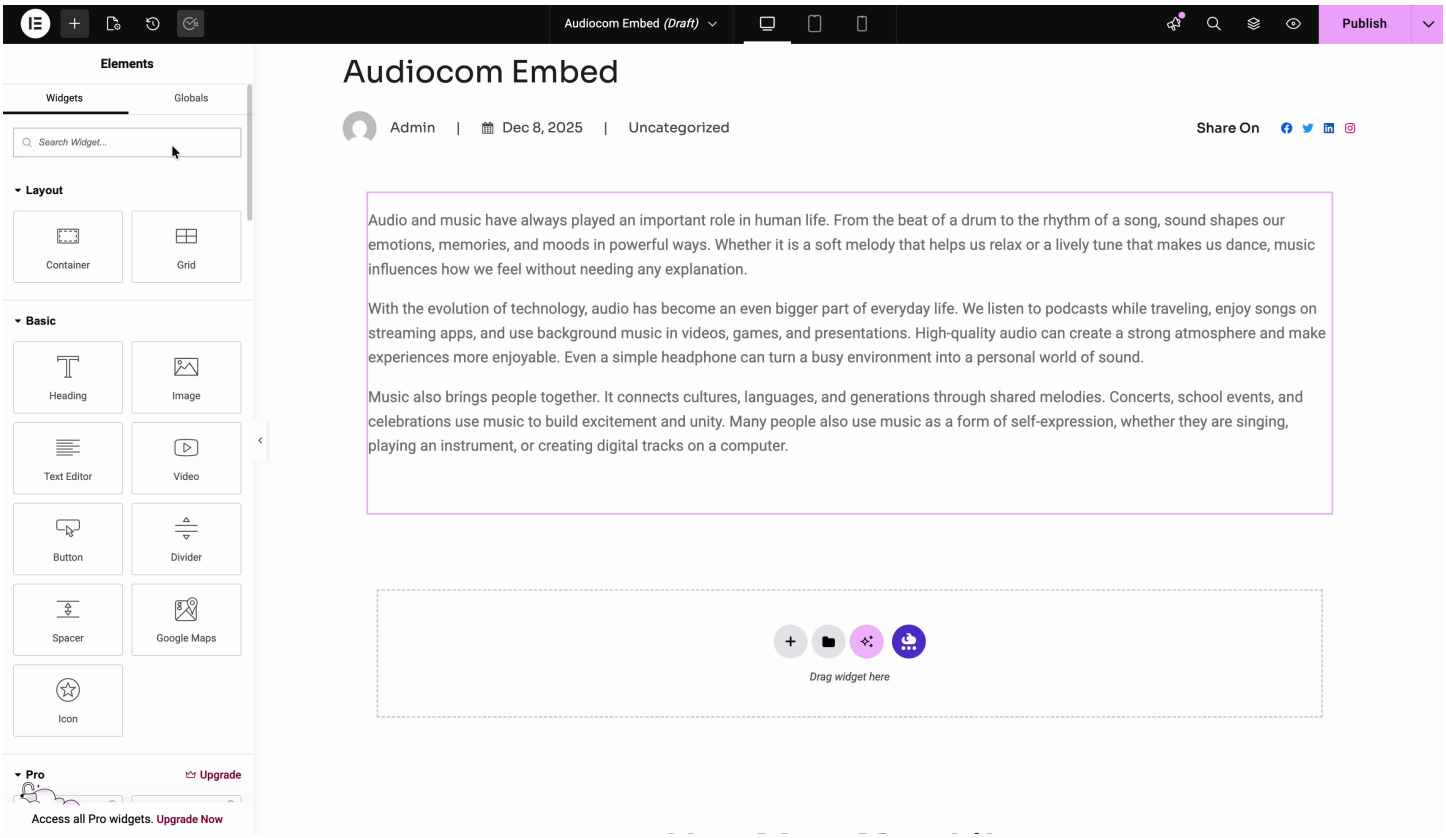

Embed Audiocom Audios Using Elementor

You can also embed Audiocom in **Elementor** using the EmbedPress widget. Follow the step-by-step process below.

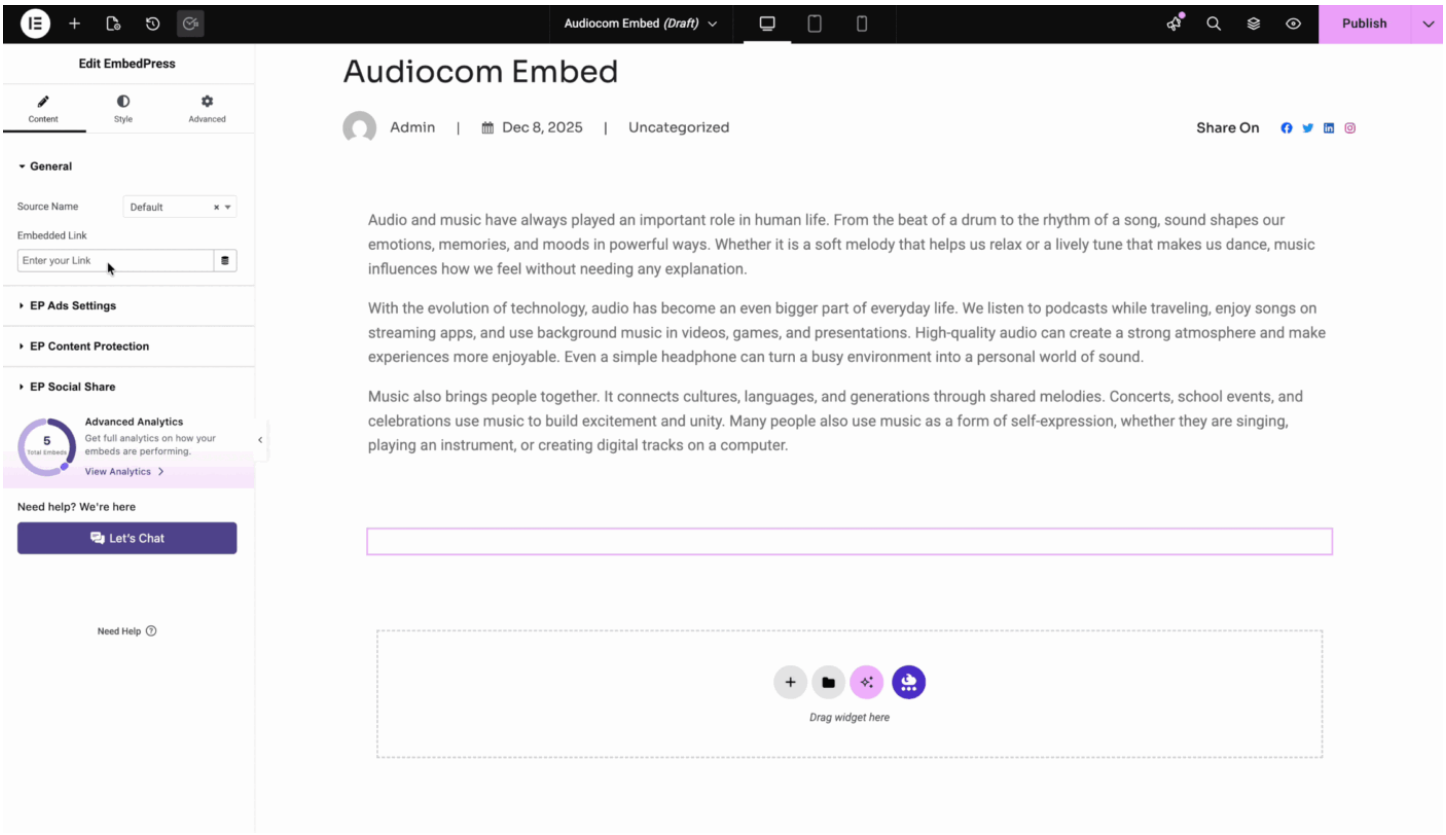

Step 1: Add the EmbedPress Widget

Edit your page with Elementor. From the left widget panel, search for **EmbedPress** and drag the widget onto your page.

Step 2: Paste the Audiocom URL

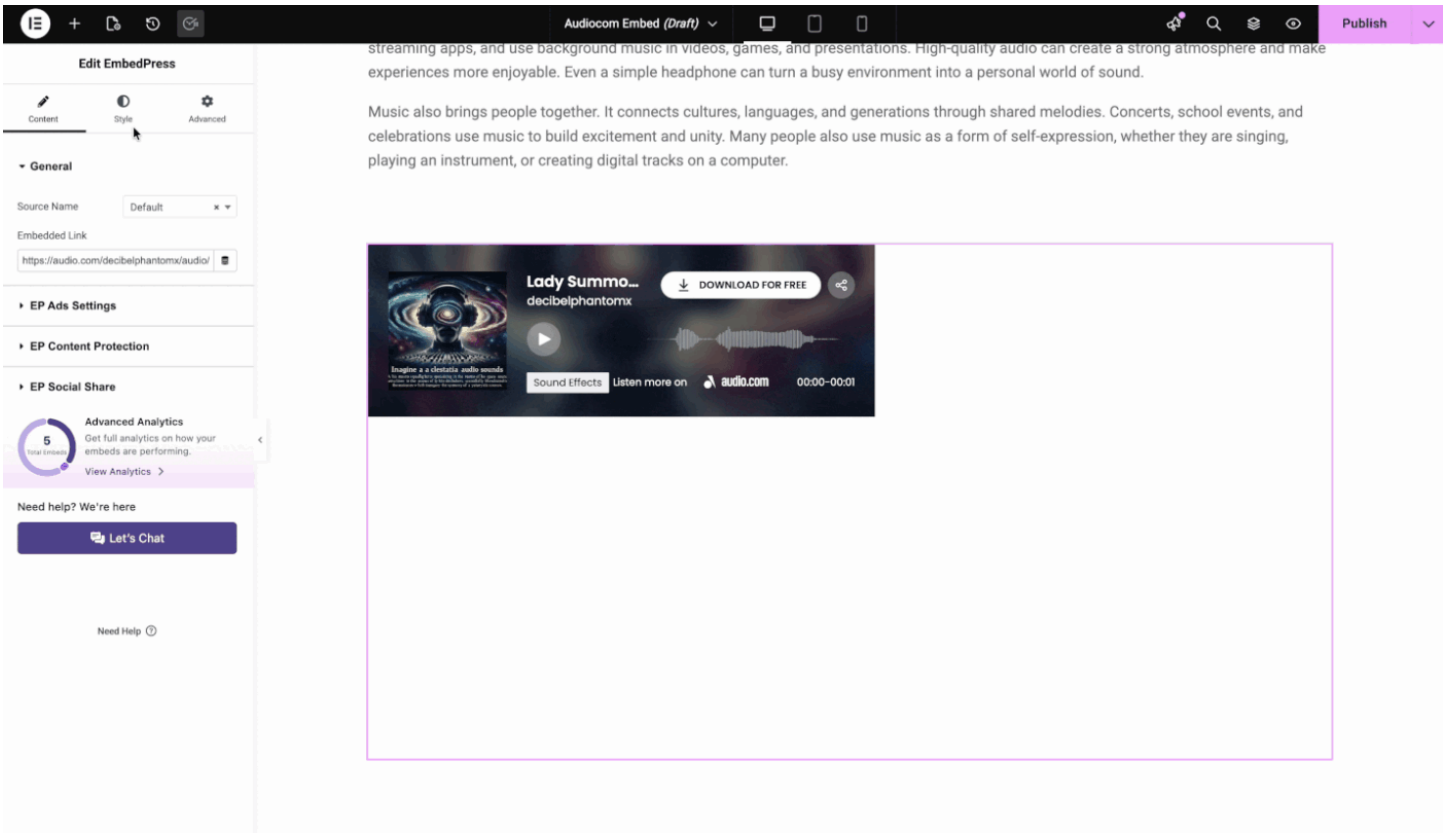

Under the widget's **Content** settings, paste your Audiocom link into the URL field. The Audiocom audio player will instantly appear in the Elementor preview window.

Step 3: Customize Your Embed

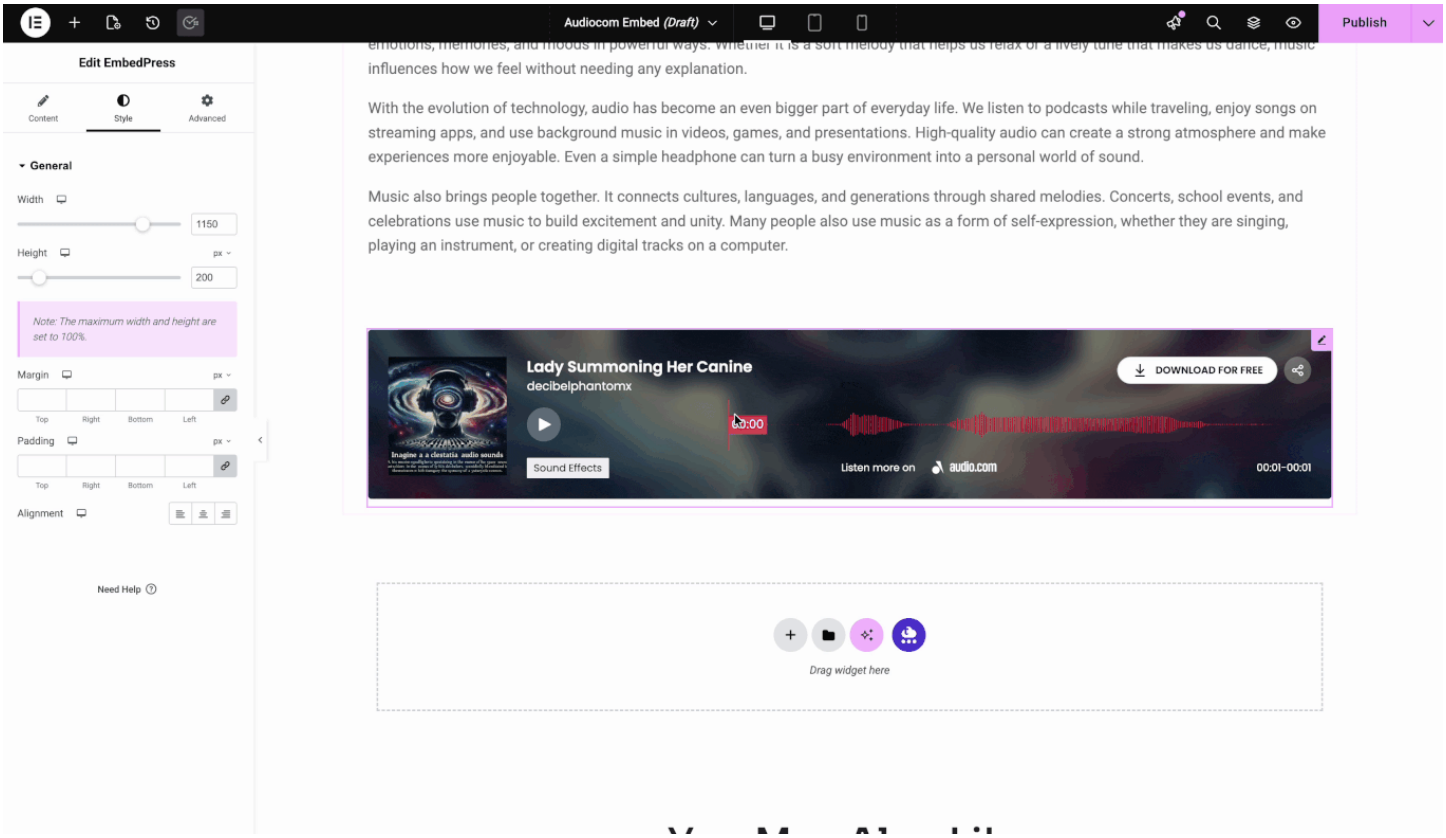

Once the embedding is done, you can adjust its height and width from the **Style** tab.

You can also use **custom branding**, **content protection**, **custom ads** and more advanced features from the **Content** tab on your embedded item.

Step 4: Publish Your Elementor Page

If everything looks perfect, click **Publish** to make your embedded Audiocom file visible on the frontend.

Embed Audiocom Audios Using Classic Editor

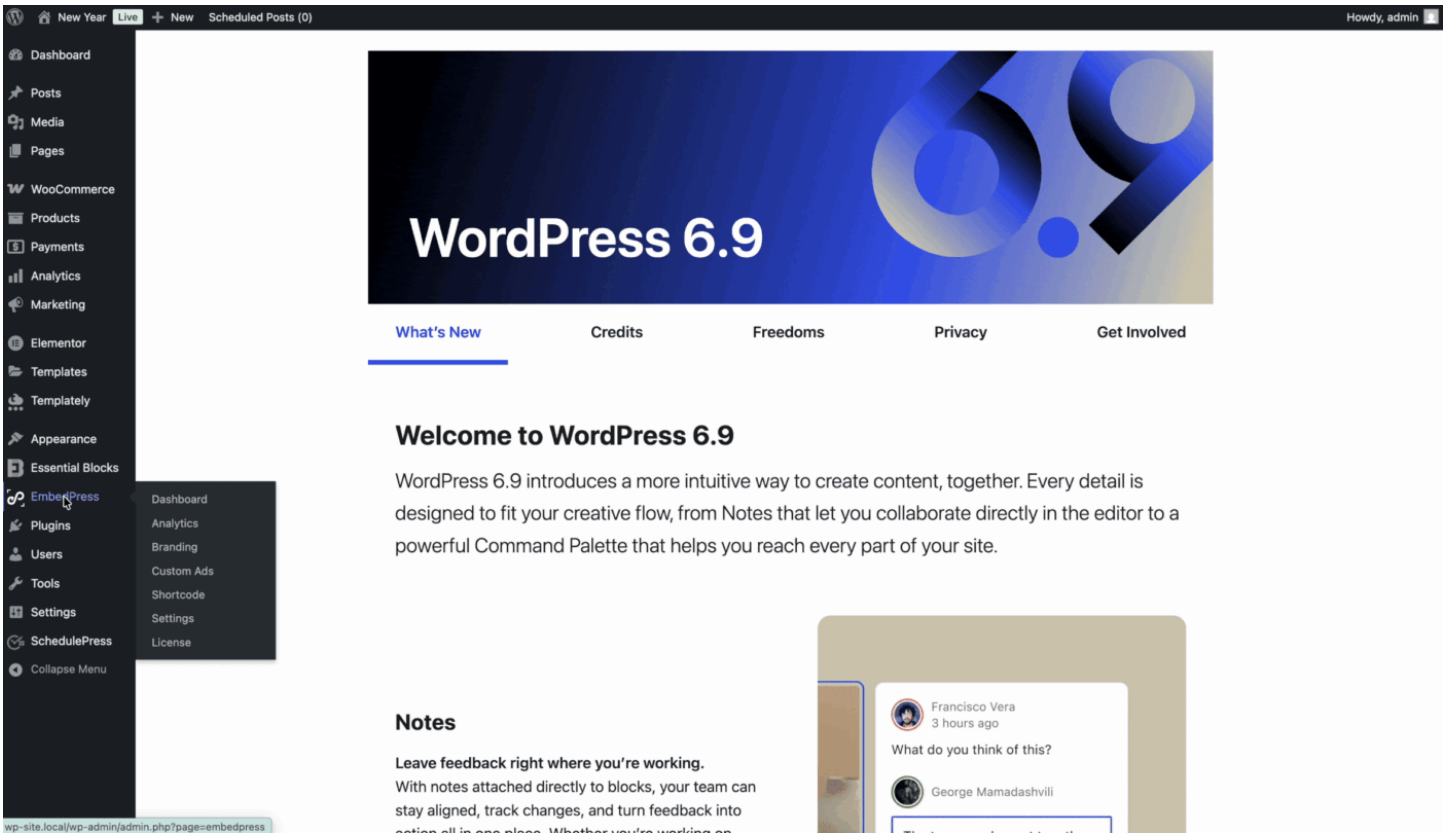

EmbedPress allows you to embed Audiocom content with your Classic Editor as well, using the **shortcode** feature. Follow the steps to learn how you can embed Audiocom using the Classic Editor.

Step 1: Generate EmbedPress Shortcode

Go to your **EmbedPress plugin dashboard** and click on the **‘Shortcode’** option.
From there, you can access the tools for generating custom shortcodes and embed them in any WordPress editor.

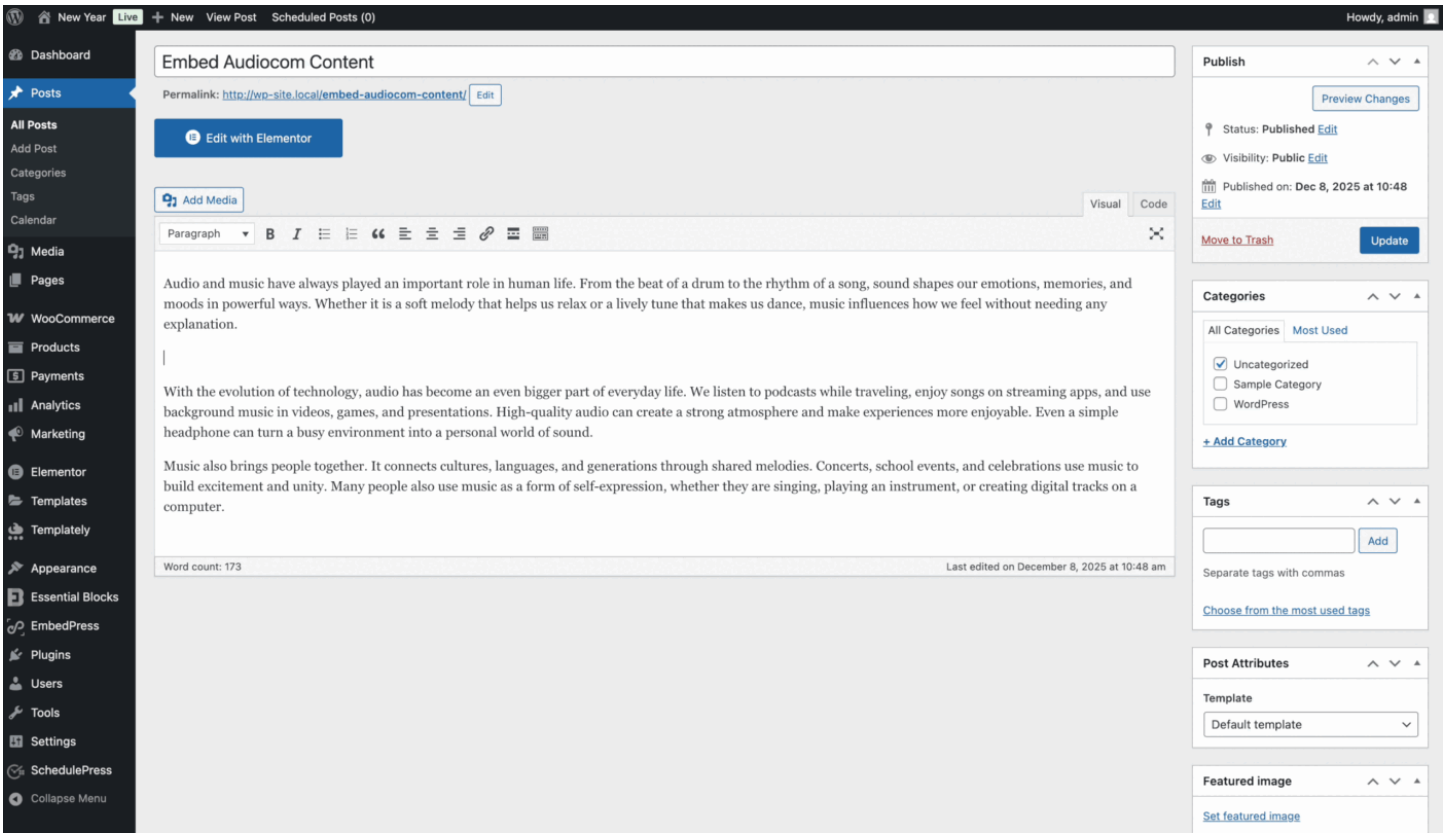

Then paste the collected Audiocom content URL in the input field and click on the **‘Generate’** button.

EmbedPress will automatically generate a shortcode of the source content. Click on **‘Copy Link’** and you will be ready to embed it in any WordPress page builder.

Step 2: Embed with Shortcodes on WordPress Editors

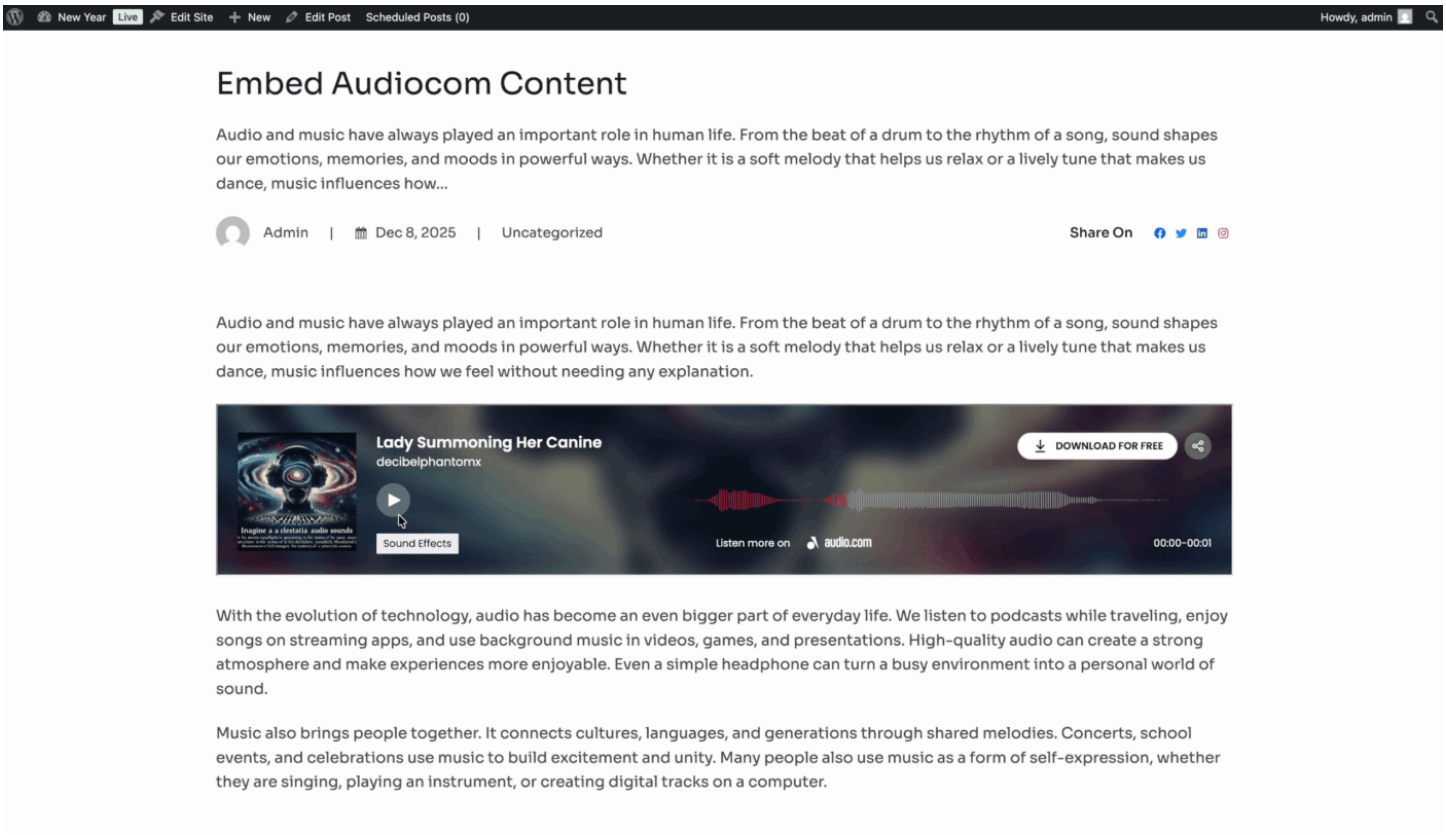

Open your preferred posts or pages on the WordPress Classic Editor. Paste your Audiocom content URL (or the generated shortcode) into the content area.

Within a few moments, your link will automatically be transformed into an embedded audio player from Audiocom.

Final Outcome

Finally, click on the **Publish** or **Update** button and view the page to see the Audiocom audio content embedded on your site.

This is how easily you can display your Audiocom audio using Elementor, Gutenberg or Classic Editor.
