How to Easily Embed Google Maps in WordPress

Embed Sources · https://embedpress.com/docs/embed-google-maps-wordpress/

With **EmbedPress**, you can **embed Google Maps** embeds to WordPress, using just a URL.

Google Maps is an enormously popular service and, by some counts, is the most popular smartphone app in the world. People use Google Maps to show location information for their businesses, events, and much more.

Google Maps embeds are available, but they're not easy to use via normal methods. EmbedPress is different. With EmbedPress, you don't have to mess around with embed code. All you need is the Google Maps URL.

How to Embed Google Maps In Gutenberg With EmbedPress

EmbedPress is a useful plugin that improves the capabilities of WordPress and allows users to embed videos, documents, audio files, and more. **Install EmbedPress** on your WordPress site and it will become far more powerful and efficient.

Click here to find EmbedPress on WordPress.org.

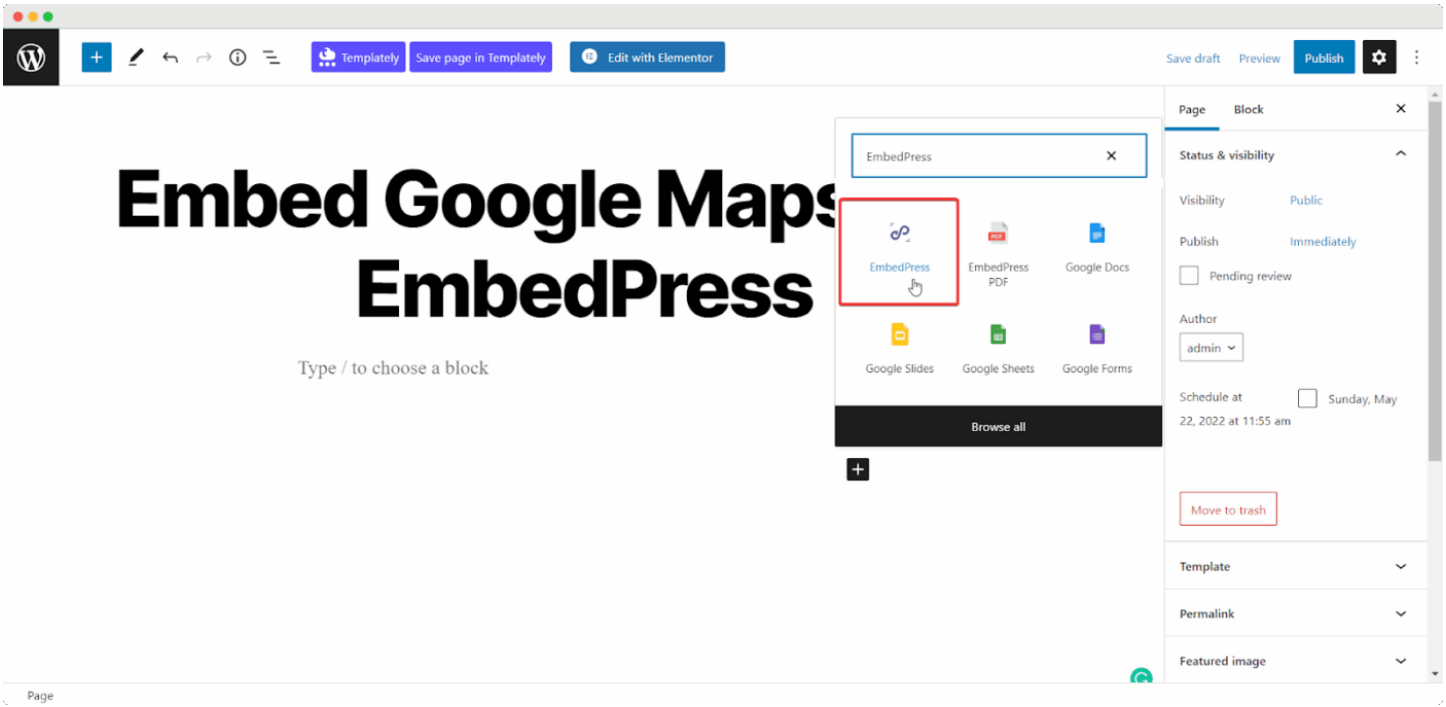

Step 1: Collect Your Google Maps URL

Before you can embed your Google Maps into WordPress, you need to get the URL for the map. Go to the **Google Maps** homepage. Find the map you want to embed, Copy the URL of this page.

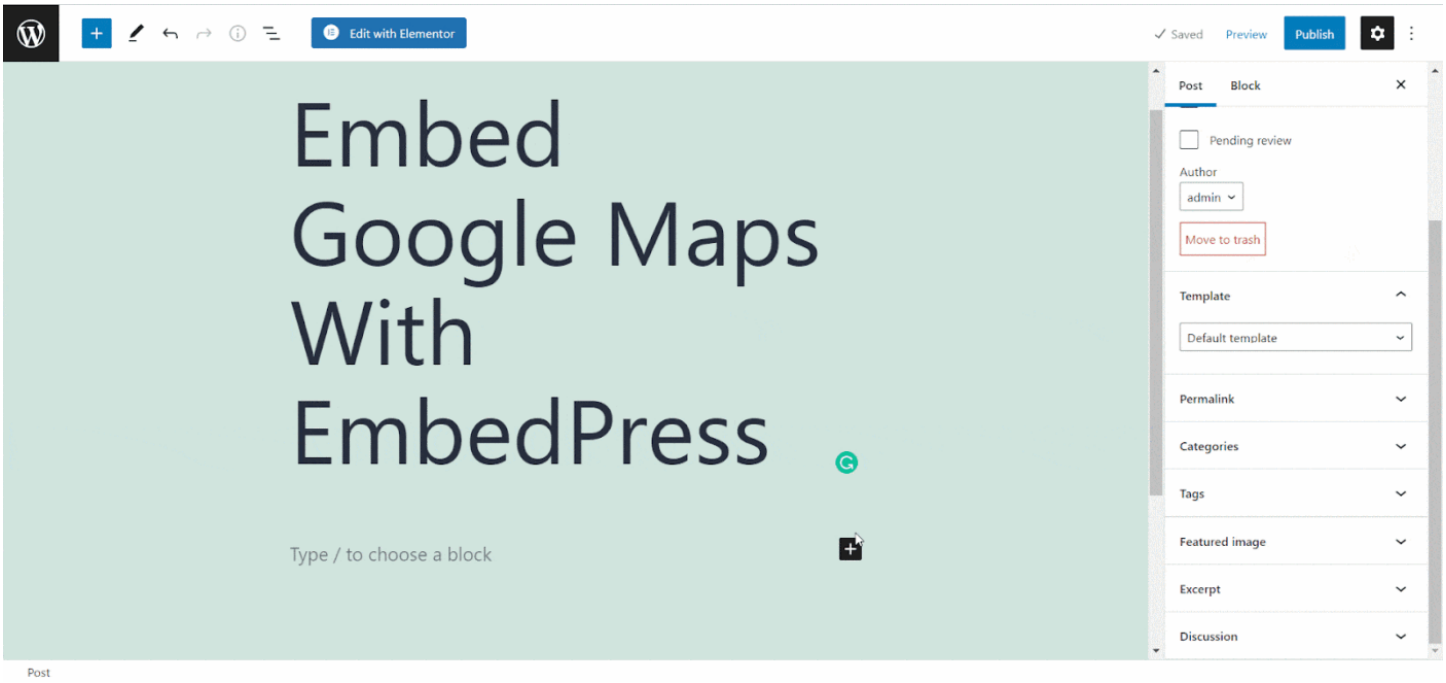

Step 2: Embed Google Maps On Gutenberg

Now that you have the Google Maps URL, you can add it to WordPress. Go to your WordPress site and edit a post or page. Click the **'+'** icon in the top-left corner of the editing area and search for the **'EmbedPress'** block.

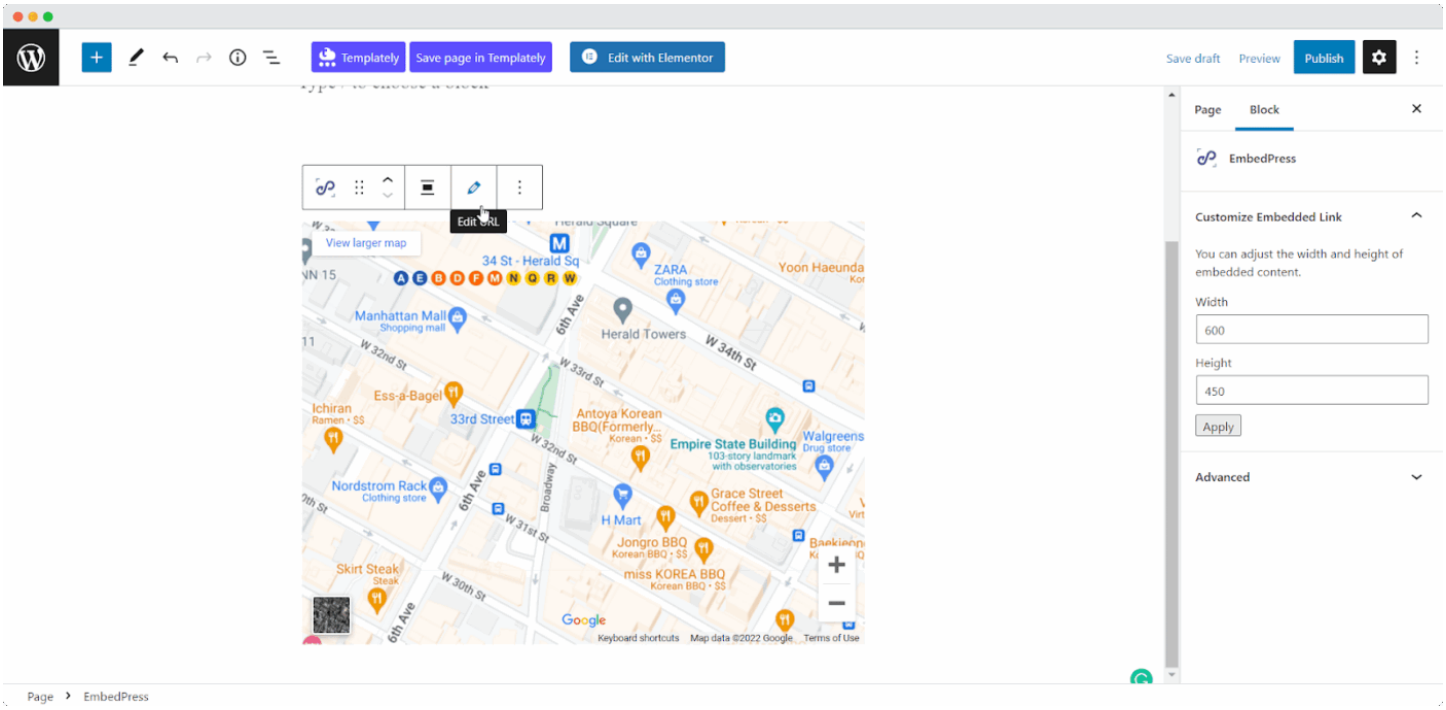

Enter the URL for your Google Maps. Your URL will automatically be transformed into an embed of your Google maps.

Step 3. Edit Your Google Maps Embed

You can easily edit your embedded Google Maps using EmbedPress. Just hover over the embed, and a '**Pencil**' icon will appear. This icon will show **"Edit URL"** if you hover over it. Click the pencil and you will be able to edit your embed:

Final Outcome:

Now, click on the '**Publish**' button and your Google map will be embedded for visitors to see, as in the image below:

How to Embed Google Maps In Elementor With EmbedPress

You can **use EmbedPress with Elementor** to embed Google Maps in your WordPress website. Follow these steps to embed any Google Map on your website using the Elementor Editor.

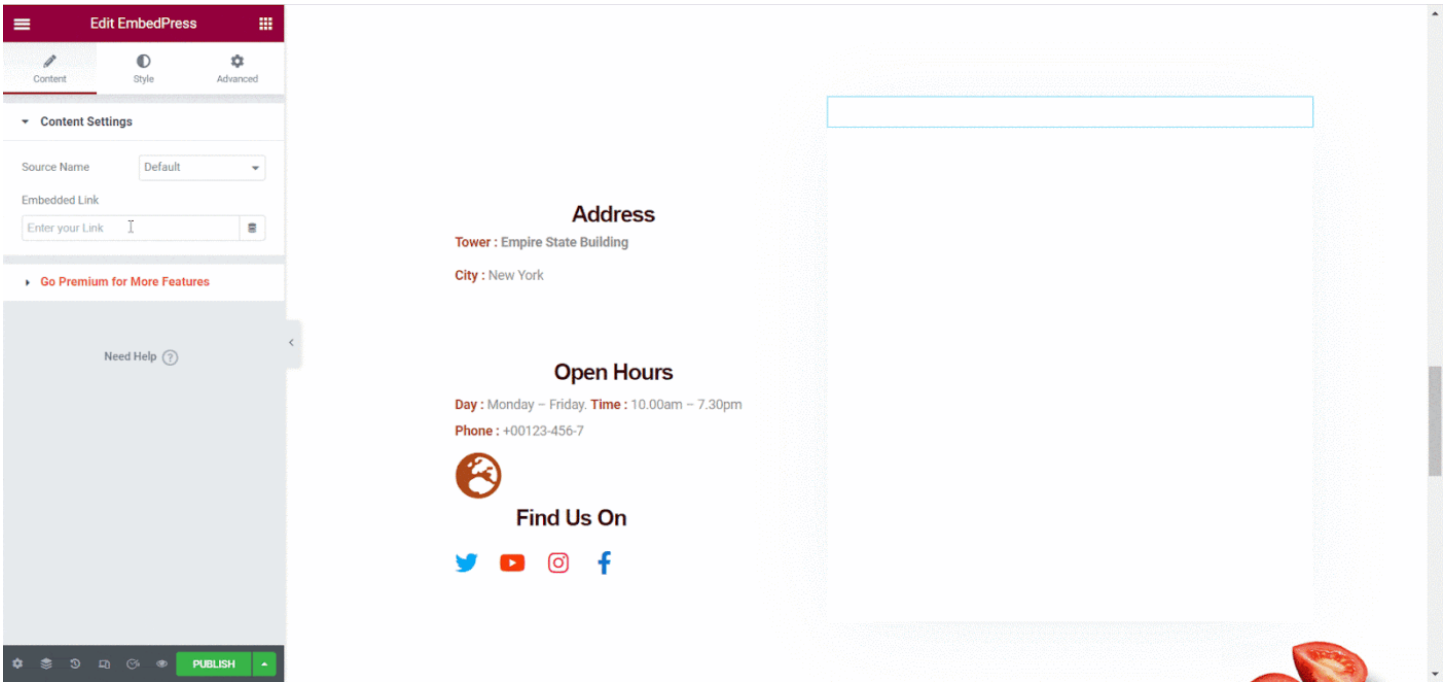

Step 1: Select The EmbedPress Widget

First, create a new page from your WordPress dashboard by navigating to **Pages→ Add New** and then clicking on the blue **‘Edit With Elementor’** button. Then search for the **‘EmbedPress’** element from under the ‘**ELEMENTS**’ tab and drag and drop to the section where you want to embed Google Maps.

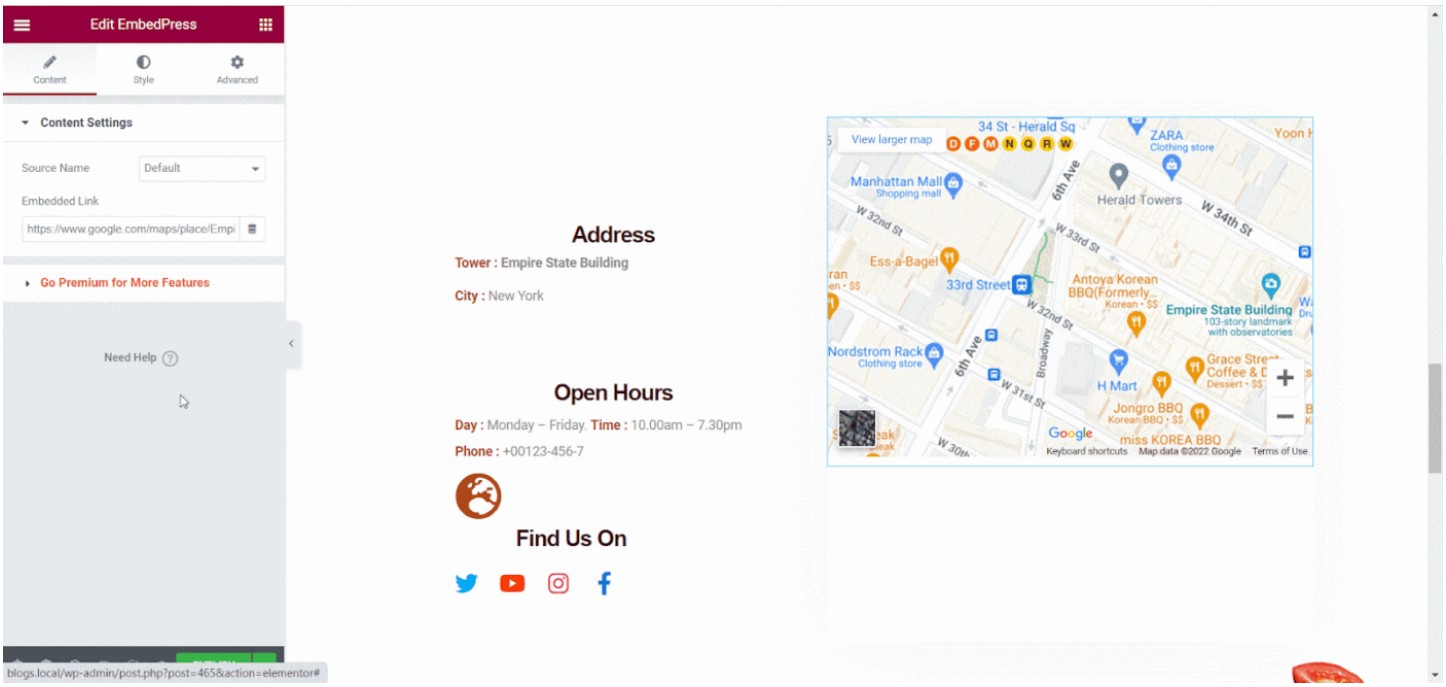

Step 2: Embed Google Maps URL In Elementor

Now click on the **‘Content’** tab in Elementor Editor and enter the URL of your Google Maps embedded in the **‘Embedded Link’** section as shown below.

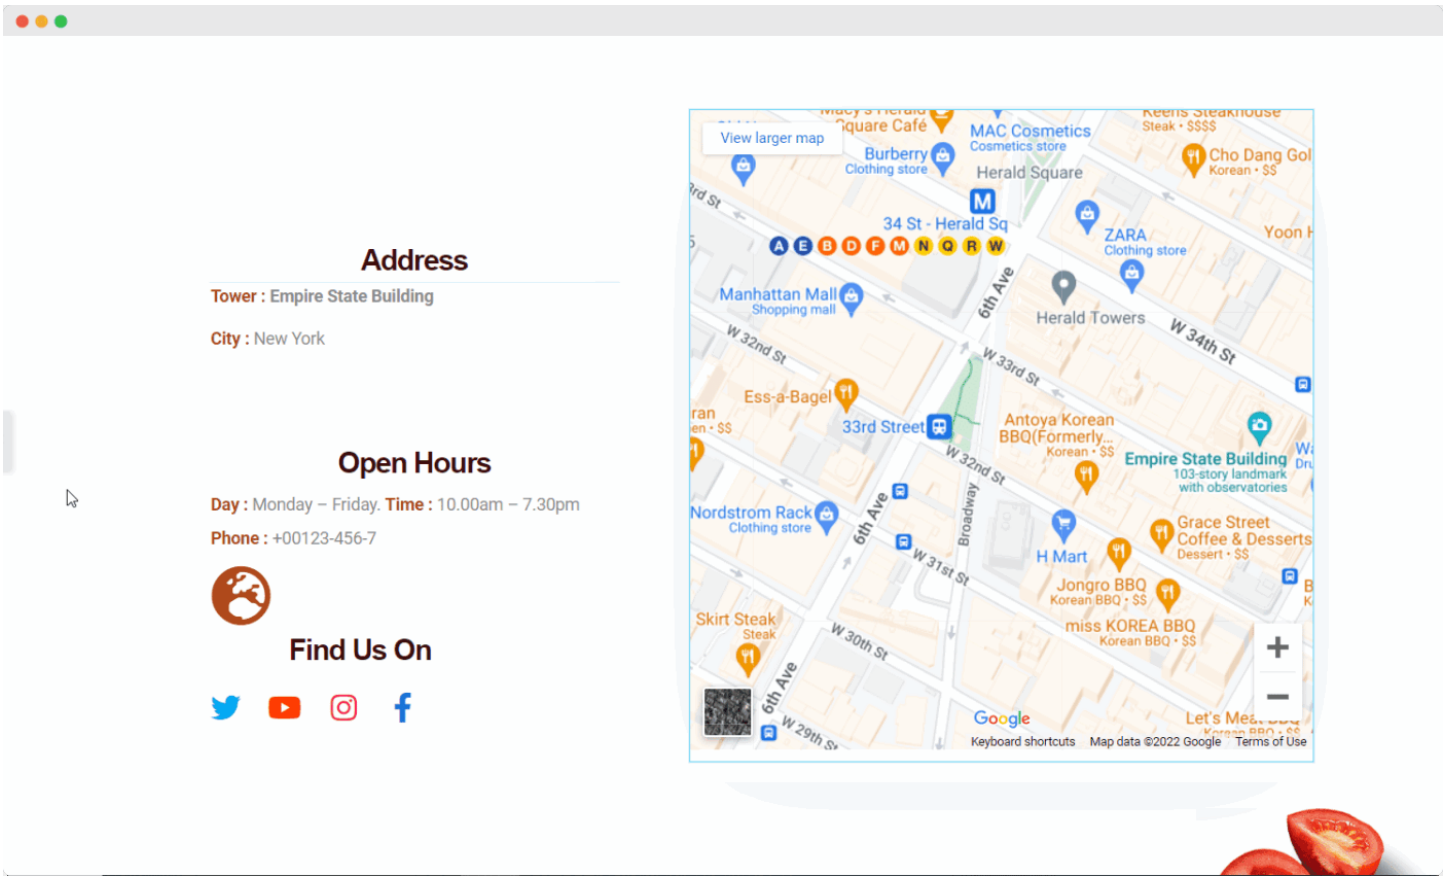

Step 3: Style Your Google Maps Embed In Elementor

Head over to the **‘Style’** tab and play around with the settings there to edit your Google Map embed in Elementor using EmbedPress.

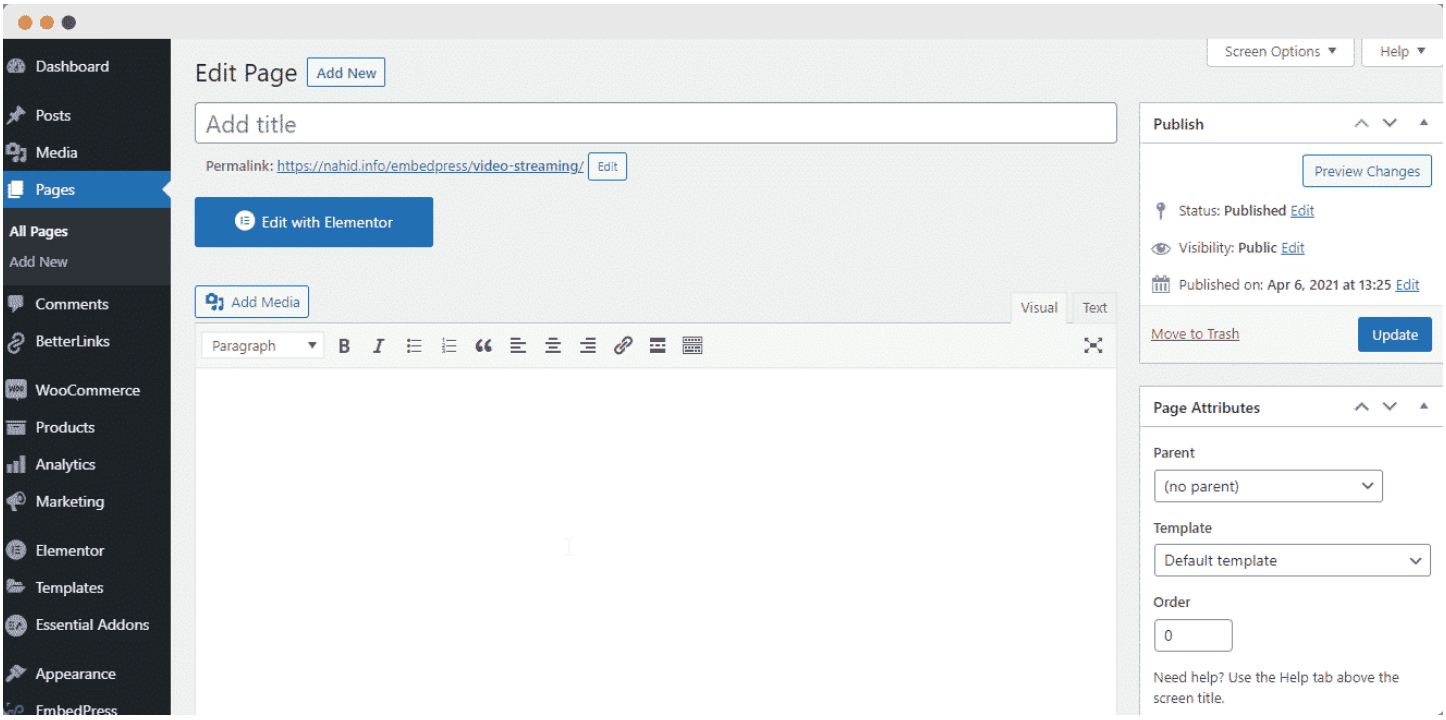

Final Outcome

When you are done, click on the **‘Publish’** button to save your changes. Your Google Maps will be automatically embedded on your website once you publish the page.

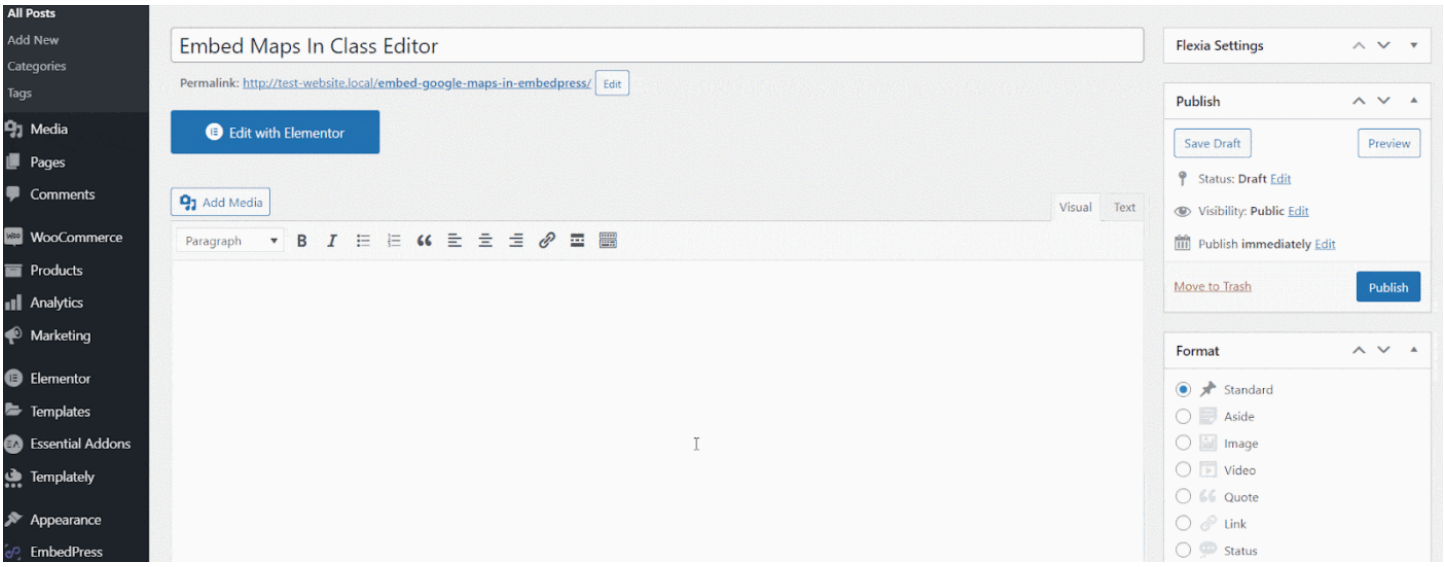

How to Embed Google Maps In Elementor With EmbedPress

Open up your preferred posts or page's on **WordPress Classic Editor**.

Add your Google Maps URL into the content area, with the **“Visual”** tab enabled. You will see a purple background with a **“Loading your embed”** message. And within a few moments, your URL will automatically be transformed into an embed of your Google Map.
