How to Embed LinkedIn Posts in WordPress

Embed Sources · https://embedpress.com/docs/embed-linkedin-posts-in-wordpress/

EmbedPress allows you to use just a URL to **embed LinkedIn posts** on a WordPress website. LinkedIn is the world's most popular professional network. Many WordPress users want to share LinkedIn posts on their sites. All you need is the LinkedIn post URL with EmbedPress.

Embed LinkedIn Posts on WordPress Websites

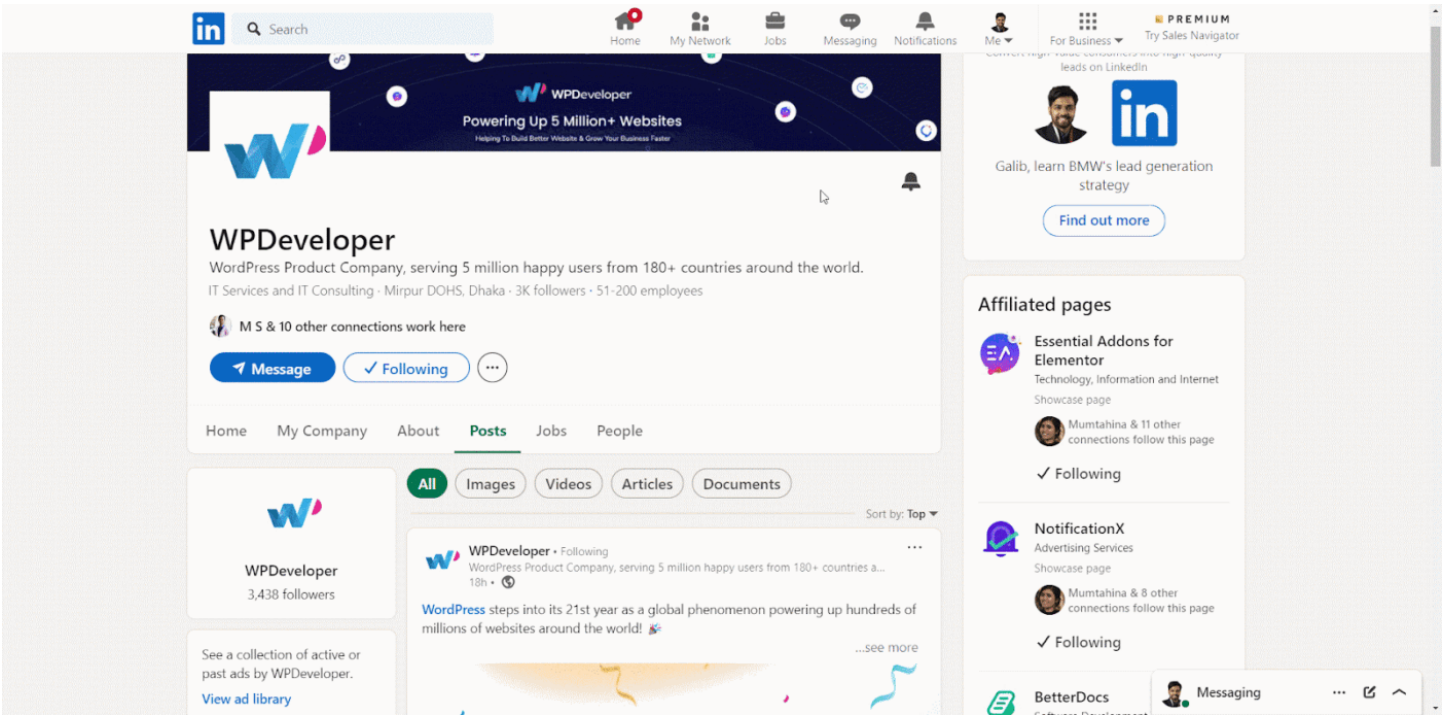

EmbedPress is completely compatible with popular page builders like Gutenberg, Elementor, etc. Let's find out how to embed LinkedIn posts into your WordPress site in Gutenberg, Elementor, etc, using EmbedPress.

How to Collect Your LinkedIn Post URL?

First, log in to your **linkedin** account. Select any post you like to embed on your WordPress site. The image below gives an example post:

Step1: Save Selected LinkedIn Post

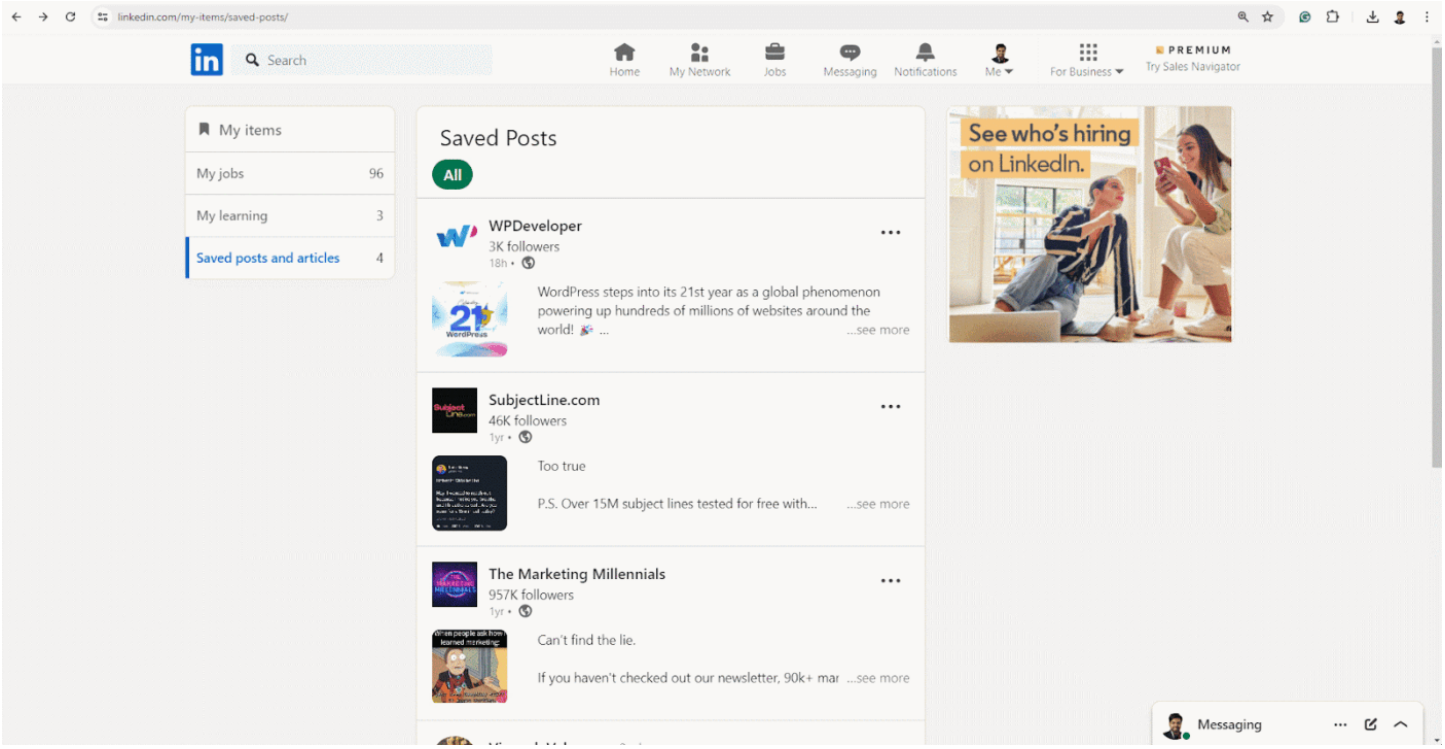

Click on the three dots on the top left of your selected post, then choose '**Save**', and a popup will appear in the bottom left corner. There click on **'view saved post**'.

Step 2: Copy the Post URL

In all saved post lists, click on your selected post to open it, and **copy page URL** to embed this post.

Now, you have the **LinkedIn post URL** to embed on your WordPress site.

How to Embed LinkedIn Posts in Gutenberg?

Gutenberg is WordPress's default page editor and one of the tending ones. You can easily embed LinkedIn posts in Gutenberg Editor by following the steps below:

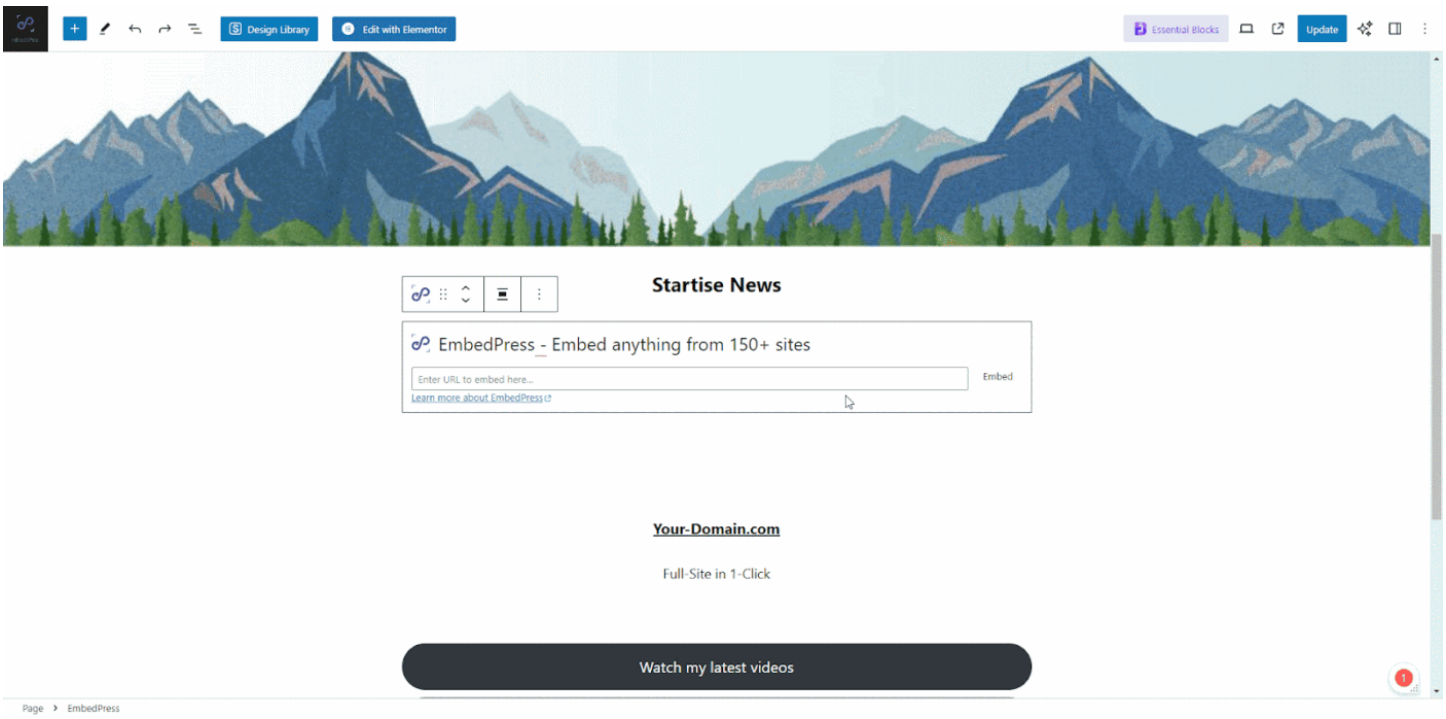

Step 1: Insert EmbedPress Block

Open the Gutenberg page editor by clicking on '**Edit Page**' from the wp-admin bar. Click on the '**+**' icon, then search '**EmbedPress**' and drag & drop the EmbedPress block to the page.

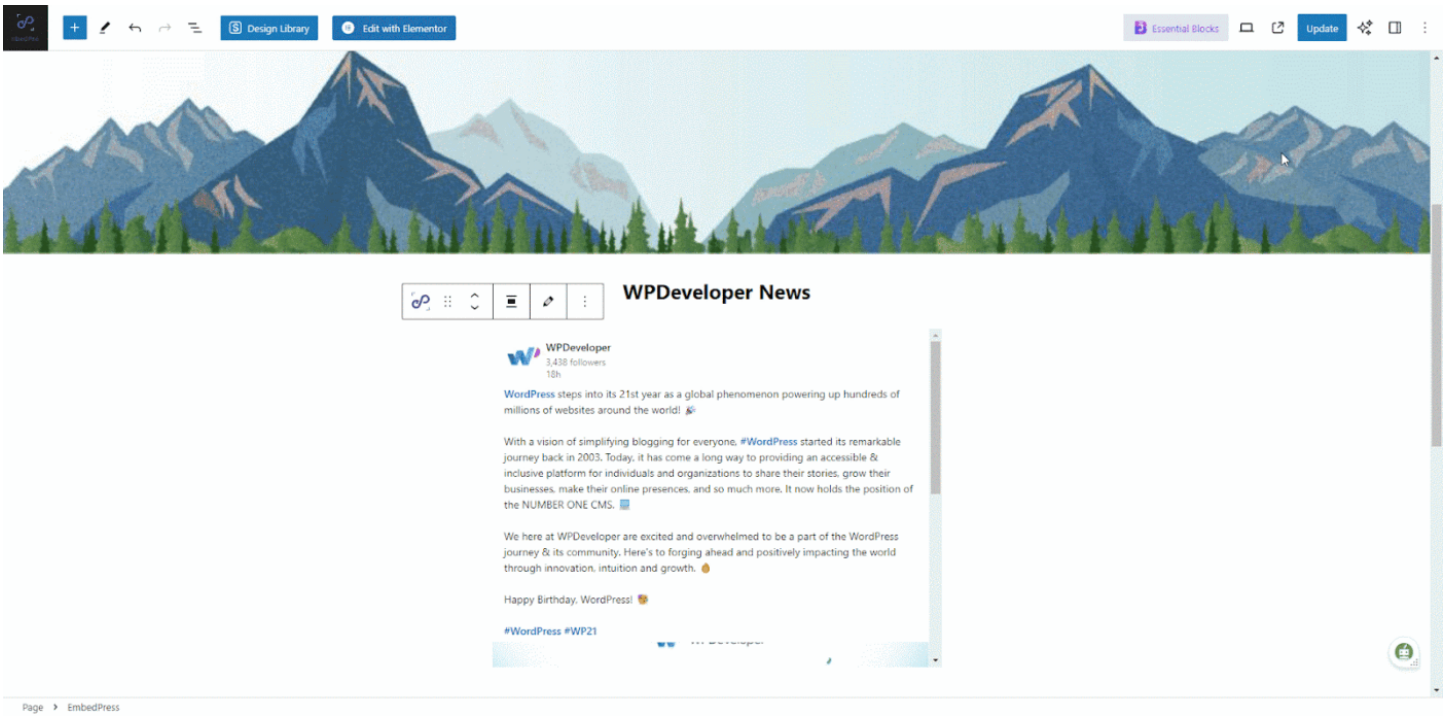

Step 2: Embed LinkedIn Post in EmbedPress

Paste the copied LinkedIn post link in the EmbedPress block field and click 'Embed' button. With that, your LinkedIn post will be embedded instantly. Check out how it will appear.

Step 3: Customize Your Embedded LinkedIn Post

Now, customize the appearance of your LinkedIn post on your WordPress site. In the Block settings, adjust the height and width, or more according to your needs. Now, click on the '**Update**' button to publish it.

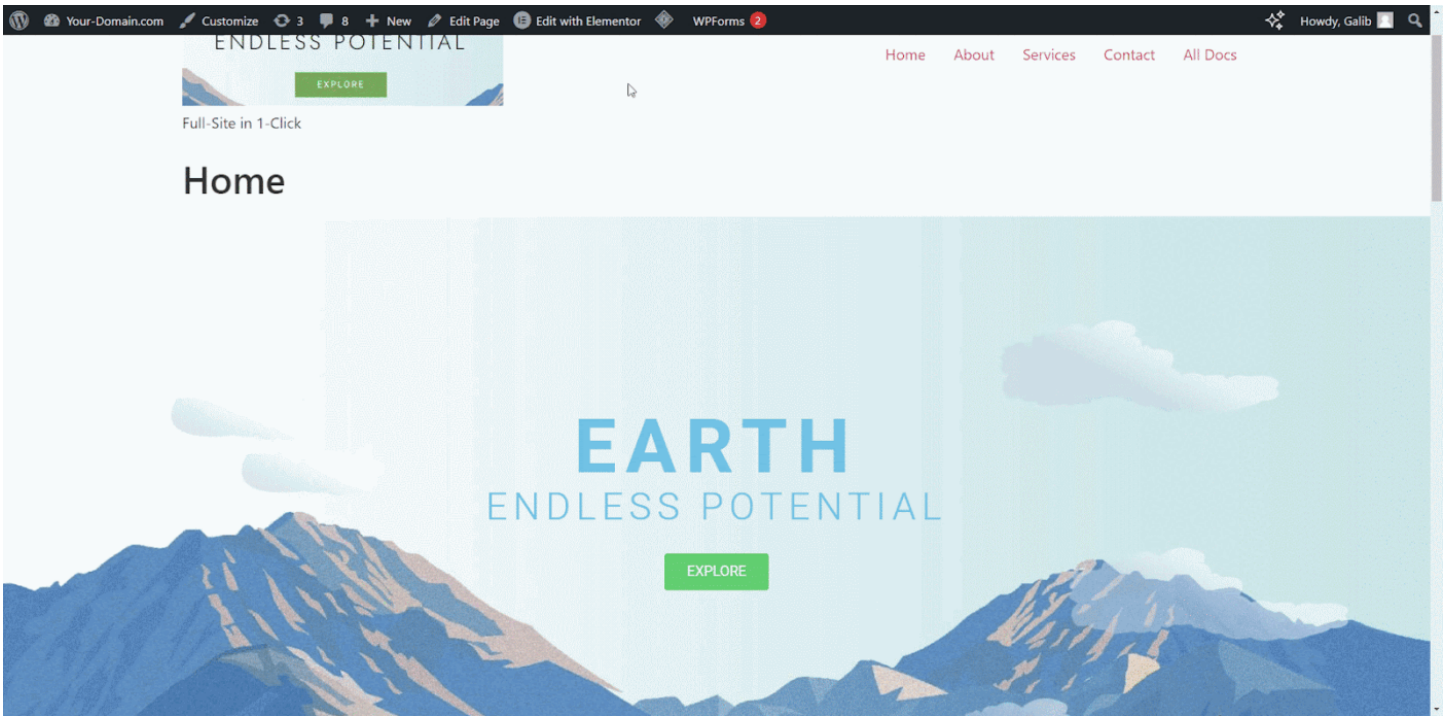

How to Embed LinkedIn Posts in Elementor?

Embedding LinkedIn posts on your WordPress site is easy using EmbedPress in **Elementor website builder**. You can follow the step-by-step process shown below to embed your LinkedIn post.

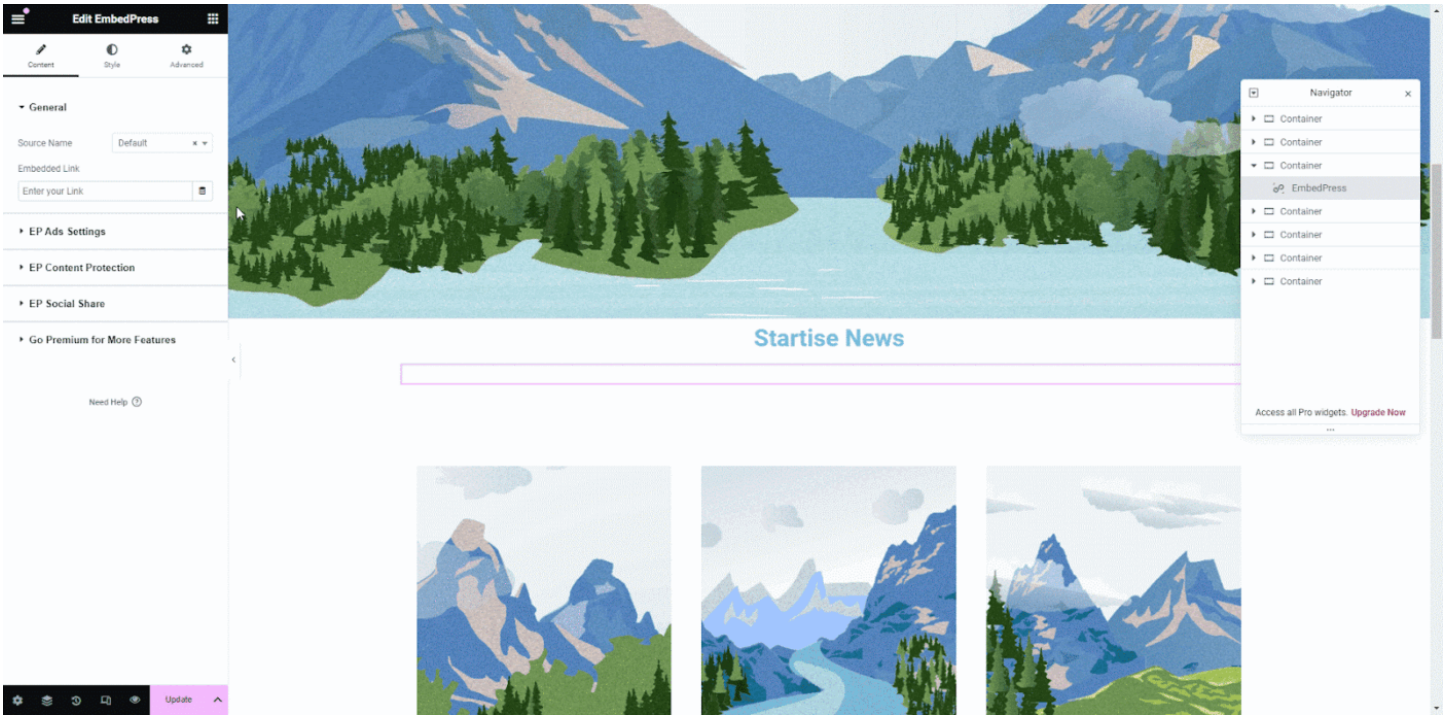

Step 1: Insert EmbedPress Widget

Click on '**Edit with Elementor**'. Find the '**EmbedPress**' element from the search bar, under the '**ELEMENTS**' tab. Simply drag & drop the '**EmbedPress**' into the page.

Step 2: Embed LinkedIn post in Elementor

Now, paste the **copied LinkedIn post link** in the EmbedPress elements embedded link section and hit enter. Or you have to hit return if you use a Mac.

Step 3: Customize Your Embedded LinkedIn Post

Go to **‘Style’** in settings, then customize post height, width or any other modification according to your interests to make it presentable on-site. Then click on ‘**Update**’ and view the embedded LinkedIn post on your site.

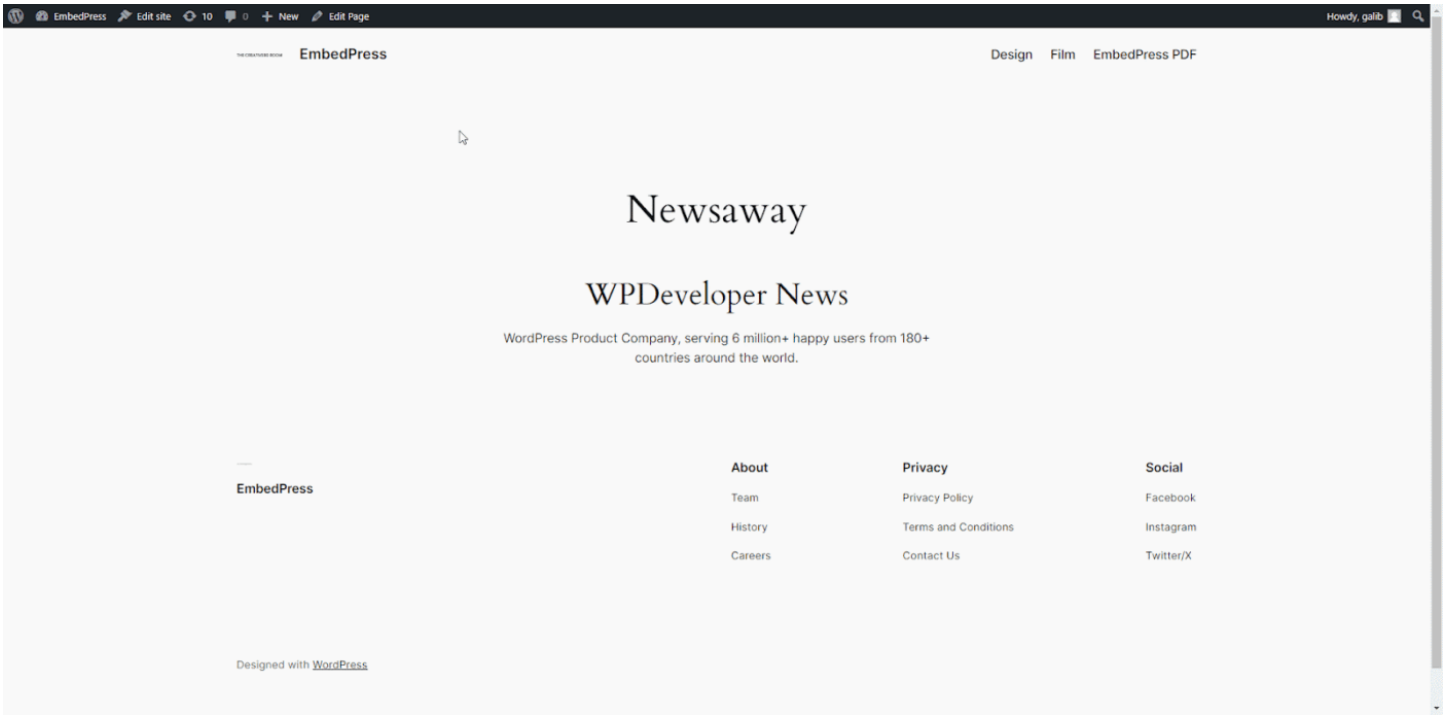

This is how easily you can embed **LinkedIn posts in your WordPress** site using the **EmbedPress plugin** in **Elementor website builder**.

How to Embed LinkedIn Posts in Classic Editor?

You can easily embed LinkedIn posts in Classic Eddior using EmbedPress. You just need to install and activate the EmbedPress plugin on your WordPress and follow the steps below.

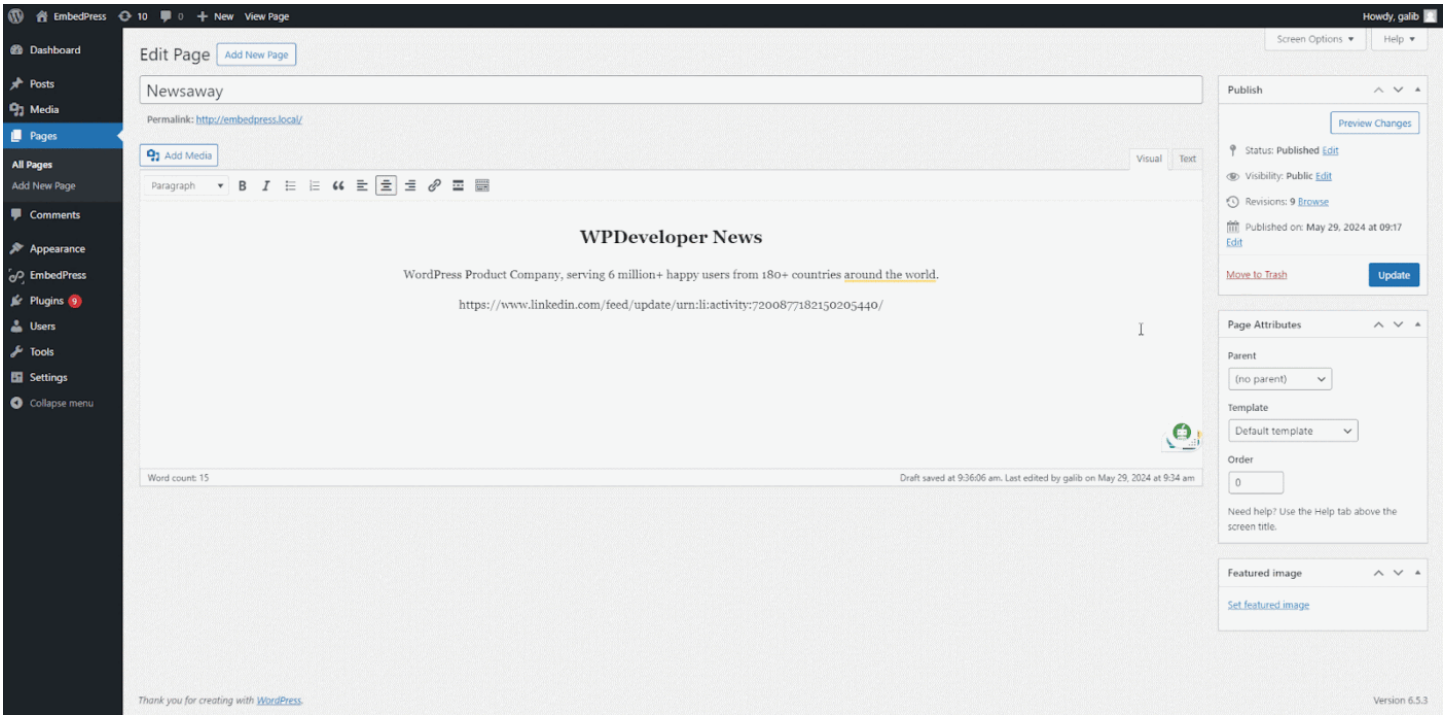

Step 1: Open Classic Editor & Paste Link

Click on '**Edit Page**' to open the classic editor and go to the section of your page where you want to embed the LinkedIn post. And paste the copied LinkedIn post.

Step 2: Update And View Post

Click on the '**Update**' button from the page settings. EmbedPress plugin will detect the link automatically. To view the output, click on '**View Page**' on top.

Experience Live Embedding of LinkedIn Posts

With these easy steps, you can easily embed & experience LinkedIn posts on your WordPress site with EmbedPress in any page editor like Elementor, Gutenberg, or any page builder.
