Embedding **PitchHub** videos in WordPress can be done using either the Gutenberg editor or the Elementor page builder. **EmbedPress** provides a straightforward way to display PitchHub videos directly on your WordPress site.

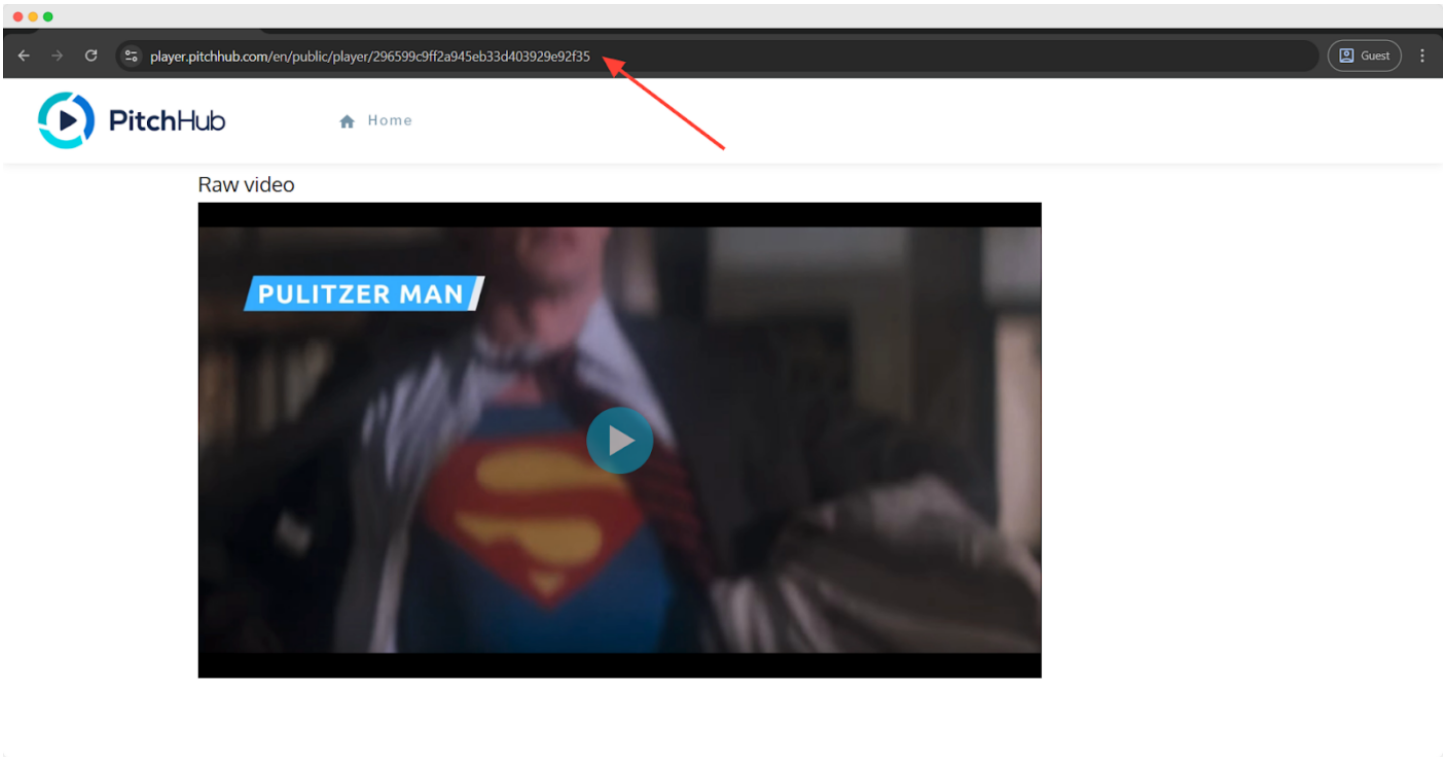

Learn how to embed PitchHub videos using Elementor, Gutenberg or other editors with just a few clicks.

How To Collect Your PitchHub Video URL?

To share or embed your PitchHub videos, you'll first need to locate the video URL. This guide walks you through the simple steps to collect it quickly.

Step 1: Collect Your Video URL In PitchHub

Log in to your PitchHub account. Once you're in, go to the **'Video'** that you want to embed. After that, look for the link located at the top of the page and copy the URL. That's it. Now you are ready to embed.

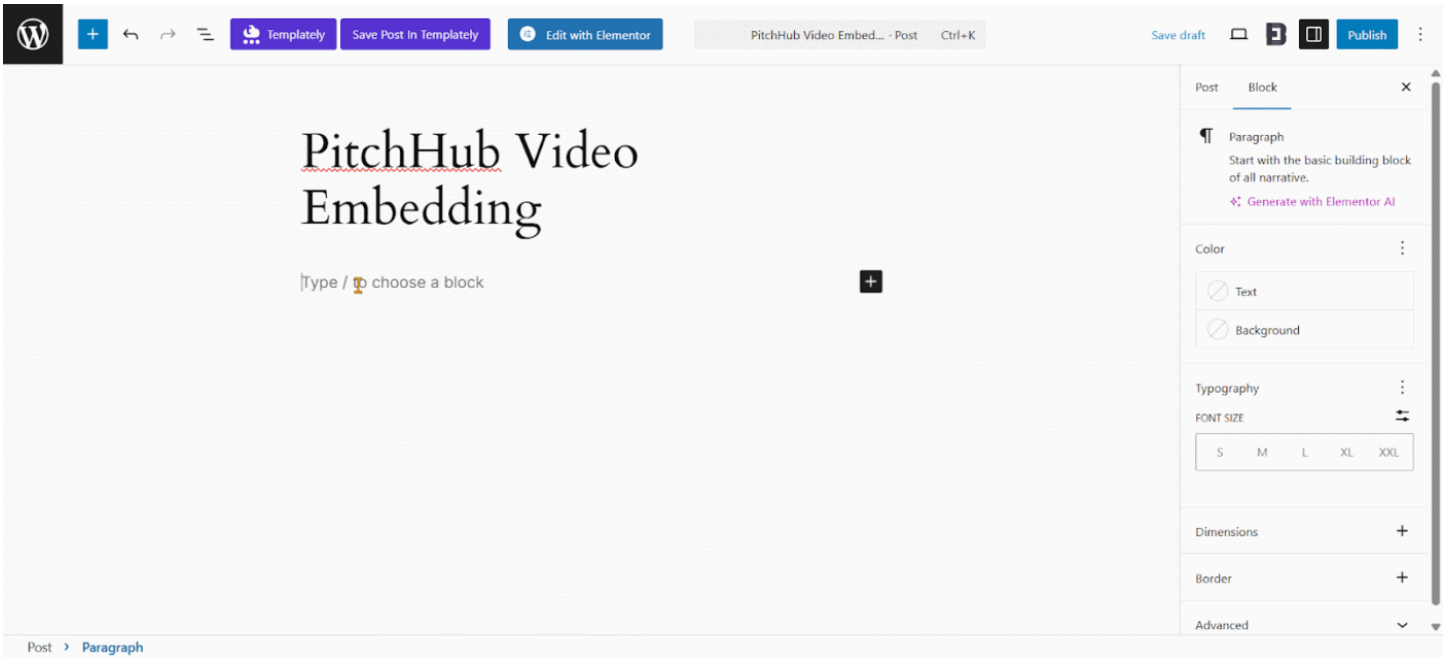

How To Embed PitchHub Videos On Gutenberg?

EmbedPress lets you embed PitchHub videos in the Gutenberg editor with just a few clicks. Follow the steps to learn how you can embed PitchHub using Gutenberg.

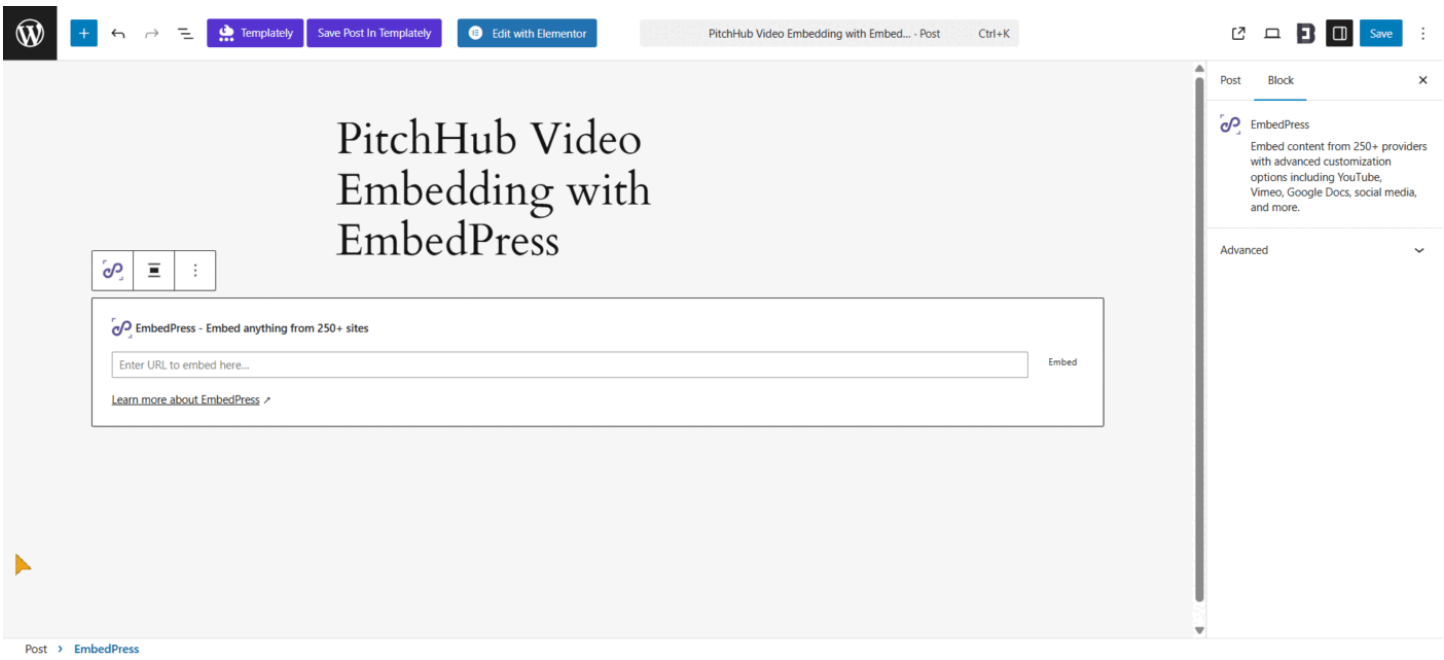

Step 1: Go To Gutenberg Editor & Insert EmbedPress Block

Now, go to the WordPress post or page where you want to embed your PitchHub video. Click the '+' icon in the Gutenberg editor's content area and select EmbedPress. You can also add it using the **'+'** button at the top of the page.

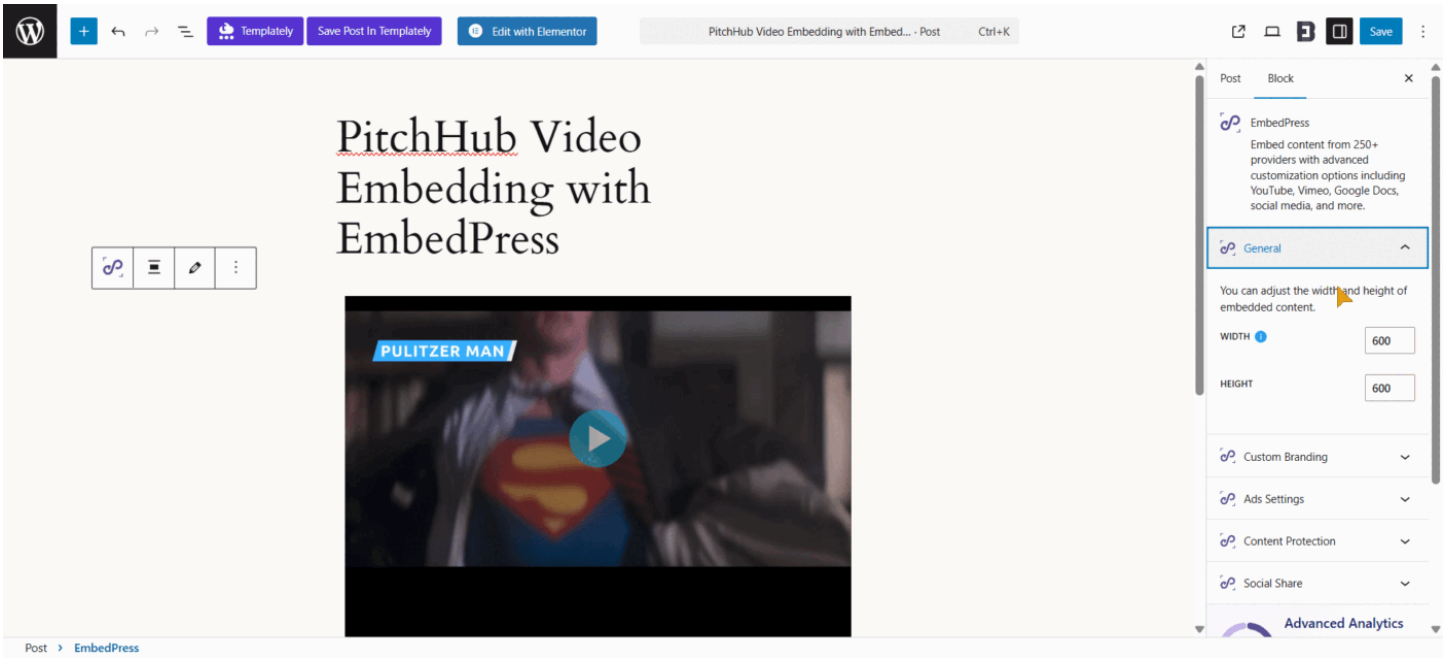

Step 2: Embed PitchHub Video Link On Gutenberg

Then, enter the desired URL into the block. With EmbedPress, you can embed PitchHub video in just one click.

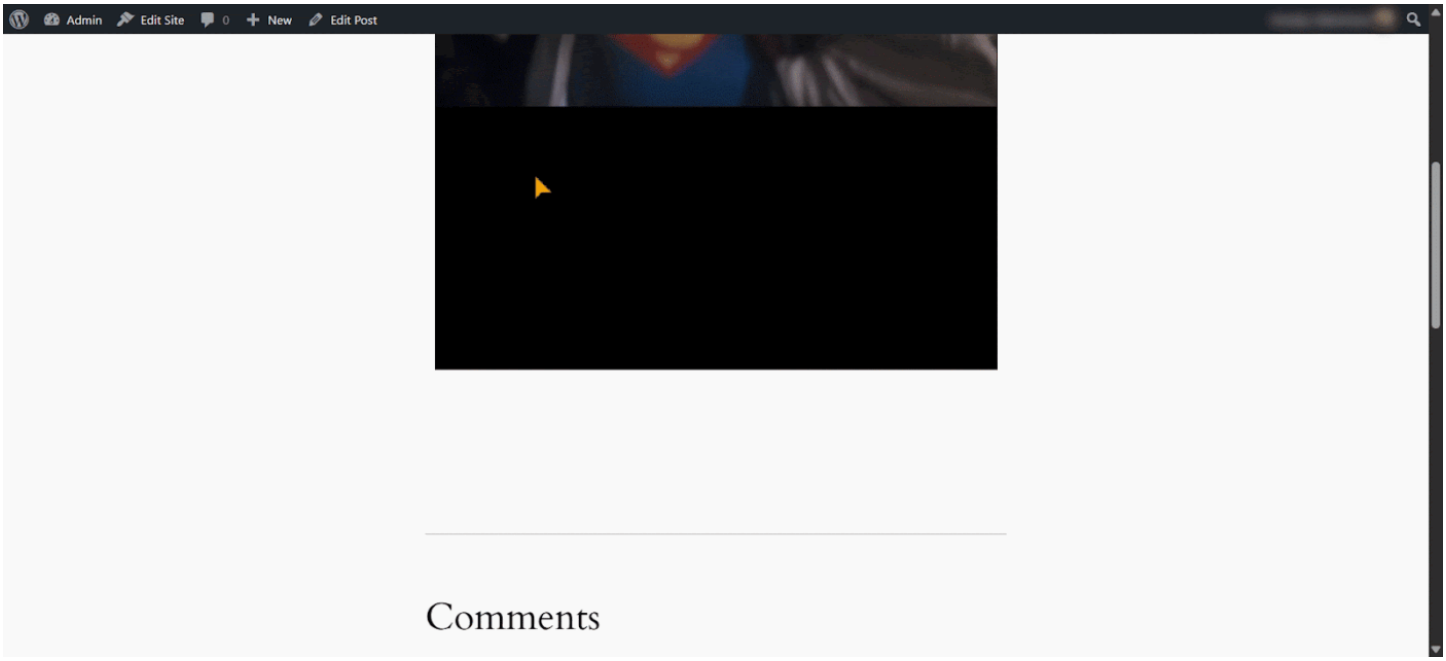

Step 3: iFrame Customization of Embedded Videos Appearance

You can adjust the width and height of embedded content through the General tab in the EmbedPress settings, located in the right sidebar.

Final Outcome

Finally, click on the publish button and view the page to see the content that you have embedded on your site.

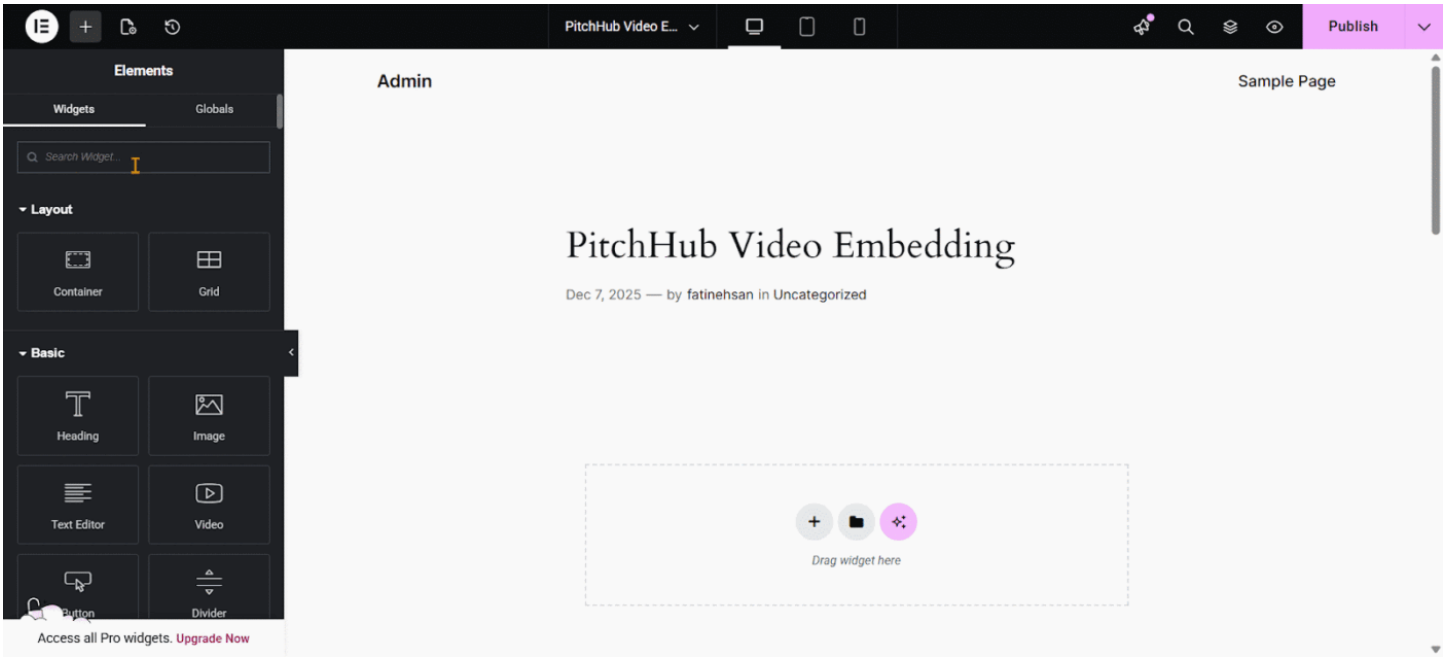

How To Embed PitchHub Videos On Elementor?

EmbedPress allows you to embed PitchHub video with **Elementor** web builder with just a few clicks. Follow the steps to learn how you can embed PitchHub in WordPress using Elementor.

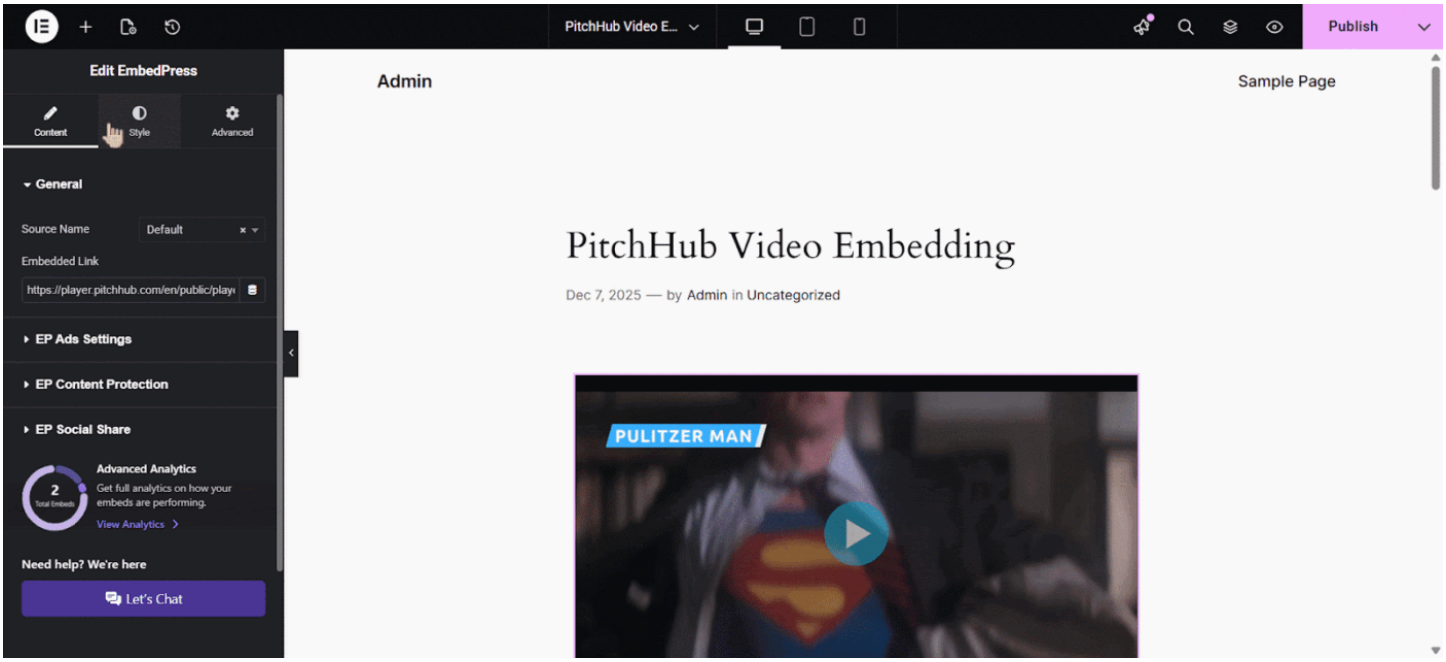

Step 1: Embed Your PitchHub Design Using Elementor

Go to the WordPress post or page using Elementor where you want to embed your PitchHub video. Drag and drop the EmbedPress widget into the page. Insert your PitchHub video in the dedicated field.

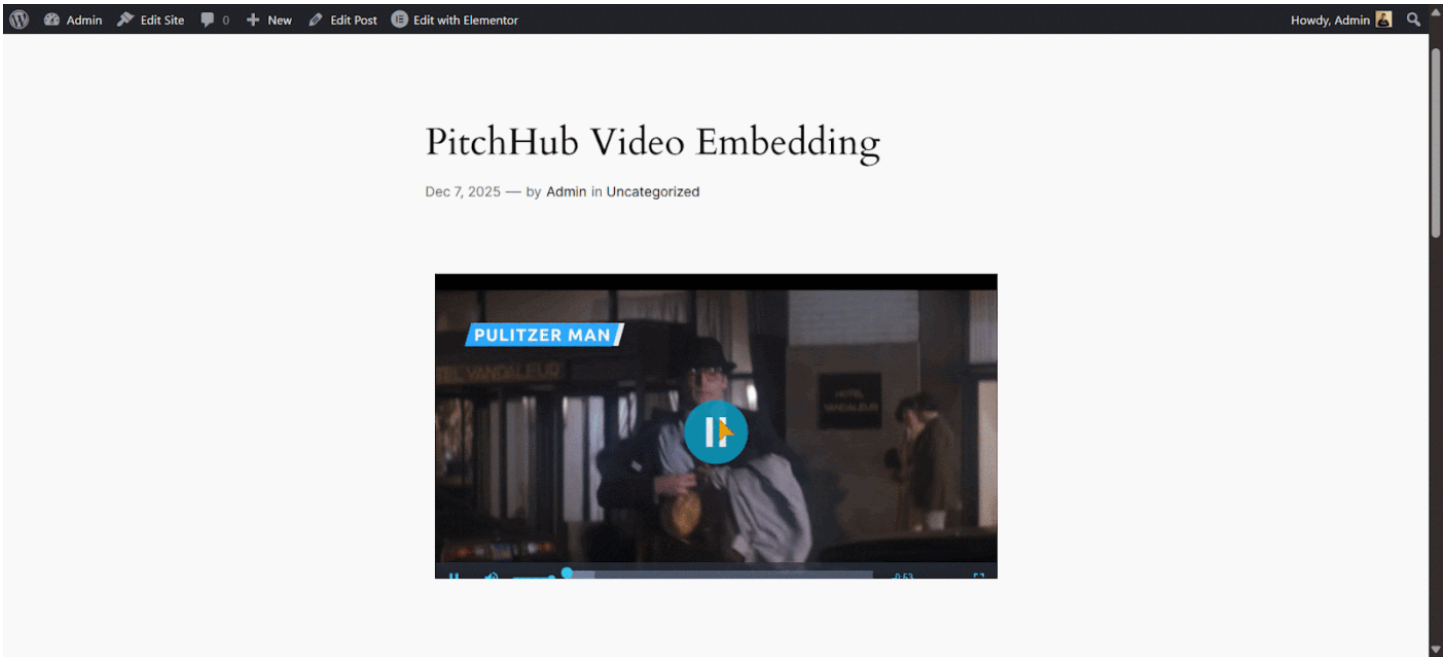

Step 3: Customize the Style Of Your Embedded PitchHub Design

Next, go to the **‘Style’** tab and customize **‘Height’**, **‘Width’**, **‘Margin’**, **‘Padding’**, and **‘Alignment’** as per your preference to present your embedded content more stunningly.

Final Outcome

Finally, click on the publish button and view the page to see the content that you have embedded on your site.

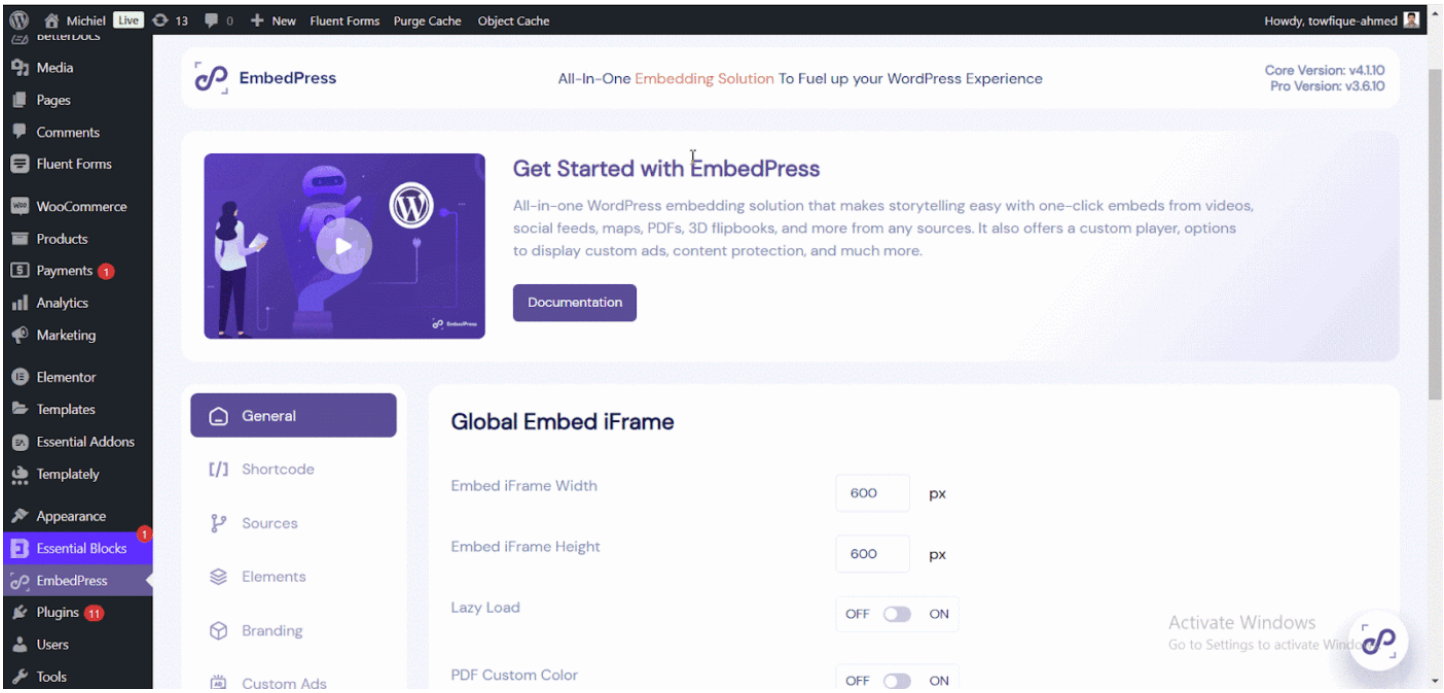

How To Embed PitchHub Video Using Classic Editor and More?

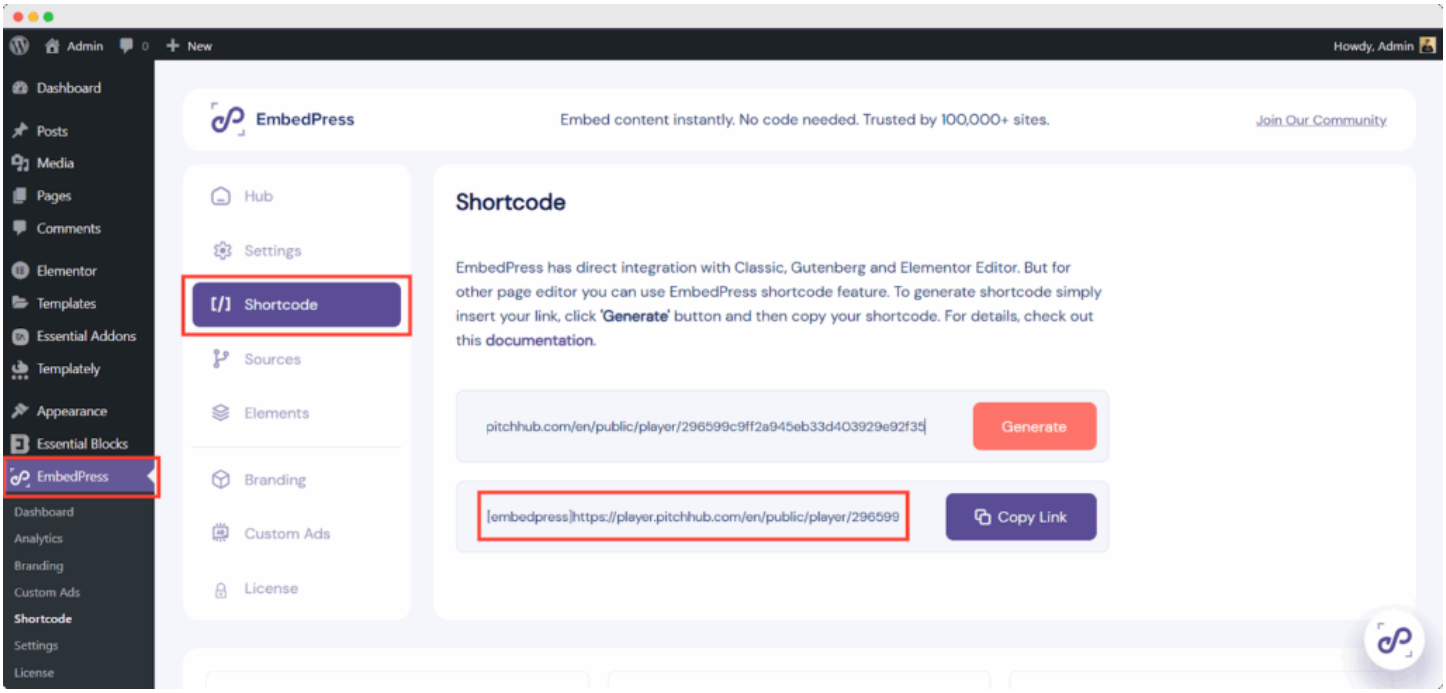

EmbedPress allows you to embed PitchHub video with your Classic Editor, Divi or Other Page Builders using **EmbedPress shortcode.** Follow the steps to learn how you can embed PitchHub video using a classic editor.

Step 1: Generate Embedding Shortcode

Go to your EmbedPress plugin dashboard and click on the **‘Shortcode’** option, as shown below. From there, you can access the tools for generating custom shortcodes and embed them in any WordPress editor.

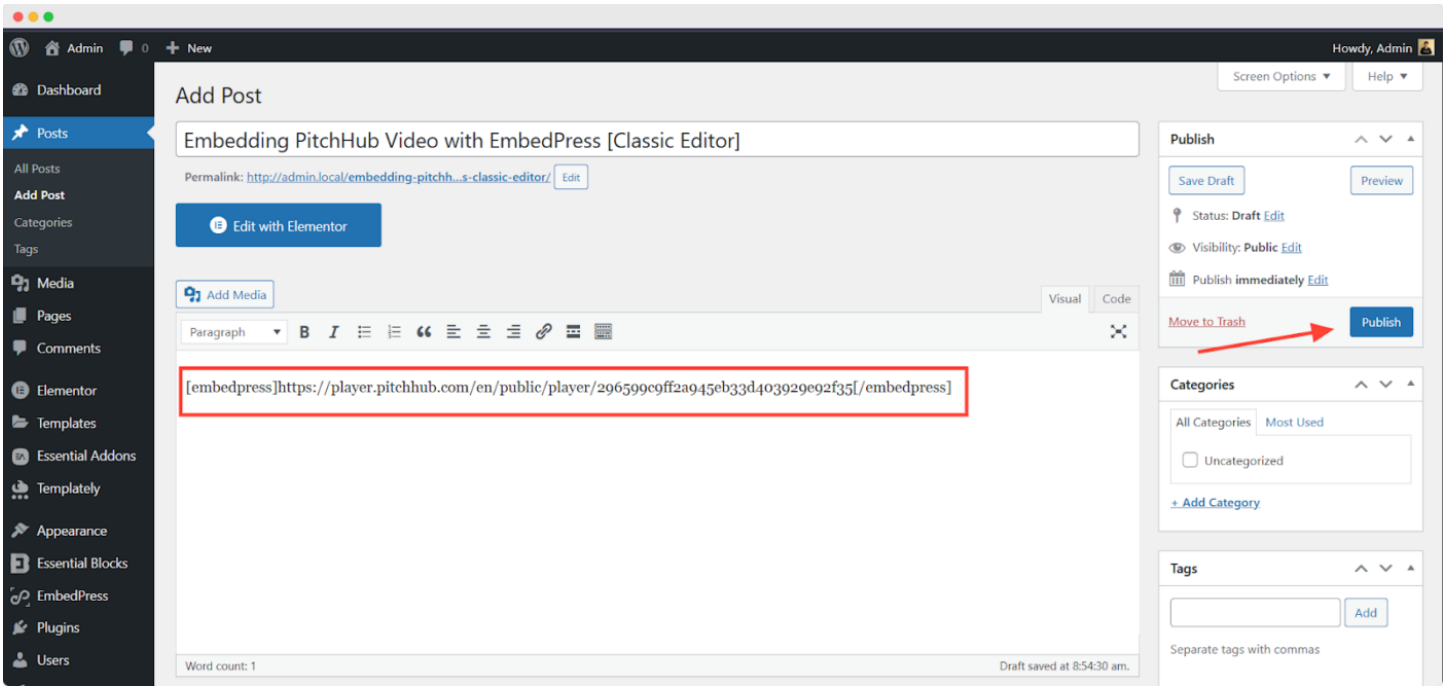

Then paste the collected content URL in the input field and click on the **‘Generate’** button. EmbedPress will automatically generate a shortcode of the source content. Click on **‘Copy Link’** and you will be ready to embed it in any WordPress page builder.

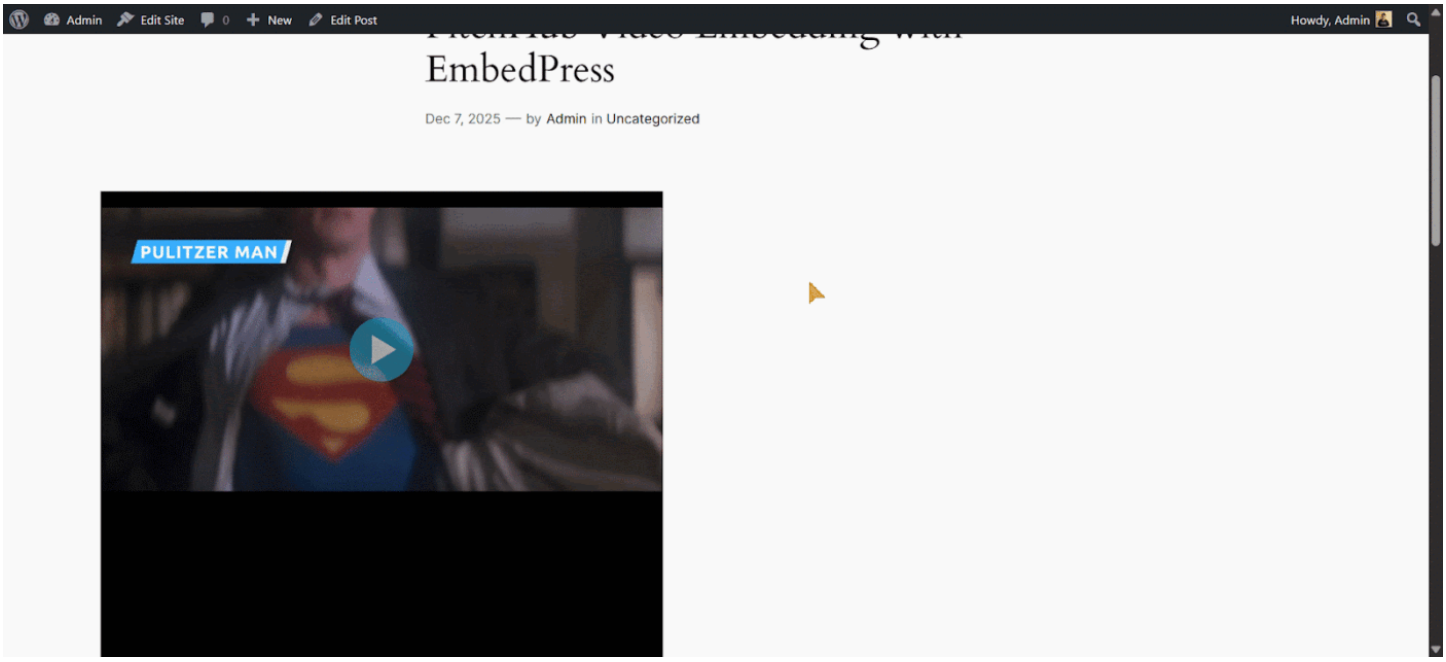

Step 2: Embed With Shortcodes On WordPress Editors

Open up your preferred posts or pages on WordPress Classic Editor. Add your PitchHub video URL to the content area. And within a few moments, your URL will automatically be transformed into an embed of your PitchHub video.

Final Outcome

Finally, click on the publish or update button and view the page to see the content that you have embedded on your site.

And that’s it. This is how easily you can display your PitchHub video using Elementor, Gutenberg, Classic Editor and more. Whether you choose to use the Gutenberg editor or Elementor, both methods provide a seamless experience for displaying your designs.
