How to Embed Twitch Live Chat in Gutenberg

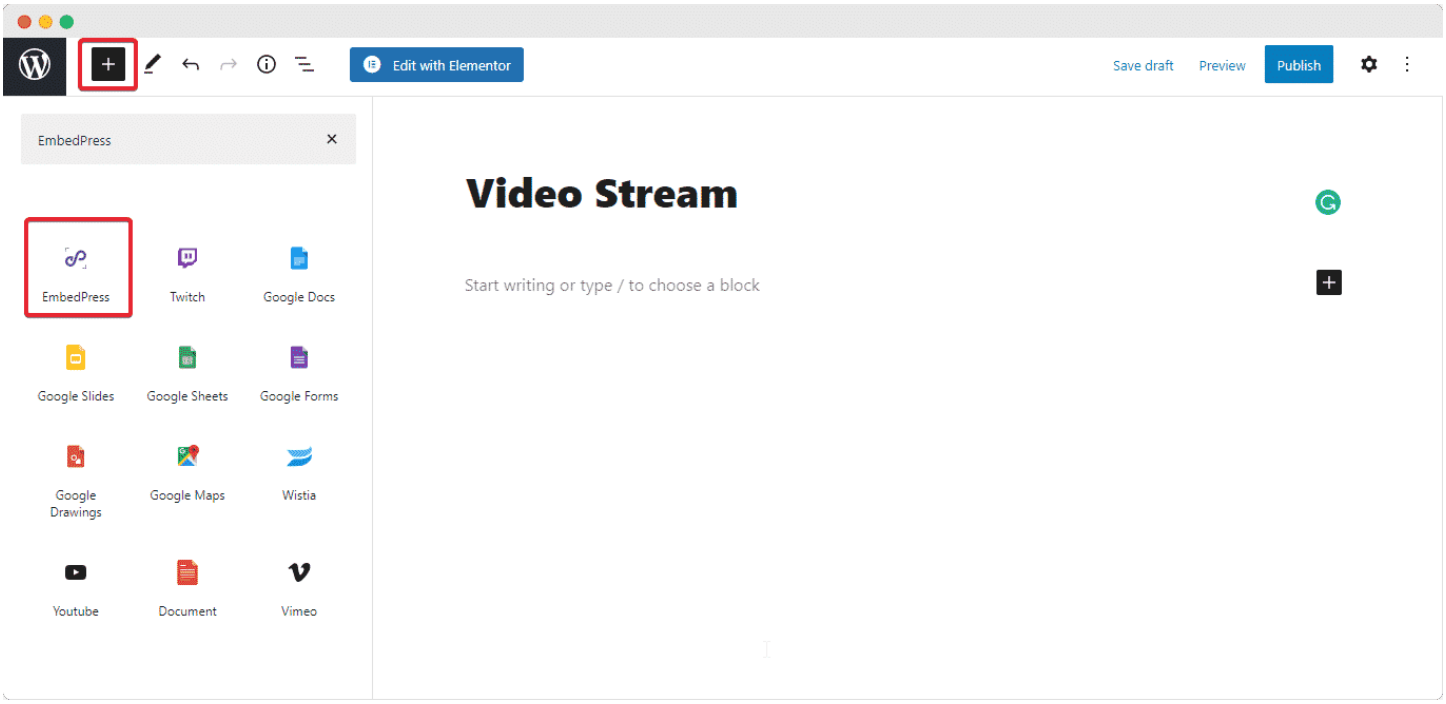

Follow these simple steps to embed and configure Twitch Live Chat in any of your Twitch video links in your WordPress website using the **Gutenberg editor**.

Step 1: Add New Page In Gutenberg Editor

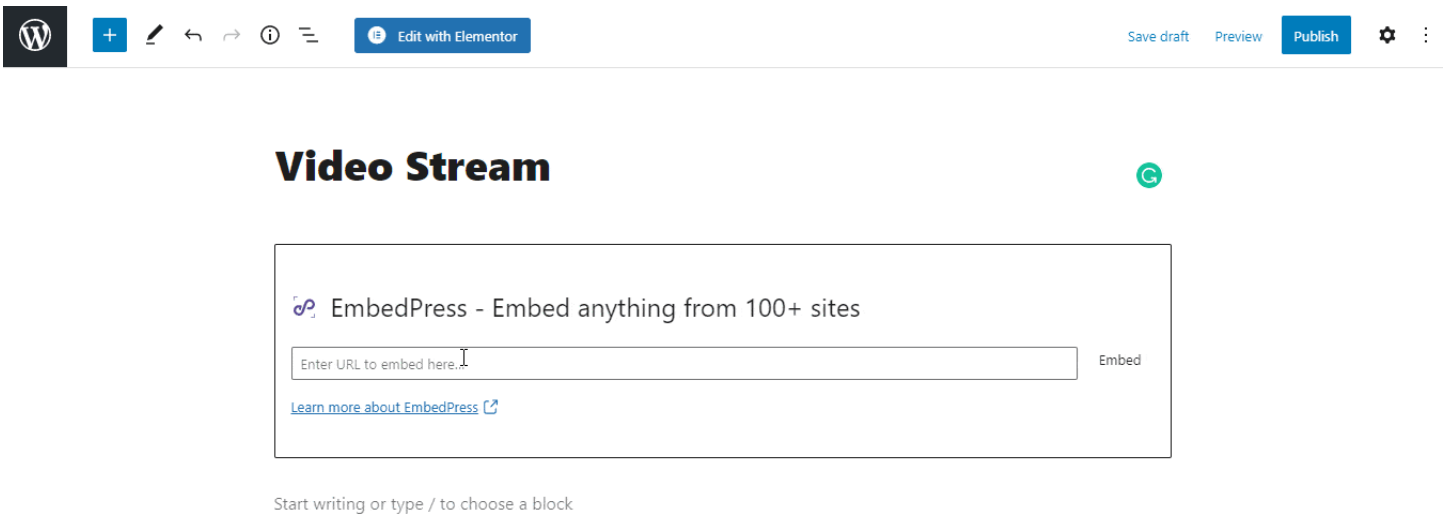

Create a new post or page from your **WordPress dashboard** and click on the **‘+’** icon anywhere in your content area of the Gutenberg editor.

Step 2: Embed Your Twitch Video Link

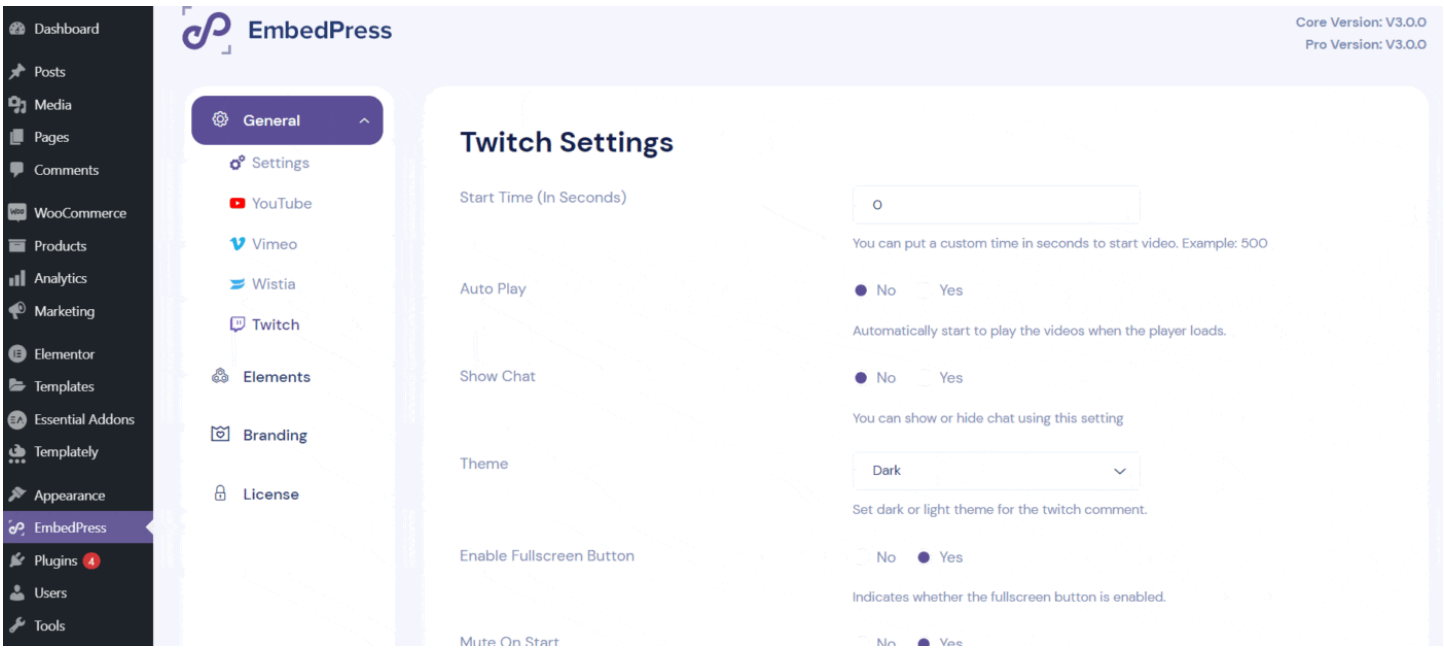

Search for the **‘EmbedPress’ block** to embed your Twitch Live Video on your Gutenberg Editor. Simply just copy and paste your preferred link on the EmbedPress **‘Enter URL to embed here'** section and hit the **‘Embed’** button. EmbedPress will then automatically embed your content into your post or page.

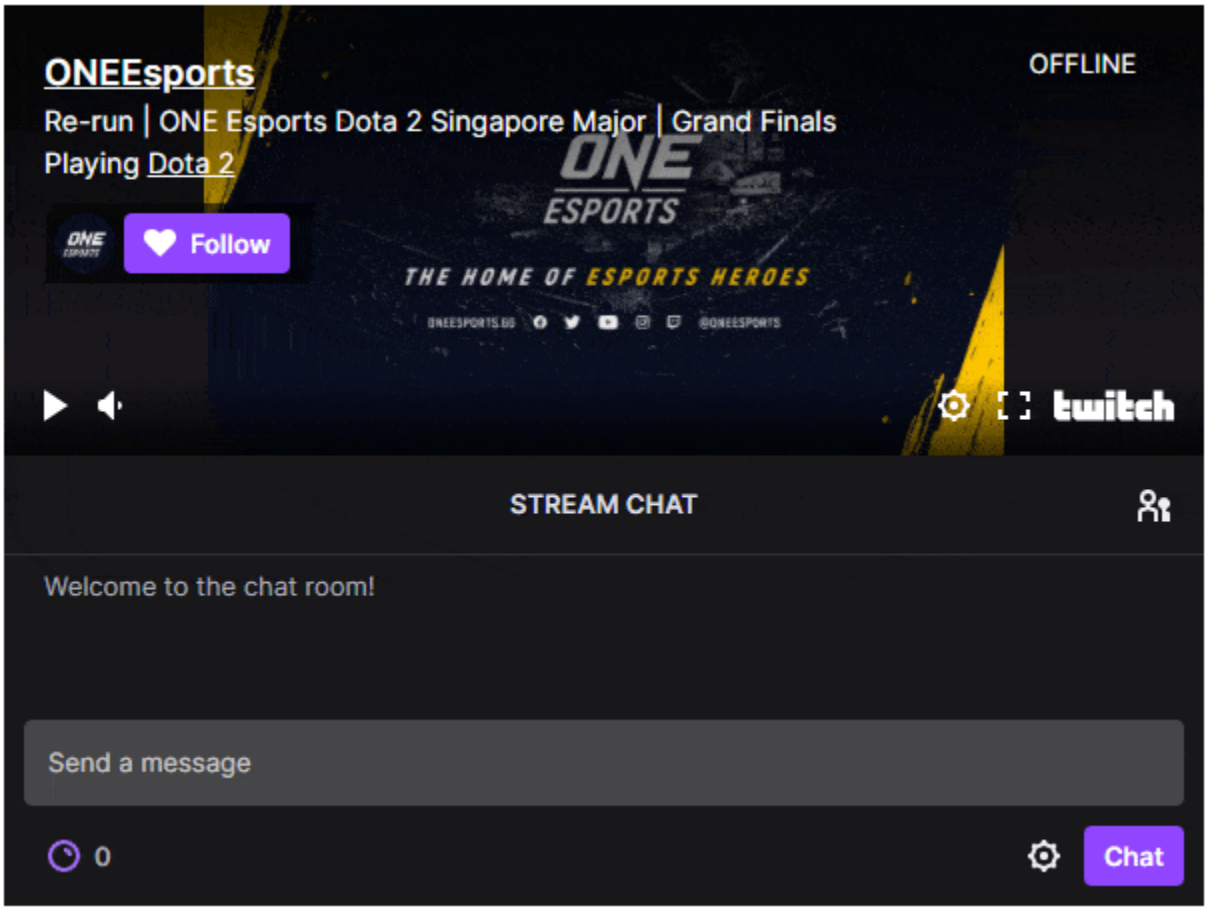

Step 3: Configure EmbedPress Twitch Settings

From **EmbedPress → General → Twitch** you can get full control over your Twitch video outlook, live chat option, and many more. You can select the start time (in seconds) of your Twitch video, enable or disable the autoplay, and live chat option.

Besides, if you want, you can select your Twitch video display theme in **‘Dark’ or ‘Light’** on your website, enable the full-screen button, or can make your video mute on starting and make the changes as per your preferences.

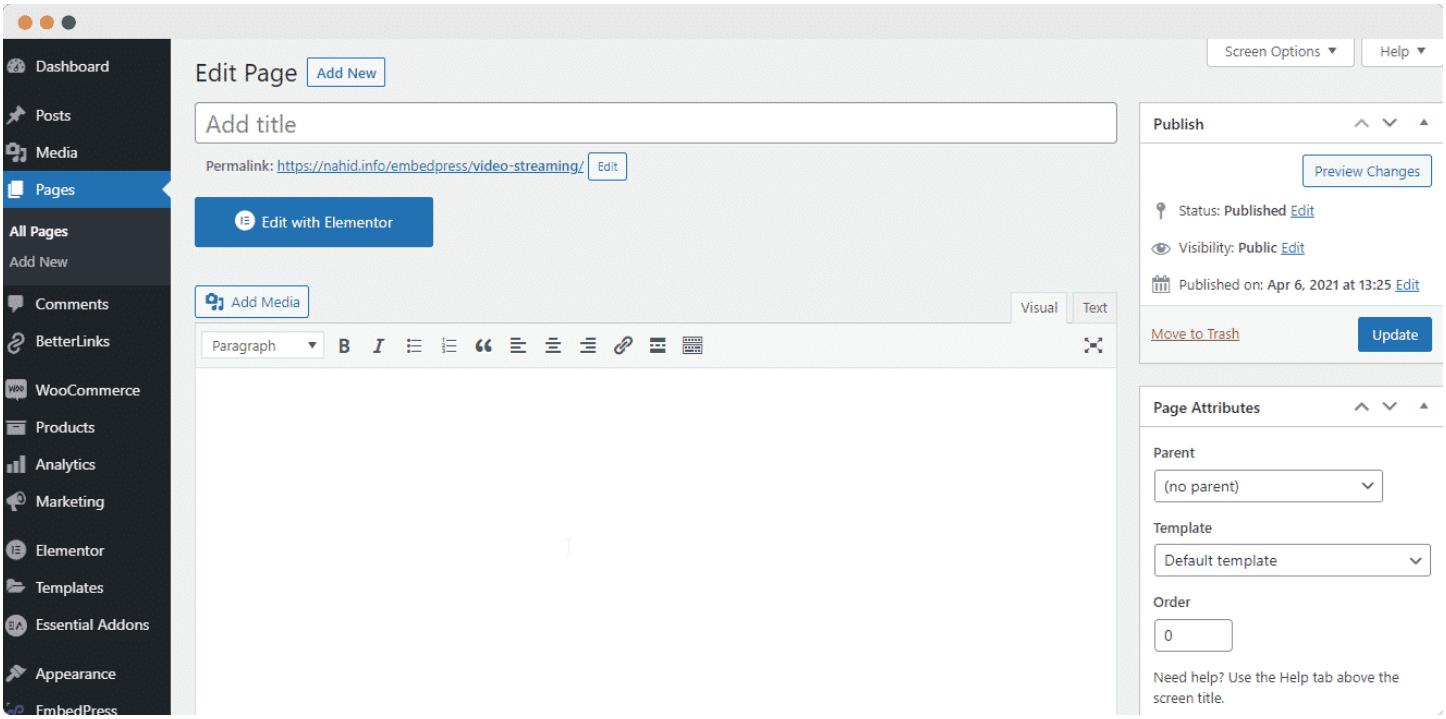

When you are done, click on publish to share your Twitch video with the live chat option on your WordPress website.

How to Embed Twitch Live Chat in Classic Editor

As you have seen how easily you can embed and configure Twitch Live Chat in Gutenberg, following the same process you can make it happen on **Classic Editor**. Check out the simple guidelines below:

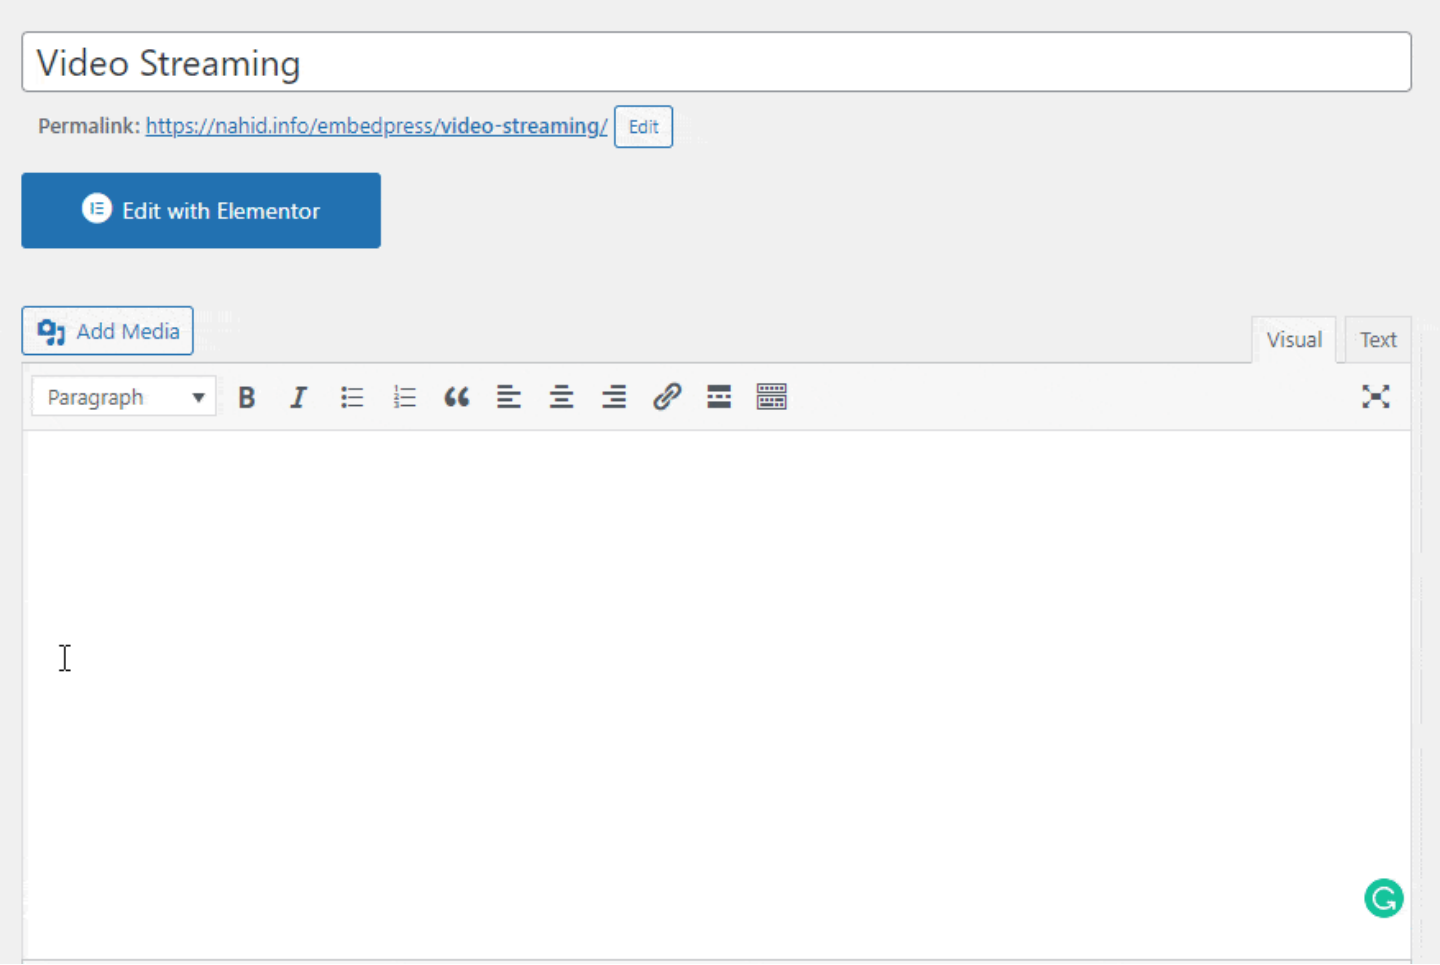

Step 1: Create A New Page In Classic Editor

Create a new post or page from your **WordPress dashboard** and you are ready to embed your desired Twitch video link on your Classic editor.

Step 2: Embed Your Twitch Live Video Link

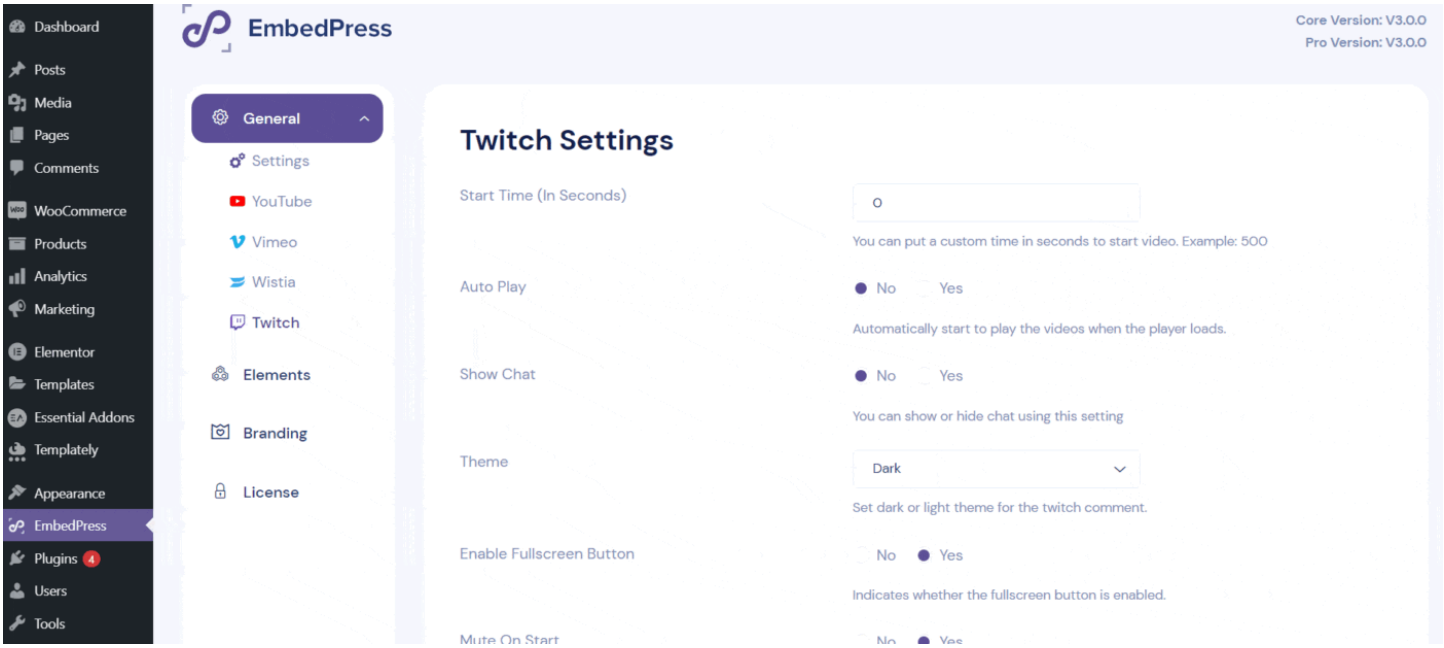

To **embed your Twitch Live Video**, simply just copy and paste your desired link on Classic Editor. Afterward, EmbedPress will then automatically embed your Twitch video content into your post or page.

Note: *Make sure you have pasted your desired links on Classic Editor* ***'Visual mode'*** *and not in the 'Text' one.*

Step 3: Configure EmbedPress Twitch Settings

From **EmbedPress --> General --> Twitch**, whatever changes you will make by adjusting video start time(in seconds), enable or disable the autoplay, live chat option, and more. It's completely the similar process that you have seen in the Gutenberg Editor section above.

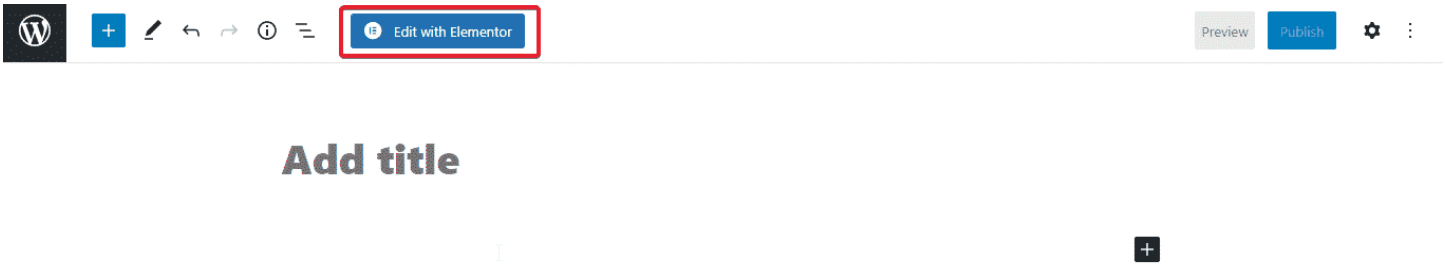

Once you are done, click on publish to share your Twitch video with the live chat option on your WordPress website.

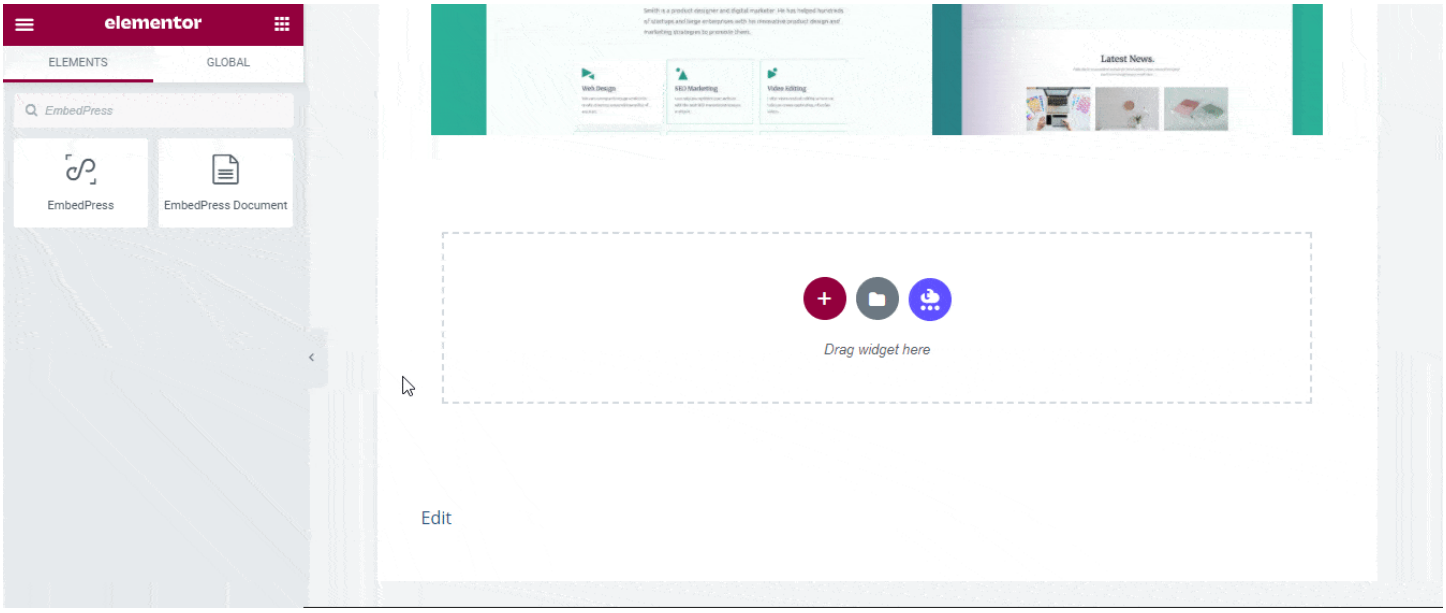

How to Embed Twitch Live Chat in Elementor

You can **use EmbedPress with Elementor** to embed and configure your Twitch video with Twitch live chat into your WordPress website. Follow these steps to embed Twitch live chat in Elementor Editor.

Step 1: Create A New Page In Elementor Editor

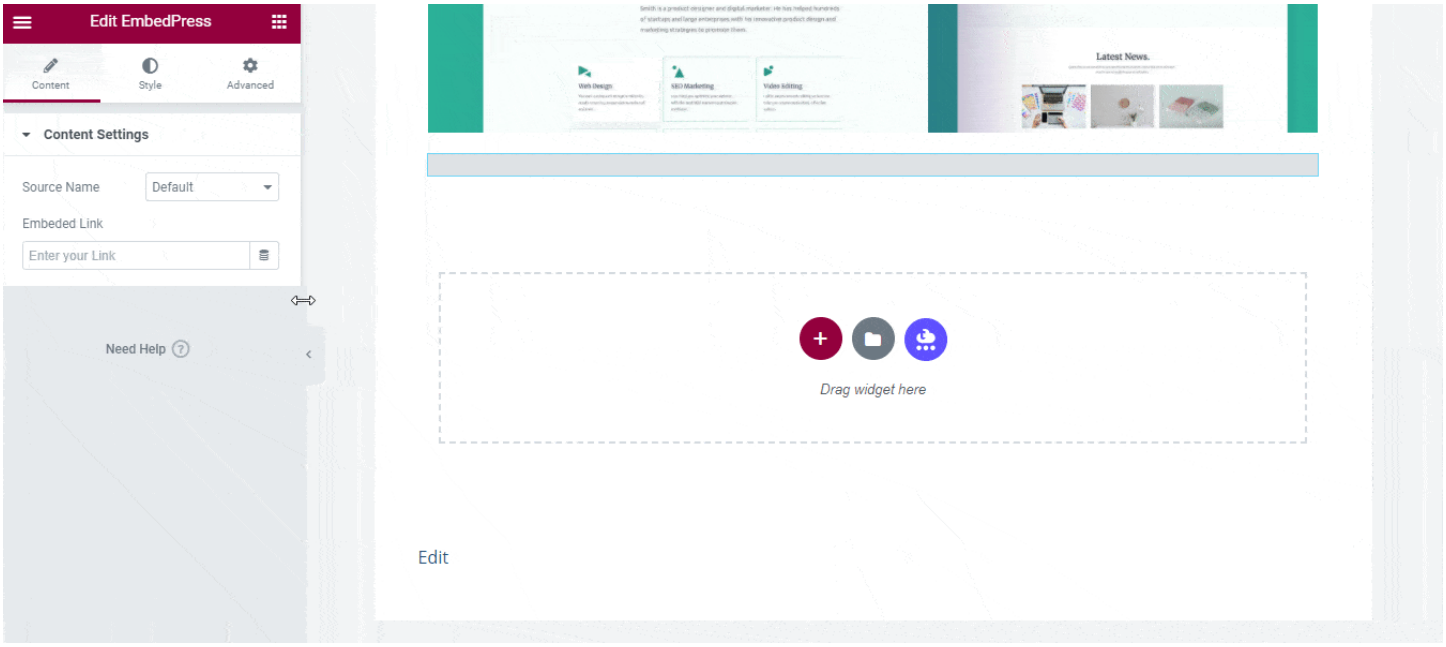

First, create a new page from your WordPress dashboard by navigating to **Pages→ Add New** and then click on the blue **‘Edit With Elementor’** button. Then search for the **‘EmbedPress’** element from under the ‘ELEMENTS’ tab in Elementor Editor.

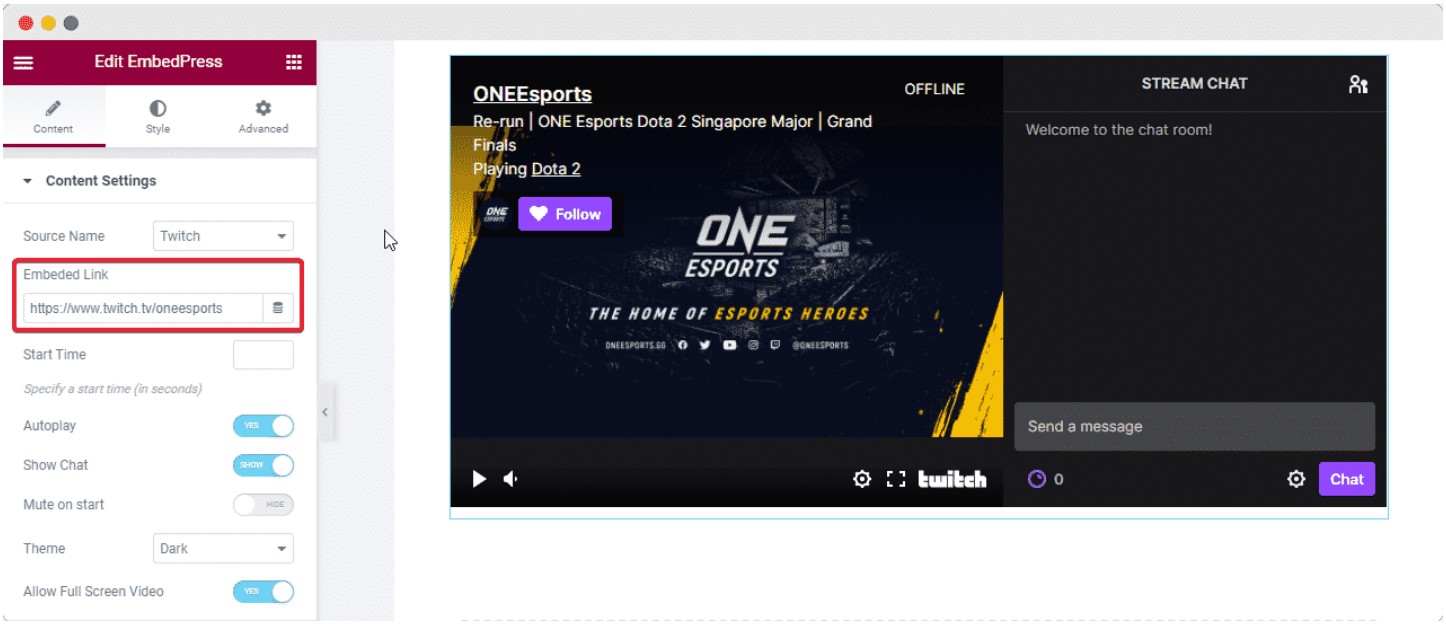

Next, **drag and drop** this **EmbedPress element** anywhere on your page where you want to embed your Twitch live chat.

Step 2: Embed Twitch Video With Live Chat In Elementor

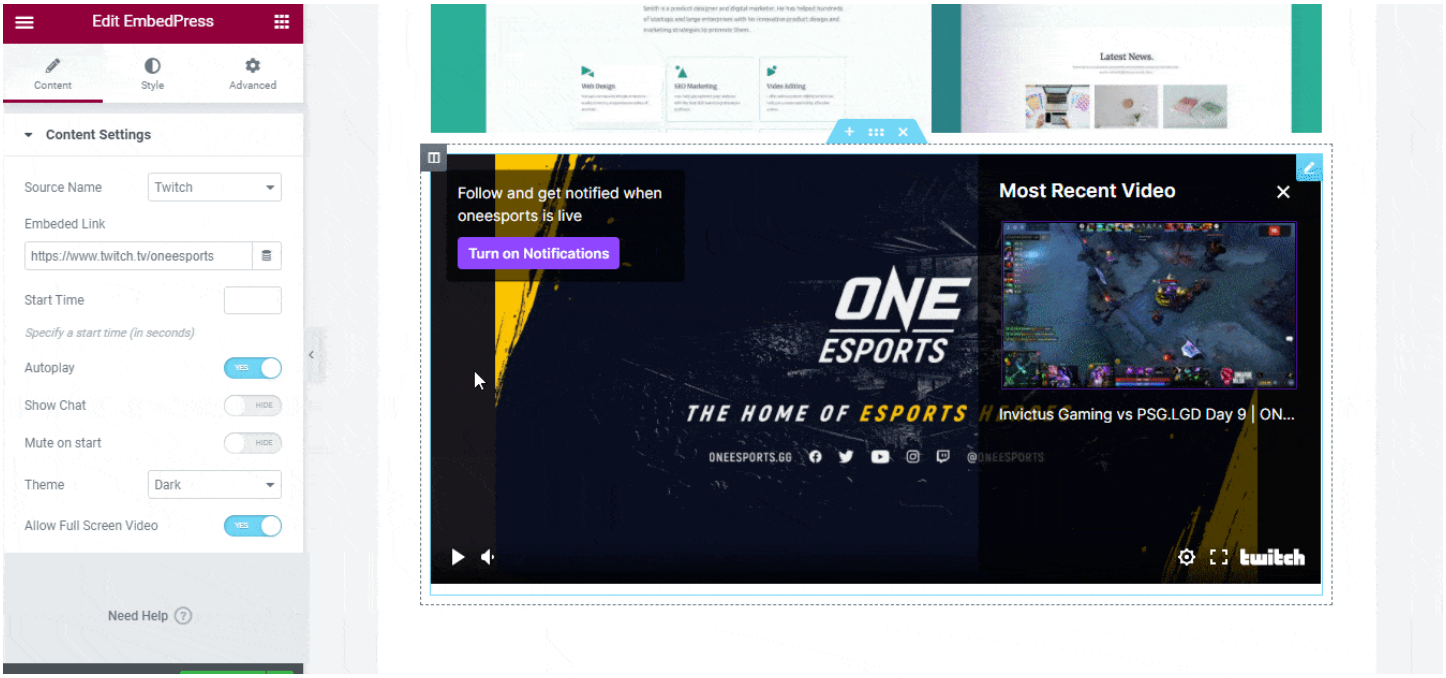

From the **‘Content’** tab, you can choose the **‘Source Name’** as **‘Twitch’** under the ‘Content Settings’.

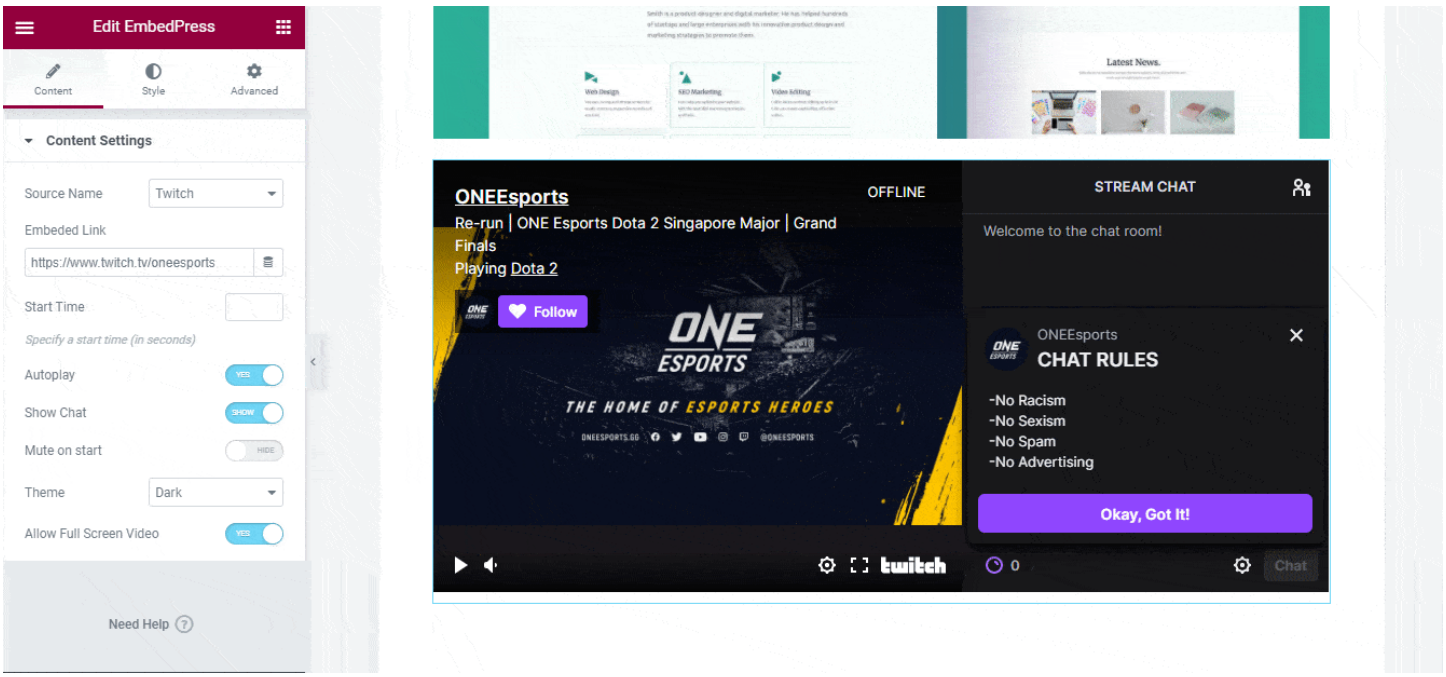

After that, it will come with a detailed window, and you just have to copy and paste your desired link there on the **‘Embedded Link’** section. EmbedPress will then automatically embed your Twitch video into your website.

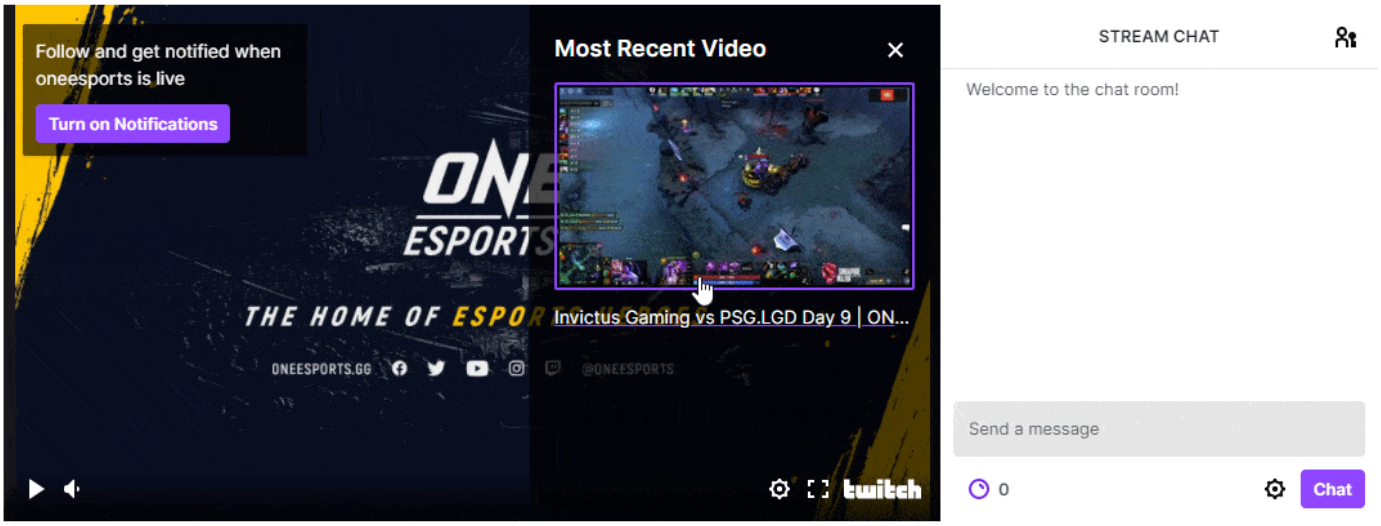

Step 3: Configure & Publish Your Twitch Live Chat In Elementor

To display Twitch Live Chat with your Twitch video, enable the **‘Show Chat’** option. Afterward, it will make the live chat option enable right away.

Besides, if you want, you can configure the start time(in seconds), enable or disable the autoplay, or mute on start on your Twitch video from Elemenetor Editor. Even you can change your Twitch video display theme in **‘Dark’ or ‘Light’** mode on your website, and configure it for full screen on your website.

Once you have done with all the changes, click on **‘Preview’** or **‘Publish’** to see how your Twitch video with Twitch Live Chat has been embedded by EmbedPress.

With these simple steps, you can embed and configure **Twitch Live Chat on Twitch Video** instantly in your WordPress website with **EmbedPress** using any of the Gutenberg Editor, Classic Editor, or Elementor Editor.
