How To Embed X Posts In WordPress Easily (Former Twitter)?

Embed Sources · https://embedpress.com/docs/embed-twitter-tweets-wordpress/

With **EmbedPress**, you can **embed X posts** in WordPress, without coding. X was formerly known as Twitter. EmbedPress helps you embed X posts on your preferred WordPress editor, Gutenberg, Classic, Elementor or other popular editors with just a few clicks.

Embed X Posts in WordPress

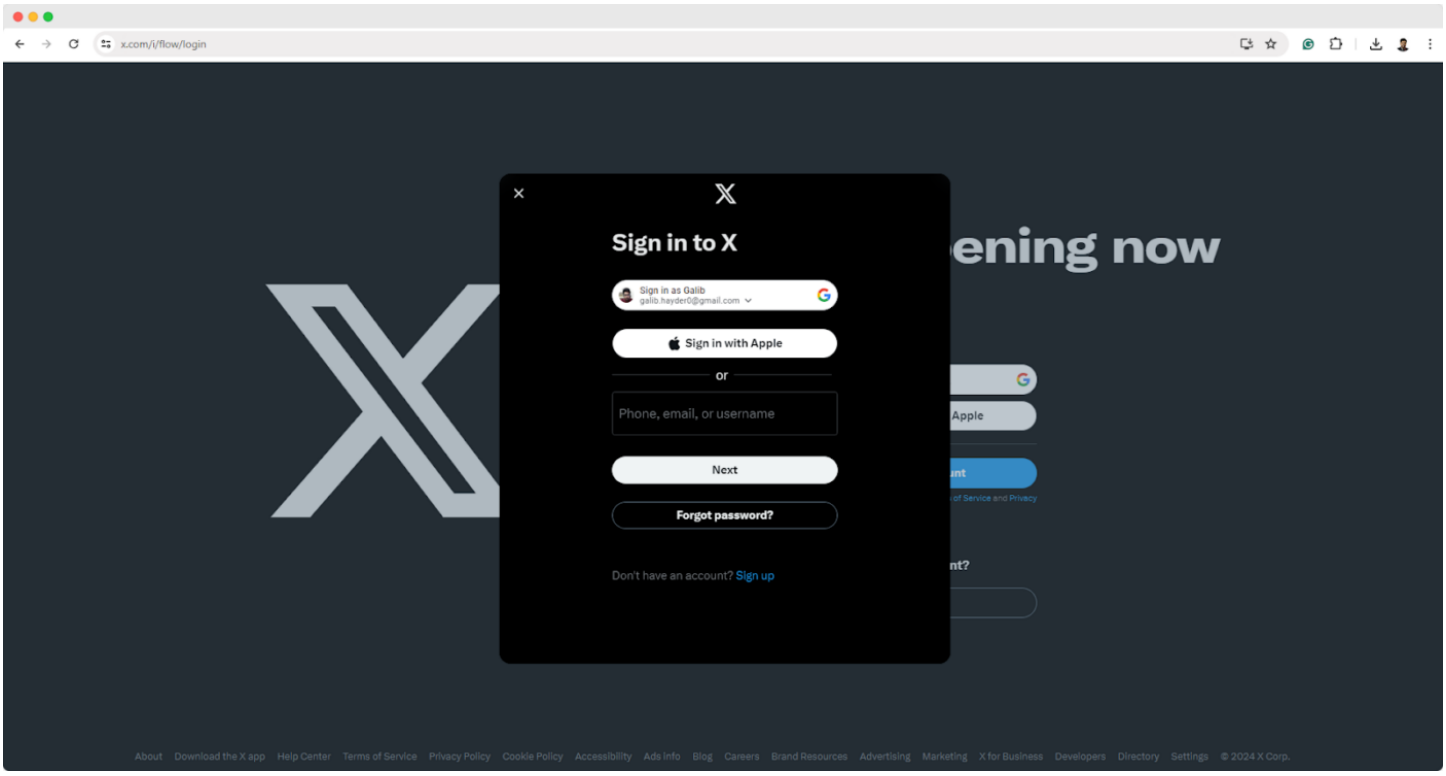

EmbedPress is compatible with popular page builders like Gutenberg, Elementor, Classic Editor, and others. Here’s how to embed X content into your WordPress site using the **EmbedPress plugin.**

How to Collect X Post URLs?

Collecting post URLs is the first step in embedding your X post in WordPress. You can follow the below steps to collect your post link correctly.

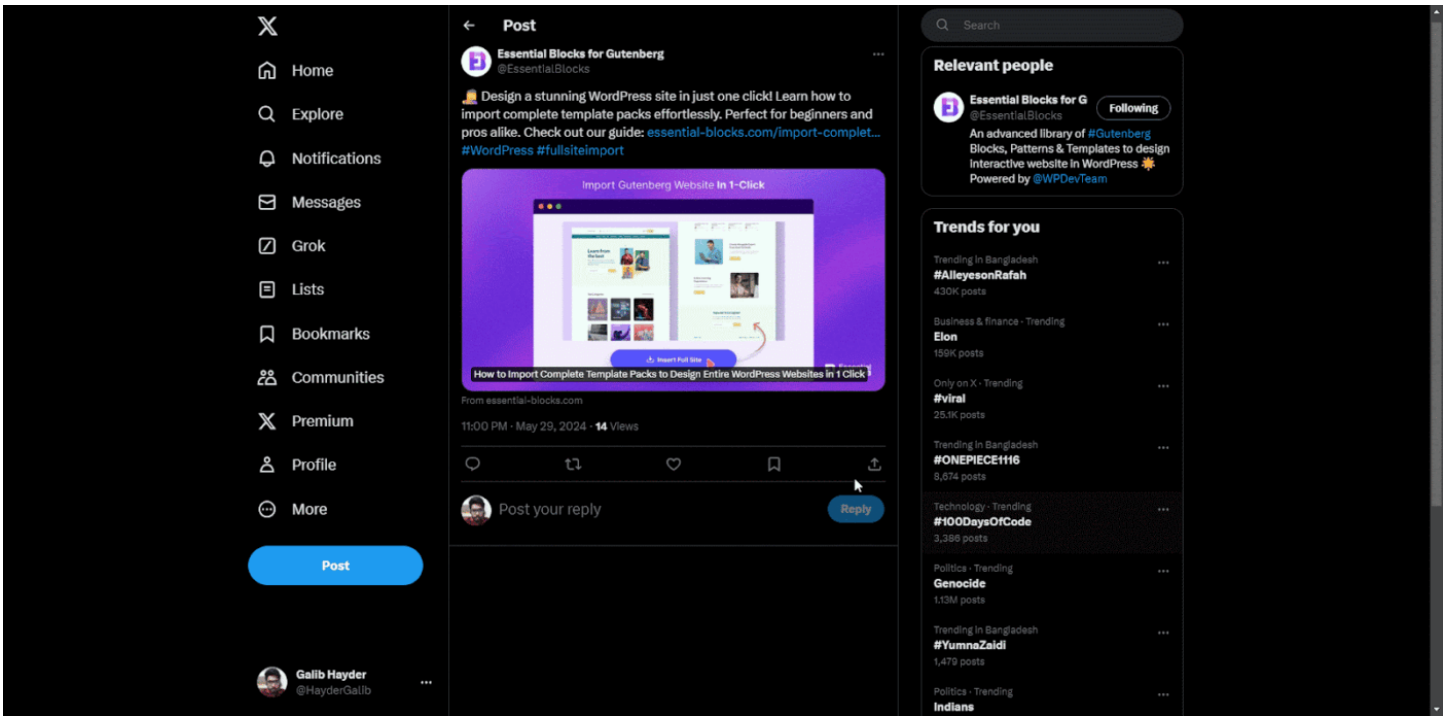

Step 1: Login And Browse X Post

First, Login/ Register to **x.com** . Browse in X and find the one post that you wish to embed on your WordPress site.

Step 2: Copy X Post Link

Click on the '**Share**' icon at the bottom right of the post and select the '**copy link**' option. Or, you can simply copy the URL from the browser address bar. This is how easily you can copy X posts.

How to Embed X Posts in Gutenberg?

Gutenberg is the default editor and one of the most widely used page editors for WordPress. To embed X posts in Gutenberg editor, follow the step-by-step guidelines below:

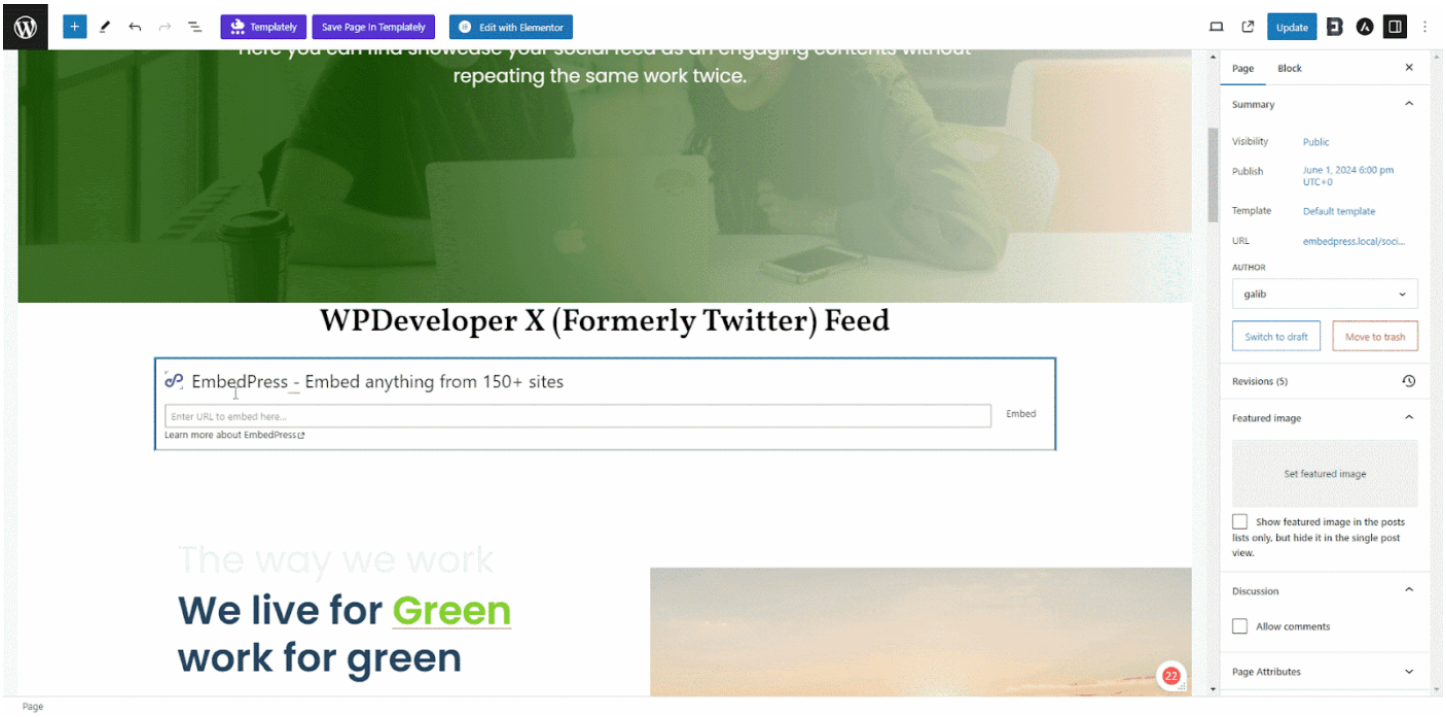

Step 1: Insert EmbedPress Block in Gutenberg Editor

Open the Gutenberg page editor by clicking on '**Edit Page**' from the wp-admin bar. Click on the '**+**' icon, then search '**EmbedPress**' block and click to add it to the page.

Step 2: Embed X Post in EmbedPress

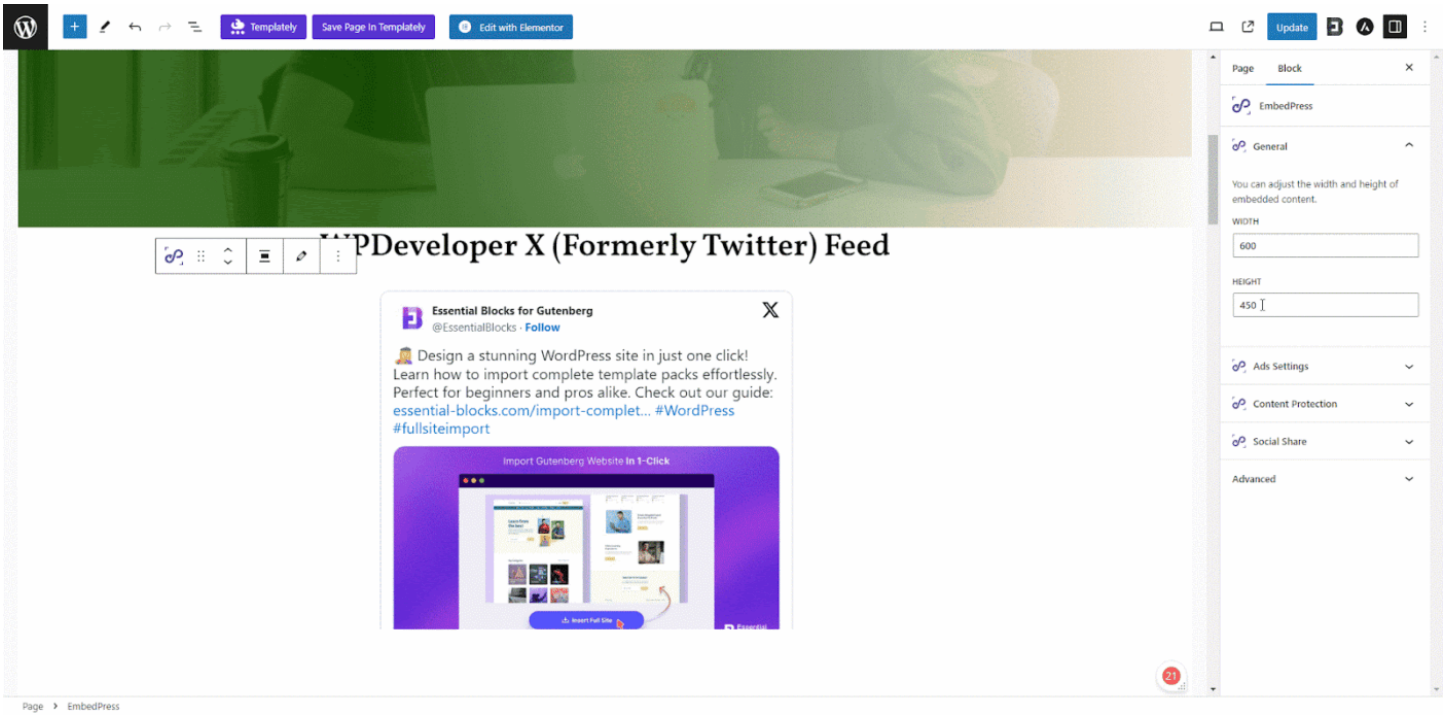

Paste the copied X post link in the EmbedPress block field and click the '**Embed**' button. And your X post will be embedded instantly. Check out how it will appear.

You can follow these steps to embed X posts to enrich your WordPress website content.

Step 3: Customize Your Embedded X Post

Now, customize the appearance of your X post on your WordPress site. In the block settings, adjust the height and width, or more, according to your needs. Now, click on the '**Update**' button and publish the embedded post.

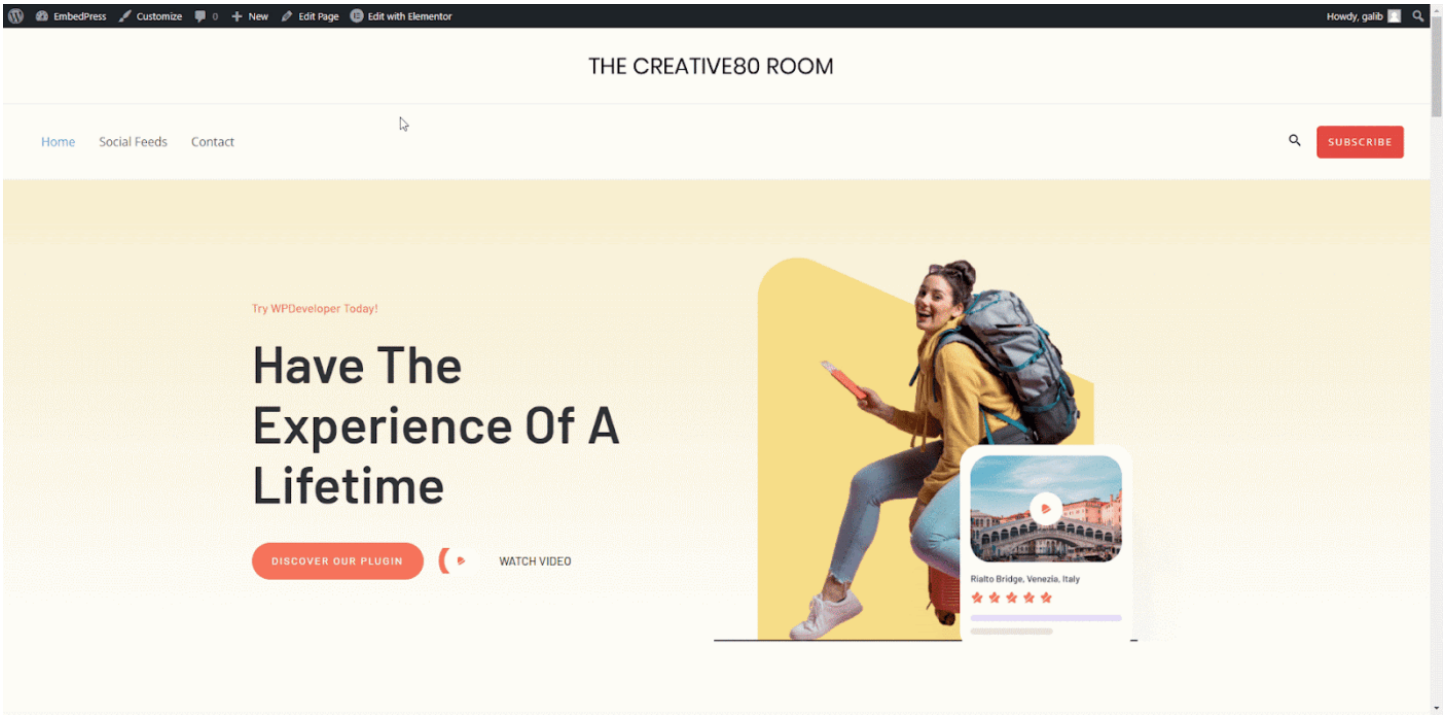

You can now embed your X posts through the **Gutenberg editor** on your WordPress site.

How to Embed X Posts in Elementor?

Embedding X posts on your WordPress site is easy using EmbedPress in **Elementor website builder** . You can follow the step-by-step process shown below to embed your LinkedIn post.

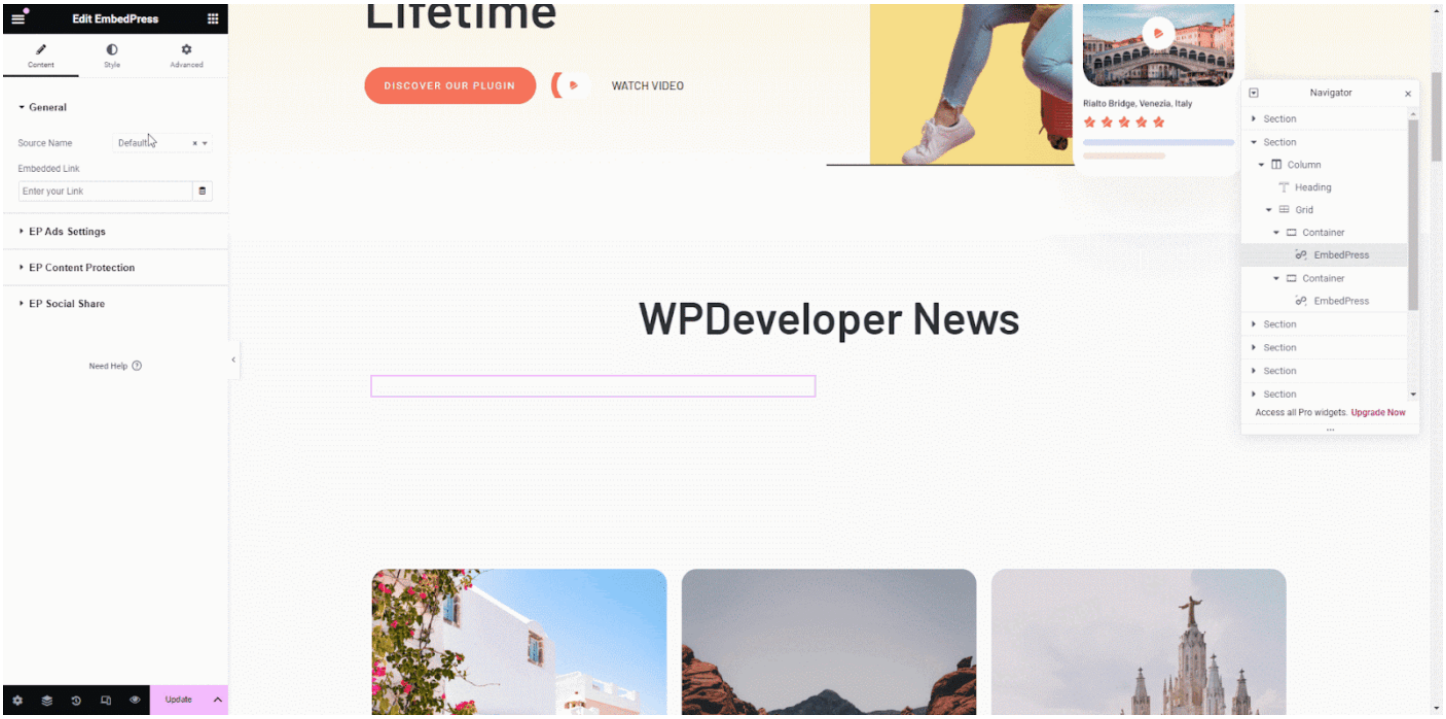

Step 1: Insert EmbedPress Widget

Click on '**Edit with Elementor**'. Under the '**Elements**' tab, find the '**EmbedPress**' element through the search bar. Simply drag & drop the '**EmbedPress**' element into the page.

Step 2: Embed X Posts in Elementor

Now, **paste the copied X post link** in the EmbedPress widget embedded link section. Your X post will be embedded and visible on the page instantly.

Following these steps to embed and showcase X posts to add a unique touch to your WordPress website content.

Step 3: Customize Your Embedded X Post

Go to **‘Style’** in settings, then customize post height, width, or any other modification according to your interests to make it presentable on-site. Then click on ‘**Update**’ button to update the embedded post on the site.

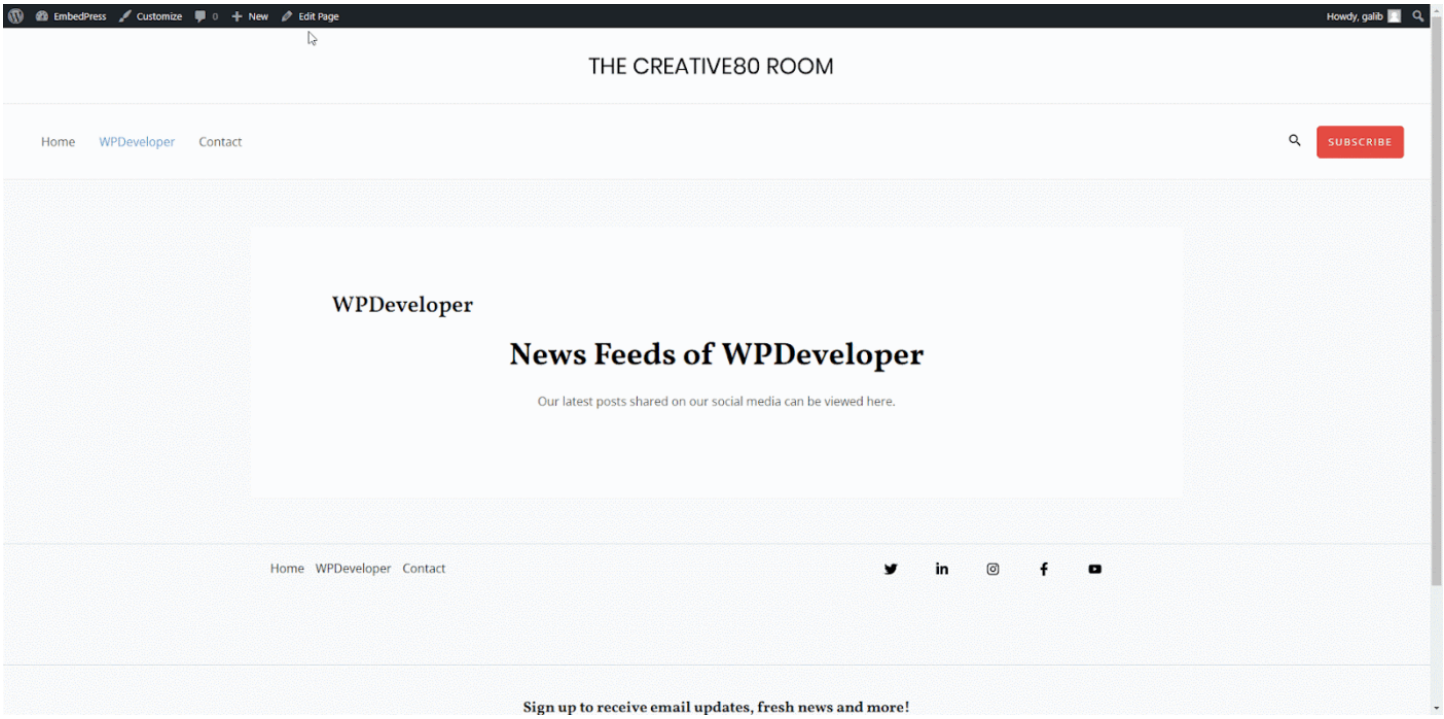

This is how easily you can embed **X posts in your WordPress** site using the **EmbedPress plugin** in **Elementor website builder**.

How to Embed X Posts in Classic Editor?

You can easily embed LinkedIn posts in **Classic Editor** using EmbedPress. In the classic editor, EmbedPress automatically detects X posts and embeds. You just need to install and activate the EmbedPress plugin on your WordPress and follow the steps below.

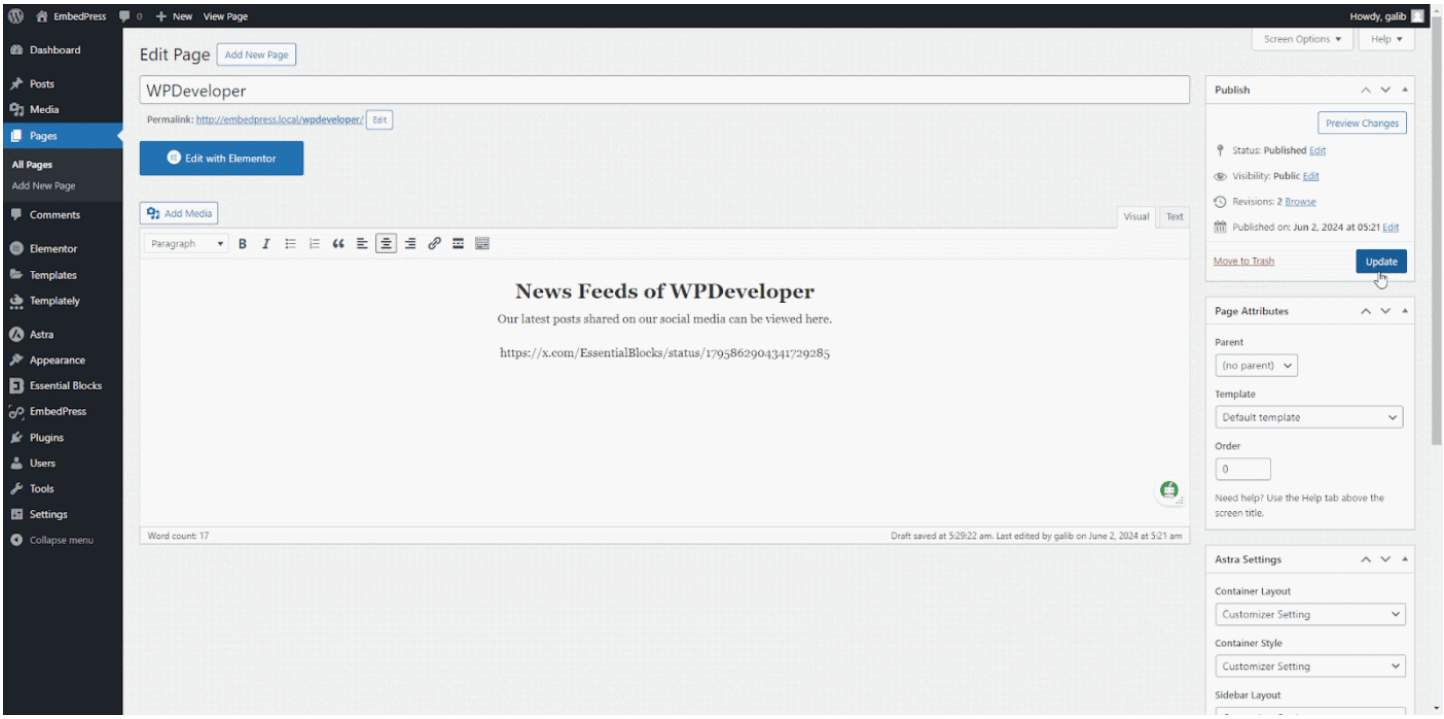

Step 1: Open Classic Editor & Embed X Posts

Click on '**Edit Page**' to open the classic editor and go to the section of your page where you want to embed the LinkedIn post. And paste the copied LinkedIn post.

Step 2: Update And Publish Embedded Post

Click on the '**Update**' button from the page settings. The EmbedPress plugin will detect the link automatically. To view the output, click on '**View Page**' on top.

That is how easily you can embed X posts in your WordPress site in Classic Editor using the EmbedPress plugin. EmbedPress makes the process a lot simpler, as these steps were to enrich your website.

Experience Live Embedding of X Posts

Now, follow the steps shown to enrich your website content, like we have embedded an X post here.
