Get Started With EmbedPress Youtube Block

Follow this step-by-step guide to embed any YouTube video in your WordPress site, using the **EmbedPress Block** for Gutenberg.

Step 1: Select EmbedPress Block In Gutenberg

Go to the Gutenberg post editor where you want to embed YouTube videos. Click on the **‘+’** icon and then search for **‘EmbedPress’** block from the search bar and select it. After clicking on this block, you should see the default layout shown below.

Unlock More Features With EmbedPress Pro

If you are using **EmbedPress Pro**, then you can also add extra customization to your YouTube embed.

Navigate to your WordPress Dashboard and go to EmbedPress Menu from the left. Now under the **‘General’** option from the settings panel, click on **‘Youtube’**.

[Youtube videos in Gutenberg]

Here you will see many customization options. Change the settings however you want.

- **Auto Play:** Automatically start to play the videos when the player loads.
- **Progress bar color:** Specifies the color that will be used in the player’s video progress bar to highlight the amount of the video that the viewer has already seen.
- **Force Closed Captions**: Setting this option to ‘Yes’ causes closed captions to be shown by default, even if the user has turned captions off. This will be based on user preference otherwise.
- **Display Controls:** Indicates whether the video player controls are displayed.
- **Enable Fullscreen button:** Indicates whether the fullscreen button is enabled.
- **Display video annotations:** Indicates whether video annotations are displayed.
- **Display related videos:** Indicates whether the player should show related videos when the playback of the initial video ends.
- **Modest Branding:** Indicates whether the player should display a YouTube logo in the control bar.
