How To Embed Ethfiddle In WordPress With EmbedPress

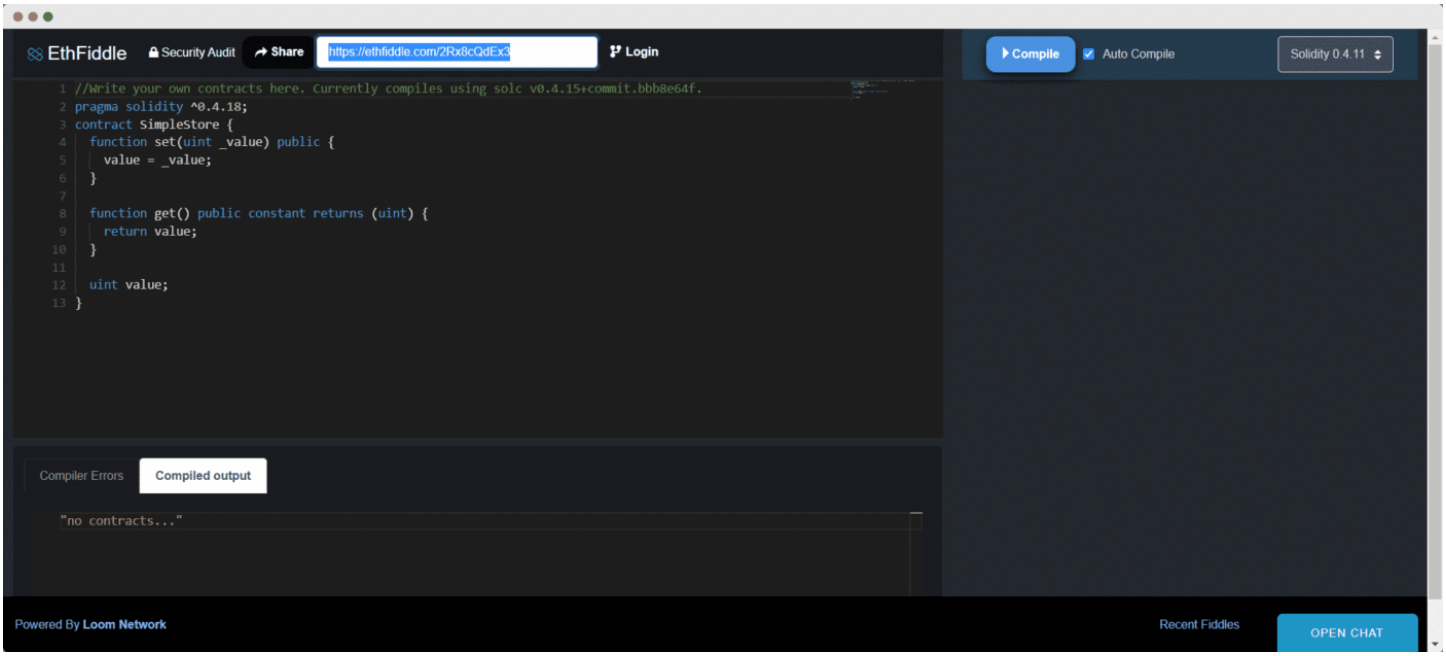

Embed Sources · https://embedpress.com/docs/how-to-embed-ethfiddle/

Ethfiddle is a code compiler platform, where you can write and store any codes of any language and share them with everyone in the same format. You can do live chat, preview output of your code, and many more with this platform.

EmbedPress allows you to embed Ethfiddle on your WordPress website instantly whether it's built with **Elementor**, **Gutenberg**, or **Classic Editor**. Follow this step by step guideline below to find out how to embed Ethfiddle in WordPress with **EmbedPress**:

How To Collect Ethfiddle posts URL

To embed Ethfiddle links in your WordPress website, write down the code you want to embed and then click on the **‘Share’** icon. There is a sharable link there, copy it. You can use this link to embed Ethfiddle.

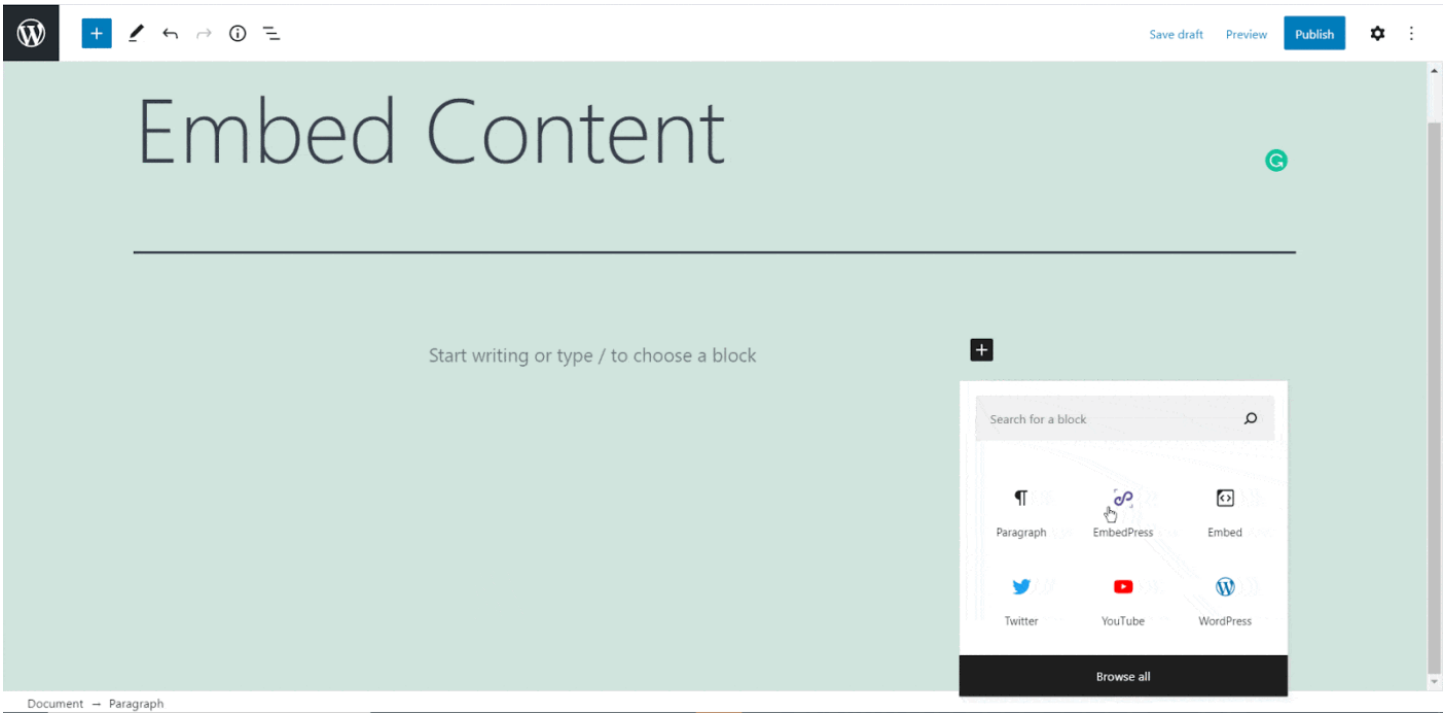

How To Embed Ethfiddle In Gutenberg

EmbedPress has its own blocks to embed any type of content using the Gutenberg block editor. To embed Ethfiddle using Gutenberg, follow the steps below.

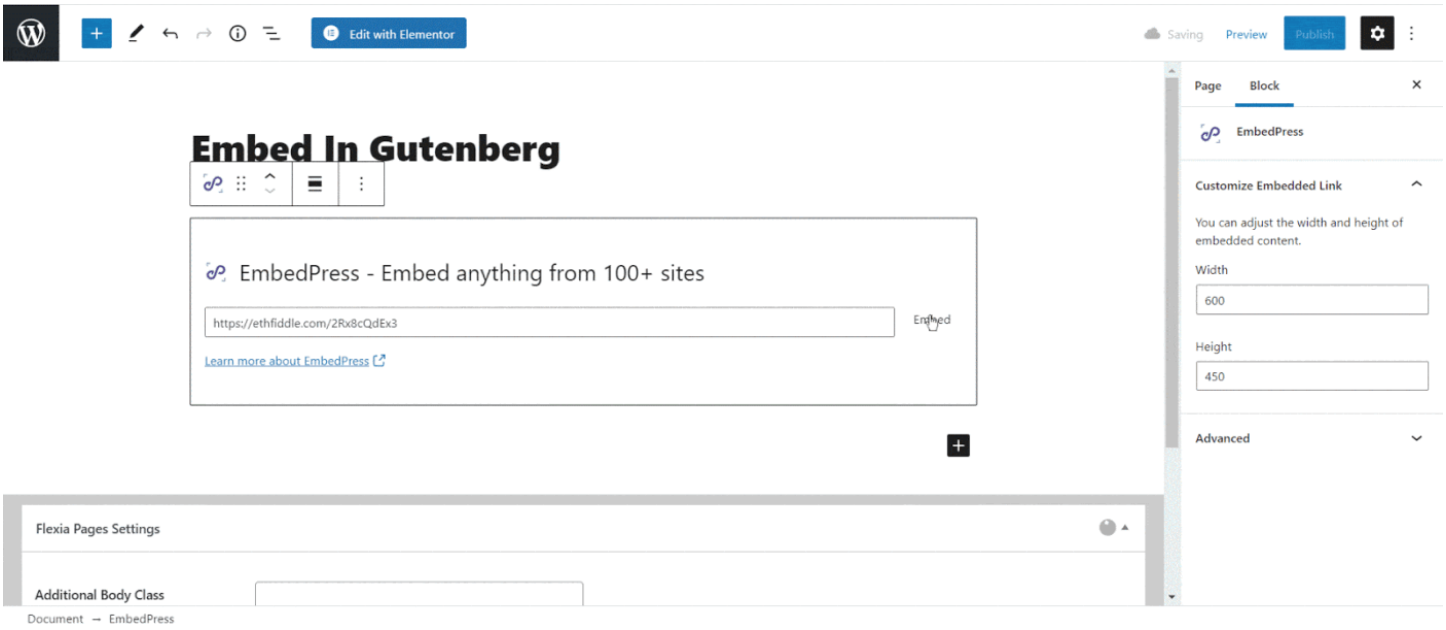

Step 1: Search For The EmbedPress Block

From your dashboard, open the page where you want to embed Ethfiddle posts. Click on the **'+'** icon to add blocks and search for EmbedPress. Click on the **EmbedPress block** to insert it on the page.

Step 2: Paste The Ethfiddle URL In EmbedPress Block

Afterward, paste the collected Ethfiddle URL post's link on the input field and click on the **'Embed'** button beside the URL field. The Content will be successfully embedded using Gutenberg.

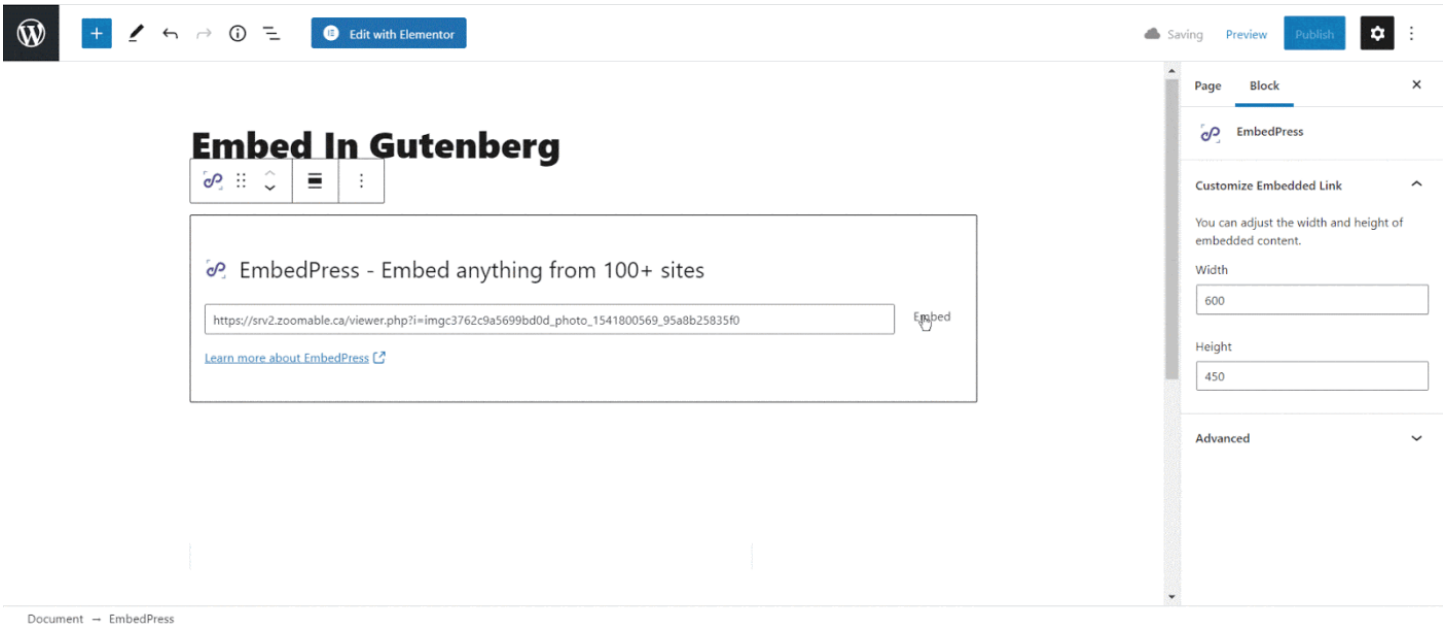

How To Embed Ethfiddle In Elementor

After collecting the Ethfiddle URL, head over to your WordPress dashboard and open the page where you want to embed Ethfiddle links. Then follow the instructions given below.

Note: *To embed Ethfiddle posts in WordPress using Elementor, make sure you have installed and activated* ***Elementor****.*

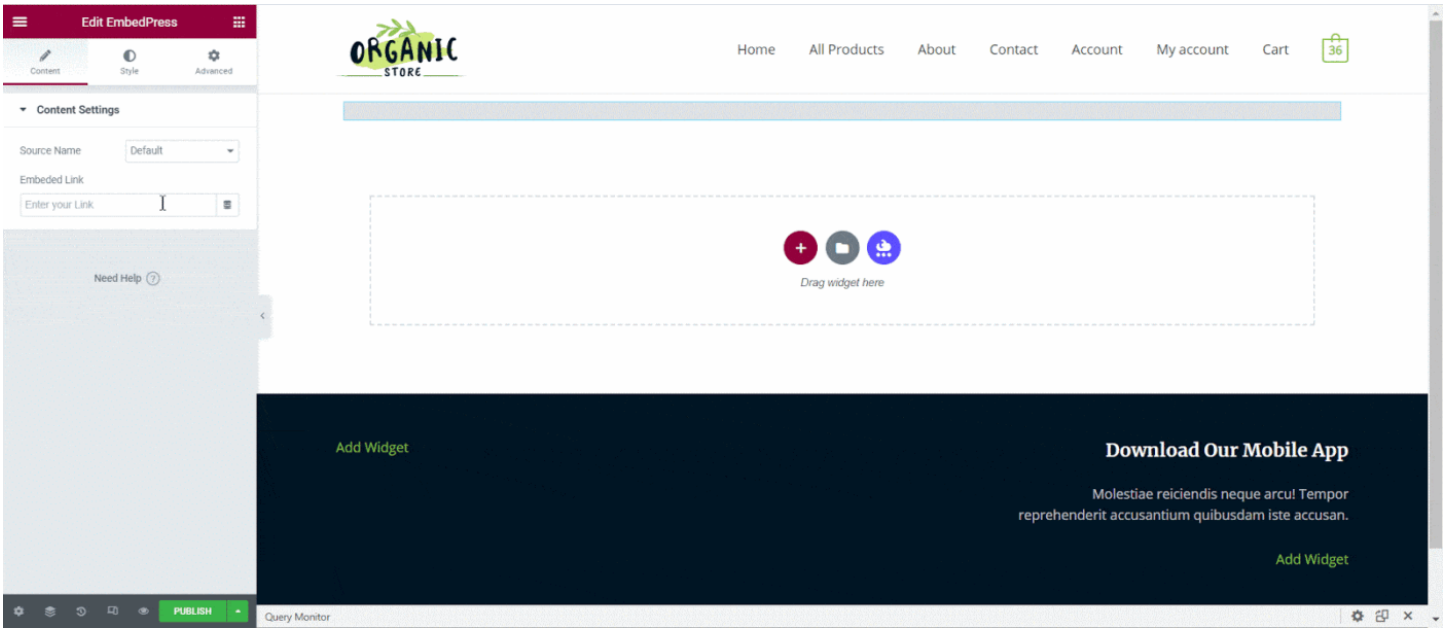

Step 1: Search The EmbedPress Element

First, select this **‘Edit with Elementor’** button on the top of your page. It will take you to the Elementor editing panel. Search for **‘EmbedPress’ element** on the widget panel and then drag and drop the element on your page.

Step 2: Paste The Post's URL In 'Content Settings'

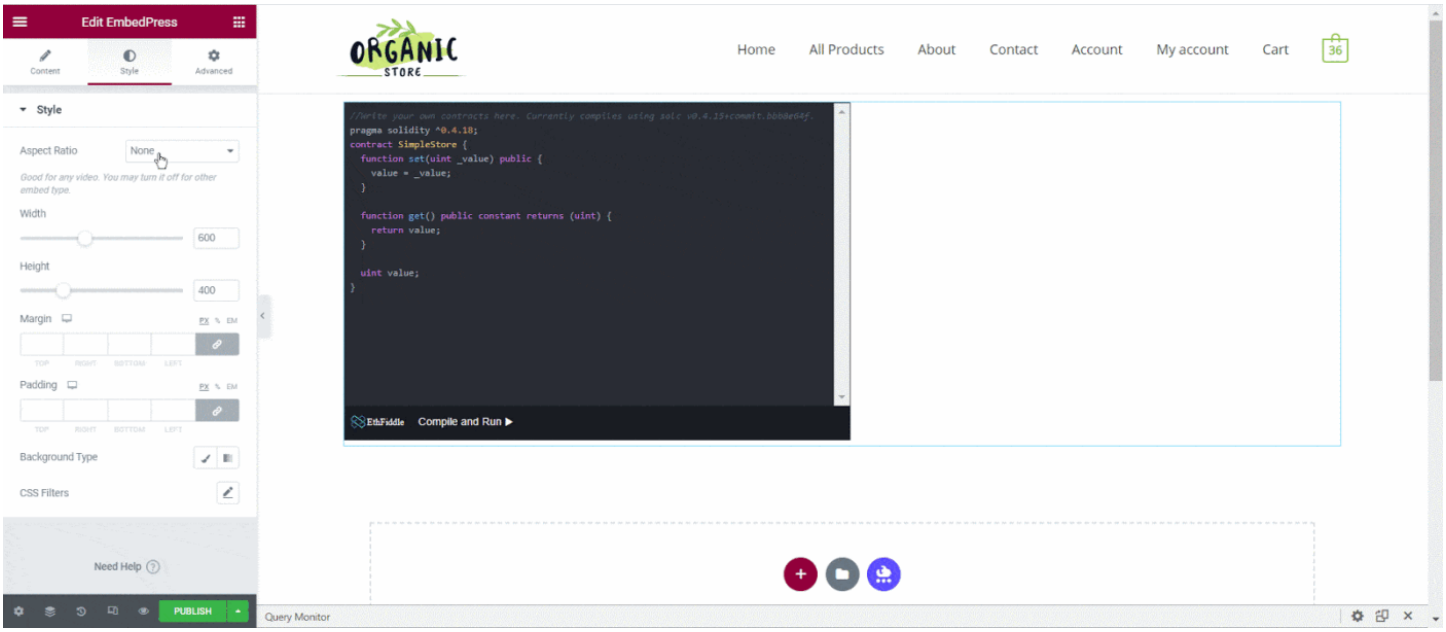

Next, paste the Ethfiddle post's URL you just collected into the input field of the **'Content Settings'**. It will automatically then fetch and embed your posts into Elementor Editor.

Step 3: Style Your Embedded Content

You can edit EmbedPress to present your content in a more visually appealing way based on the design of your website. Simply click on the **'Style'** tab. You can change the **'Aspect Ratio'** of your embedded content. Tweak and turn all options available background colors and **'CSS Filters'** to fit it

more neatly into your website.

After making all changes hit the **‘Publish’** button and your content will be successfully embedded.

How To Embed Ethfiddle Posts In Classic Editor

If you are a **Classic Editor** user, you can easily embed Ethfiddle posts with just one click. To do this, open a new page with Classic Editor and paste the content URL. You can preview the embedded content instantly on the page.

With these simple steps, you can embed Ethfiddle link instantly into your WordPress website with **EmbedPress** using any of Gutenberg Editor, Classic Editor, or Elementor Editor.
